#### CITY AFFAIRS.

The newly elected Board of Commissioners on Wednesday night last, and were duly organized by taking the Oaths of Office.

JAMES LITCHFORD was re-appointed Treasurer. WILLIAM WHITE was elected Clerk. JAMES H. MURRAY was re-elected City Constable We refer our City readers to the satisfactory Expose of the monetary affairs of the Corporation, contained in to-day's paper. For the first time, in many years, our City is nearly free of debt, and will be entirely so, before the year expires.

HOGS, OR NO HOGS?

SPLENDID MAP AND GAZETTEER. We have just seen a soble Map of the United States, Texas and Canada, published by Mesan. SHERMAN and Smrrn, of New York. It is decidedly the best Map we have over seen of the United States ; is six feet by seven ; projected on a scale of 24 miles to the Inch. and is certified on the Map by Mr. STEIGER, the Principal Clerk of Surveys at Washington, that it ambraces all surveys made by the United States, from the Atlantic ocean to the American Desert, or to the 32d degree of West longitude. It would seem to be authority on all boundary questions, from National to Township lines. This Map is particularly valuable for its correctness in regard to the Western

and Southern States and Territories. The base meridian and township lines of the United States' surveys are given ; and these ewning lands in any part of our country, with the Map before them, may put their finger on any section, and see the streams, lakes, swamps, &c., pourtrayed from actual survey. In addition to the United States, the map contains a repre-

sentation of the Canada, Texas, North and Central America, a desirable improvement upon the shadowy outlines heretofore given.

The countries set spart by the United States for the use of the different Indian Tribes, and their names, are also given. As a work of art, this Map is unquestionably a high achievement. It is wholly engraved on steel, is splendidly bordered by scroll work, with the introduction, at proper places, of vignettes of Citics.

Accompanying the Map is a Gazetteer of the United States, compiled by President HASKEL, and J CALVIN SMITH, Geographer. It is well bound and contains nearly 800 pages octayo, and upwards of 6,000 names more than any other work of the kind, with a particular description of every Town, Post Office, Village, City, Parish, County, State and Territory ; Mountains, Rivers, Lakes ; Internal Improvements and curiosities ;-also, an abstract of the Census and statistics of 1840, with the substance of the Inte Geological surveys made by several of the States. It is intended to exhibit a complete view of the Agricultural, Commercial, Manufacturing and Literary condition and resources of the country. It has been compiled from a multitude of sources, not the least of which, have been information furnished by the Past Office and State Departments, and agents and porrespondents in every part of the country.

IT Mr. JACKSON, Agent for the above Works in this State, will supply orders for them at Cleveland's Luncertainty and gloom. Book Store in Raleigh, or forward them to any part of the State.

### CALEB J. MCNULTY.

The House of Representatives, Democratic as it is has done one act of which the whole country can approve. The expulsion of Mr. McNulty from office, and the directions to have hun sued and indicted, will be cordially approved by every honest man in the country. This unanimity contrasts advantageously, he conduct of the Loco Focos in our State Ser

WELL SAID. The " Lincolnton Courier," of this State, a Dem ocratic Journal, takes the following common sense view of the conduct of his political brethren in Es. NETT'S Case :

"The Democratic Sanators prepared a Protes against the resolutions that expelled the member from Onslow, Wm. Ennett. It will be remember-ed, that though doly elected, he arrived in Raleigh without his certificate ; while there, some one came to his room and left a certificate on which he was qualified, and which afterwards was proved a forgery, by the arrival of the genuine article. The friends of Ennett contended that he was ignorant of the fraud (which is still unexplained); that he was a the fraud (which is still unexplained); that he was a simpleton, any how; that he did not know any ber-ter, and if let off this time, he'd never do se any more; but he was expelled, an election ordered; and the Senator elected again, and qualified with 10 op-posing votes. We cannot agree with the party in this matter, for if a forged note is found in the hands of a poor devil, he is brought up to the scratch for it, and punished by the criminal law of the land; this protest might at least have been let along, unless the laws are to be privated on India alone, unless the laws are to be printed on India rubber paper, as the Yankes proposed, se that they may be stretched a bit when a rich culprit is haul-ed over the coals. If Senator Stowe's predecessor had been returned fast election, we should not have

been suprised to find his name attached to this protest, for plausible reasons. There are black sheep in every flock, however, and we can only regret that the sable mantle has fallen on a democrat; but it is said the devil is not as black as he is, painted."

