MISCELLANEOUS. OLD HAYS.

In the July number of the Knickerbocker, is a continuation of a graphic story, published under the quaint title of "The Quod Correspondence." A murder has been committed, and the murderer, an Attorney, is sitting in his own room, muttering in a low tone, when Tike, alias "old Hays," pays him a visit.

"He was first brought to himself by hearing a step on the stairs. Slow, deliberate, and solemn, it broke upon his ear. There was no haste in that tread; but no hesitation. The first feelings of the Attorney were one of the most abject terror. His whole frame seemed sinking; his limbs shook and his jaws, as with an ague fit; his fingers clutched involuntarily, and the quick, hard pulsations of the heart might have been heard distinctly. The steps ascended the stairway. His first instinctive impulse was to secure the door; but the utter uselessness of such a precaution struck him in the same instant.

"The policeman drew a pistol from his pocket without moving from his seat, cocked it, and pointed it at the Attorney. "Look ye, Mr. Bolton," said he, "an axe is a dangerous weapon, but a pistol is a dangerous-er. I've no objection to your being frightened. It's all in course; and you may even shake that cleaver at me; but you must not resist the law; for I came here to take you, and living or dead, I'll do it. Put up your axe, or I'll quiet you with a bullet. You'd better put it on."

"You'd better take your hat, and put on your gloves, for it's a cold night," said Mr. Tike, returning the pistol to his pocket, and drawing forth the key. "Now step forward like a reasonable man," said he, as he unlocked the door. "There, take my arm: my left arm is for you please; I want my right arm for services. There," said he, grasping the sleeve of the arm that was placed in his own, "now you act reasonable, we shall get on quite comfortably." As he spoke, he strode along the dark entry with the rapid and sure step of one who was familiar with it; and turning up the street, led the prisoner off to those dens of darkness and misery yeapt "THE TOMBS."

He was captured about ten minutes ago, in this "ere room, by this 'ere key; and he wants you to go to prison as his substitute. Bolton threw a hasty look about the room. The windows were all closed and high from the ground. He glanced at his own spare frame, and measured its strength with that of the ponderous and muscular man before him. He looked about for a weapon of defence. On the top of the desk opposite him, lay an old hatchet, which had once aided in a murder, whose perpetrator he had screened from justice. His eye rested on it for a moment, and his purpose was fixed. So was that of Mr. Tike, who watched his eye and saw the weapon.

"Without changing his position, or altering a muscle, Bolton turned to the officer and said:— "This is a strange enigma. Speak out, will you, and tell me what you want?" "Well, then, plainly, I want you!" responded Mr. Tike, "to show cause why you should not be hanged for murder."

"Murder!" ejaculated Bolton. "Ay, murder!" Mr. Bolton. You were seen to attack a weak man, sick, alone, and about to die; you were seen struggling with him, to grasp his throat, to throw him down, and smother him; and then to leave him as if he had died a natural death. This you was seen to do, Mr. Bolton, this very night, not two hours ago; and that man was one who was your friend—Wilkins!"

"It's false—'tis false, as hell!" shouted Bolton, his eyes starting, and his hair bristling with horror at the description of the Policeman. "I did not! you cannot prove it! I'll not go with you, to be murdered on a charge like that! By the living God! I'll not! See here!" he shouted; he sprang to the hatchet, and brandishing it like a maniac over his head; "see here! With this I'll defend myself to the last—to the last gasp! Ha! ha! I have I thwarted you? One step towards me—ay one inch, and I bury this in your skull! Keep off! both of you—both of you! Ay, even though he help you, I'll not give up!"

"The policeman drew a pistol from his pocket without moving from his seat, cocked it, and pointed it at the Attorney. "Look ye, Mr. Bolton," said he, "an axe is a dangerous weapon, but a pistol is a dangerous-er. I've no objection to your being frightened. It's all in course; and you may even shake that cleaver at me; but you must not resist the law; for I came here to take you, and living or dead, I'll do it. Put up your axe, or I'll quiet you with a bullet. You'd better put it on."

Our new boxes contain 25 Pills each, the old only have 21. WILL. PECK. A fine lot of LUMBER can be bought at FORTER'S MILL, Wake County, at a very cheap rate. M. WISE, Student of the celebrated Fraunhorn, of Germany. OPTICAL INSTRUMENTS, SPECTACLES, &c. MR. WISE respectfully informs the citizens of Raleigh, and the public generally, that he will be in Raleigh, on Wednesday, the 16th of November next, where he will be happy, for a few weeks, to attend to all orders in his line. He will also, if required, go to any part of the City where his services are wanted.

