I tried every thing in the shape of medicine, and consulted the most skilful physicians, but found no permanent relief. I became discouraged, gloomy, and, and sick of life ; and, probably, ere this, should have been in my grave, had I not fell in with your precious medicine. A friend of mine, who had been tick of the mme complaint, advised me to try your pills : but, having tried most other medicines without btaining any relief, had but little faith that your Pills would be of benefit to me ; but, at his carnest solicitation. I procured a box and commenced taking them.

The first produced little or no effect, and I began to desnond, for fear that your medicine would prove like others I have taken , but my friends argued that one was not a fair trial, and I purchased a second, and before I had taken the whole box I began to experience a change ; the pain in my chest began to be less painful, and my food did not distress me as much as formerly. I went on taking them until I had taken siz boxes, and my DYSFRESSA was down. and my expectation of an early death vanished, and I felt like a "new creature," I was then, and am now, a healthy man. I have never since been troubled with the Dyspepsis. I have administered your Pills to the members of my family, and to my friends and in all cases with good success. ## NOTICE.

THE subscriber now offers for sale, delivered Baltimore, and at prices corresponding with the hardness of the times, LEWIS H.MAUS's portable Cast from THRESHING MACHINES, for threshing Wheat, Rye, Oats, and small seed, and crackin Corn in the ear for the purpose of preparing it for foor for cattle.

The improvement which makes these Machine superior to any now in use in the Southern and even Northern country, is because of the body of the cylinder being cast in one or two pieces, with the heads of teeth or points all cast together, being a solid mass-there by giving to it additional weight, and obviating the danger of the spikes flying out, es collectimes happens with the wooden cylender, which greatly enlangers the lives of the operatives. Of these Machines no fears used be entertained of

their performance, for the reason of their having been successfully tried for three years past, and as yet no objection has been made known to the Agent.

Being the only Agent in North Carolina, to dispose of said Machines, and living as I do in a remote section of country, I feel it to be incumbent on me to give notice through the columns of some of the pub-lic organs, that the farmers and others may supply themselves (if they are so disposed) with said Mas chines

They can be transported on one wagon, but more conveniently on two, from one furm to another, and after arriving at the place where the work is to be executed and set in operation in loss time than fifteen minutes. With four good horses and eight hands,