# HOME INDUSTRY.

The opinion seems now to be gaining ground every where, that without adequate protection to Home m dustry, we can expert no substantial prosperity, no uniform improvement. Without it, the dignity of our labor must fall back upon a level with that of Europe, Asia, and Egypt, where common laborers are no more respected by the high orders, than brutes. Without this barrier, our laboring departments must totter and fall, and our improvements in Mechanics and Manufactories retrograde until America becomes degraded. Without protection to American industry, these evils will as surely come as that the Sun rises in the East and sets in the West. The protection of American labor against competition in Europe, is, however, still unwisely opposed by some politicians of our day; and if their views could be carried out, the energy and vigon which now characterize our people, would be changed into weakness, and their prospects for happiness into

### THE DEBT OF ALABAMA.

We learn through a Report of the Legislature this State, that her indebtedness is \$14,109,000 67, and the amount necessary to defray the expenses and pay the interest upon her debt is \$700,000 annually. This State has always been under the manageraent of the Democratic party.

CLINGMAN'S SPEECH .- The New York Correspon lent of the "National Intelligencer" says : "There has been great inquiry for the Intelligencer of Thursday, containing the admirable speech of Mr. CLINGMAN, of North Carolina. His remarks in egard to practices in this city at the late Presidential lection can all be substantiated. His eloquent agposition of the causes that led to the defeat of the Whig party will become matter of history. His tri-bute to our venerated leader and candidate will find a response in every Whig heart." We shall commence the publication of this Speech our next-Ep.T. Bro.

A STRONG HINT .- A young lady told a gentleman that her silver thimble was nearly worn out, and asked him what reward she ought to have for her industry. The gentleman, in answer, sent her a new thimble the following morning, accompanied by these lines: "I send a thimble, for fugers nimble,

Which I hope will fit when you try it ; Twill last very long, if but half as strong As the hint you gave me to buy it."

MOTHER OF THE SIAMESE TWINS .- The journal of Rev. Mr. Heminway, Missionary to Siam, published in the Missionary Herald for December, gives an account of a visit made to the mother of the Siamese twins, in the course of an excursion which was made by Mr. Heminway, in company with Rev. Mr. Buel, through a portion of the Siam country, in December last.

In the progress of a morning walk, in the neigh-borhood of Maklong, the missionaries fell in with very respectable looking man, who informed them that he was the individual who conducted the Siamese Twins from that place to Bangkok, and in favor of JOHN BUFFALOW, I shall proceed to sell delivered them to the Captain who took them to the highest bidder for Cash, at the late residence out of the country. As Mr. Buel's relatives live in the vicinity of her children, he offered to communicate, through them, any messages she wished to send to the twins. She is of lighter complexion than most Siamese women, and has every appearance having once had great energy of character. It seems that both of her husbands were Chinamen. and that she herself had a Chinese father ; so that the twins are in no sense Siamese, except that they were born in Siam." SAND'S SARSAPARILLA .- Uncaseville, Ct. Man 5, 1843.-Mesers. A. B. Sands & Co.-Gentle men .- Permit me to add another to the many testimonials in favor of your Sarsaparilla. I was, about seven years ago, sick for many months with a bilious fever, during which I took a great deal of powerful modicine. This left me with a lame. ness and pain in my joints which was very distressing. I was at the same time troubled with a swelling of my ankles, attended with so much inflammation as to render it impossible to bear the least clothing upon them. They would frequenty ulcerate, and discharge for a long time, when they would heal, and be immediately followed by a violent fever. I have also been troubled for a long time with a pain in my side, which is now entirely cured, and my other distresses relieved.

It has always been his aim to self the best articles at prices averaging considerably below the market rates, and this he has accomplished for the following rea-

First-By the experience of nearly forty years' de-votion to business in New York, which has given him a practical advantage unequalied.\*

Second-By a general systematization of his busi-siness under his own immediate eye and superinten-dence, avoiding thereby the errors and differences in hargains, which arise from a variety of managers.-Every customer is dealt with alike honorably, equits bly and liberally.