Persons wishing to procure Spectacles, or to have new glasses fitted in old frames, are informed that he can be suited with glasses of different sizes, colors and forms, and suited to any age, which he can determine by inspection of their eyes. The glasses which he furnishes he will warrant to hold their power of vision from five to eight years. From his knowledge of the science of Optics he can determine the glasses suitable for any age. Persons with weak eyes can be supplied with glasses which will greatly benefit them and not strain the sight; also Spectacles for near-sighted persons, and those who have been operated upon for cataract of the eye. He would particularly call the attention of the public to a new sort of glasses and conservers of the sight, made of the best flint and azure glass, and ground perspective. These glasses have been recommended by the most celebrated doctors and professors, as the best in their effects on the eye. They are the best of the kind for preserving and improving the sight in continued reading and writing, in which case they not only relieve the eye, but also strengthen and improve the sight. It is not necessary to say more than that he has testimonials of the most celebrated professors of Germany, that his glasses are made of the best and finest material, and that they are ground true and exact. They are, therefore, far preferable to the usual rough, irregular and unevenly ground glasses that are daily peddled off, and which are very injurious to the eye. Good glasses may be known by their shape, exact centre, and sharp, clear, and highly polished surface. These qualities are to be found in a high degree in his glasses.

Optical Instruments of all descriptions, among which are small and large Telescopes, Microscopes and Spy-Glasses; Concave and Convex Glasses, without frames; Concave and Convex Mirrors; Gold and Silver-steel Spectacles of all kinds; different descriptions of Magnifying-Glasses; large and small Magic Lanterns. His Microscopes will magnify objects five thousand times.

Optical and other similar Instruments and Glasses carefully repaired. Mr. W. assures the public, that it shall always be his study to execute every thing entrusted to him with the greatest care and on moderate terms. Those in want of any thing in his line will please give him a call. He has now on hand a general assortment of Goods.—Spectacles with Concave and Convex glasses, also with Glasses of each kind. He has but one price for his articles, from which he does not vary.

Reference is made to the following Letters: RICHMOND, September 9, 1840. I have frequently had occasion to recommend persons laboring under defective vision to Mr. Wise's relief, and always with success. Mr. Wise keeps an extensive assortment of Spectacles and Optical Instruments, and he thoroughly understands the adaptation of glasses to the physical defects in vision; indeed, he has made the Science of Optics and Optical Instruments a special study, and therefore, I have no hesitation in recommending him to the public. Surgeons who may desire Cataract Glasses (of any focus) for their patients, can be supplied by Mr. W. upon the most reasonable terms. TH. JOHNSON, M. D. Prof. of Anatomy and Physiology in the Med. Department of Hampden Sydney College.

Mr. Wise is worthy of extensive patronage, from a long and persevering effort to perfect himself in the knowledge of Optics. He has paid particular attention to the adaptation of Glasses to the defects of Vision, and a frequent opportunity of witnessing the success of his efforts in this way, has induced me to give him a certificate of qualification. All ages, and Glasses suited to Eyes upon which operations have been performed, will be aided in getting back lost sight, as far as artificial means will do it. EDWD. H. GARMICHAEL, M. D. PETERS' PILLS. THESE UNRIVALLED PILLS having now acquired a celebrity and a popularity unequalled in the annals of Medicine, and also having obtained the entire confidence, and being used in the private practice of almost the whole body of the Medical Faculty in the United States, Europe, Asia, South America, the West Indies, and a great part of Africa, it is unnecessary to advertise them at length, or to say any thing further of their merits, than by stating the complaints which they are most effective in the cure of, and which are as follows:—yellow and bilious fevers, fever and ague, dyspepsia, cramp, liver complaint, sick head-ache, jaundice, asthma, dropsy, rheumatism, enlargement of the spleen, piles, colic, female obstructions, heart burn, furred tongue, nausea, distensions of the stomach and bowels, incipient diarrhoea, flatulency, habitual costiveness, loss of appetite, blotch or sallow complexion, and in all cases of torpor of the bowels, where a cathartic or an operation is needed. They are exceedingly mild in their operation, producing neither nausea, griping nor debility. The above Pills are for sale in the city of Raleigh by Messrs. Williams & Hayward, and at the Drug store of N. L. Stith, and in Fayetteville by E. J. Hale, at New York Prices.

"DISEASE A UNIT Impurity of the BLOOD the only Disease. HOW simple, yet how wise, how good and benevolent are all the laws of nature! Simplicity and truth are stamped upon every law of the creation.—The mighty worlds which roll in space in every degree of velocity and direction are all governed by attraction of matter to matter. This principle governs the human body. Brandreth's Vegetable Unit Pills, attract all impurities of the blood to the bowels, which organ expels them from the body. Attraction and disease are both units. All accidents or infections only affect the body in proportion as they occasion impurity of the blood. The bowels for instance are costive—this most important organ is closed—the consequence is a great accumulation of impurities, which, as they cannot get out by their usual passage, are forced into the blood, occasioning impurity of blood. Thus Fevers, Cholera, Rheumatism, Coughs, and Colds are often produced. But let Brandreth's Pills be used in such dose as will effectually evacuate the bowels, and health is restored at once."

The unworthy have counterfeited the Doctor's Medicine so extensively, that his travelling Agent is now taking in all the old boxes, and putting new ones of a different figure, with 25 Pills in their place. Some are just received at WILLIAM PECK'S Office. Raleigh, March 4, 1842. 18-17
