VOLUME LXIII.

NUMBER 93.

W. WISE.
Student of the celebrated Traubman, of Germany.

OPTICAL INSTRUMENTS,
SPECTACLES, &c.

Mr. WISE respectfully informs the citizens of

Raleigh, and vicinity generally, that he will be in

Raleigh, by Wednesday, the 6th of December next,

where he will be happy, for a few weeks, to attend to

all orders in his line. He will also, if required, go to

any part of the City where his services are wanted.

Persons wishing to procure Spectacles, or to have

new glasses fitted in old frames, are informed that they

can be suited with glasses of different sizes, colors

and forms, and suited to any age, which he can determine

by inspection of their eyes. The glasses which he

furnishes will warrant to hold their power of vision

from five to eight years. From his knowledge of

the science of Optics, he can determine the glasses

suitable to any age. Persons with weak eyes can be

supplied with glasses which will greatly benefit them

and not strain the sight; also Spectacles for near-sight

ed persons, and those who have been operated upon

for cataract of the eye. He would particularly call the

attention of the public to a new sort of glasses and

correctives of the sight, made of the best flint and azurite

glass, and ground perspective. These glasses have

been recommended by the most celebrated doctors and

professors, as the best in their effects on the eyes.

They are the best of the kind for preserving and im-

proving the sight in continued reading and writing, in

which case they not only relieve the eye, but also

strengthen and improve the sight. It is not necessary

to say more than that he has testimonies of the most

celebrated professors of Germany, that his glasses are

made of the best and finest material, and that they are

grande and exact. They are, therefore, far more

preferable to the mass of rough, irregular and unevenly

ground glasses that are daily palmed off, and which are

very injurious to the eye. Good glasses may be known

by their shape, exactness, and sharp, clear, and high-

ly polished surfaces. These qualities are to be found

in a high degree in his glasses.