Third-By being always watchful of the market. and by buying his siticles when depressed, so that when the season of demand arrives his regular Customers do not suffer by the advance of the market occasioned by that demand, but frequently purchase at prices so far below their neighbors' cost rates, that they can sell at these rates, and make a handsome profit. Their sales to their Customers, and their purchases of the Subscriber, become very much enlarged, and they experience the truth of the maxim, that "A nimble sixpence is worth a slow shilling." His Customers beginning with small purchases, which they rapidly increase, build up for themselves a large business, and benefit their own trade and his. For, by purchasing goods in large, quantities, the price to him is materially reduced, and he is thus enabled to supply his Customers at a corresponding reduction. Consequently, every addition to his business benefits both his Customers and himself. He has thus been enabled to gain the good will,

and retain the custom, of those who have traded with him and supported his establishment for a long time. and from year to year to add numbers of new ones to his large hat of traders and dealers. The old ones have been retained, and their beginess increased. It is the interest of those who purchase to sell again, to buy as low as passible, in order to increase their own business. Country and City Merchants who buy of him meet with no competition from their neighbord in point of chempness and excellence in the articles they sell.

LARGE SALLE, SMALL PROFITS. AND GREAT AT-FERTION TO BUSINESS. This sentence explains the chief cause of the continued increase of the Subseria ber's business. No purchaser goes away dissatisfied either with the quality or prices of his goods. For their convenience he has from year to year extended his business, antil there is now scarcely an article of merchandise that he does not sell. At his establish-ment the purchaser can complete the entire range of his purchases. No Customer stands waiting at his counter-so well are his clerks and packers trained to his business, that every order is instantly executed and despatched

HE HAS NO STOCK OF OLD GOODS FOR MALE.-Constant and ready sales cause daily replenishments of such merchandise as should be fresh to be superior. An accumulated stock of ohl goods indicates little knowledge of what suits the tastes and demands at the expense and sacrifice of his costomers. In consequence of large sales at small profile, his stock s always NEW, SUPERIOR AND DESTRIBLE, and his Justomers experience the tauth of this statement in the rapid sales of the goode had of him, and in the frequent necessity of replenishing their stock from his establishment. his establishment. # CONSTABLES' ELECTION.

On Monday last, Jons A. STUART was elected Constable for the District, comprised within the limits of the City. And WILLIAM H. PUTNET was elected Constable of the Raleigh District.

#### THE RALEIGH ROUTE.

The New Orleans Picayune remarks, that the " people of Charleston are exceedingly indignant at he change in the mail route, if their newspapers rightly interpret their feelings. We can only say that we yesterday received our Northern and Eastern mails, in precisely the same time that we did before the change was made, and as 'the dangers of the sea' are now avoided, we hope to have a regular mail henceforth in as good time as ever."

## THOMAS W. DORR.

The Legislature of the State of Rhode Island, on Friday last, passed an act for the liberation from confinement of Thomas W. Dorr, on condition that he should take the oath of allegiance to the State before its Supreme Court.

By the way, the Legislature of New Hampshire lately adopted Resolutions relative to Dorr's imprisonment, and sent a copy to Rhode Island. The Rhode Island Legislature ordered the Secretary to return them to New Hampshire, with a Resolution declaring, "That said Resolutions, marked as they are by the grossest falschood, ignoratice and impertinence, are at once disgraceful to the Legislature of New Hampshire, and insulting to the Governor and People of Rhade Island." Pretty strong that.

#### JUGS.

The jug is the most singular utensil; a pail, two bler, or decanter may be raised, and you may satisfy yourself by optical proof that the thing is clean, but the jug has a little hole in the top, and the interior is all darkness. No eye penetrates it, no hand moves over the surface. You can clean it only by putting in water, shaking it up and pouring it out If the water comes clean, you judge you have succeeded in purifying the jug, and vice versa. Hence the jug is like the human heart. No mortal eye can look into its recesses, but you can judge of its
