NEVER LOOK SAD.

BY T. H. BAYLEY. Never look sad—nothing's so bad As getting familiar with sorrow; Treat him to-day in a cavalier way, And he'll seek other quarters to-morrow.

Long you'd not weep, would you but peep At the bright side of every trial; Fortune, you'll find, is often most kind, When chilling your hopes with denial.

Let the sad day carry away Its own little burdens of sorrow Or you may miss half of the bliss That comes in the lap of to-morrow

When hope is wreck'd, pause and reflect, If error occasioned your sadness; If it be so, hereafter you'll know How to steer to the harbor of gladness

LIFE! LIFE!! LIFE!!!

"All that a man hath will he give for his life," so we find recorded in the most ancient and best of books, but as we see thousands dying around us with Consumption, Croup, Cough, Asthma, Bronchitis, Spitting Blood, and other Pulmonary affections, we are led to doubt the correctness of the above assertion, especially since it is so well known that a certain remedy may be obtained, which always arrests those

Dr. JAYNE'S EXPECTORANT never fails to give relief, and cures after every other means have failed. This can be and has been proved in thousands of instances, where it has effected radical cures after the patient had been given up by all his friends and physicians.

From the Norridgework (Me.) Journal. We publish the following, as among the many evdences which we are constantly receiving of the increasing popularity of Dr. Javne's Expectorant, We have no interest in "puffing" it-any further than we have a desire to promote the health and happiness of our fellow-creatures, who are wasting away with those complaints, for which this medicine is an absolute remedy. And in calling the attention of the public to it, we feel that we are in the faithful discharge of our duty :

NEW PORTLAND, Nov. 4, 1842. Mr. PRATT-Sir: I wish you to send me 3 bottles x weeks, notifying the said Elizabeth Taney of Jayne's Expectorant, and in this connection, would say, that I deem it an invaluable medicine, and an article that no family should be without for a sin and have always found it a quick and efficient remedy for tightness of the lungs, produced by long protracted colds, which produce the short backing cough. the premonitor of Consumption, in which it so frequently terminates in this climate. If properly and seasonably administered, it will effectually break up the most violent colds, and thereby prevent the many violent fevers, so frequently consequent upon them would most cheerfully recommend this medicine to the public in all cases of that nature, as invaluable, JOHN H. WEBSTER.

Jayne's Expectorant .- This is undoubtedly the most valuable, (as it is decidedly the most popular) medicine of its kind, ever introduced in this State,-The demand for it has been constant and increasing from the time it was first offered for sale here to the present time; numerous testimonials of its real worth and usefulness, from very many of our citizens, might be produced, but a trial will satisfy all, that it is a speedy cure for Coughs, Colds, Influenza, Asthma, Hoarseness, Spitting of Blood, and all kinds of Pulmonary Affections, -- Bangor (Me.) Shucks. TO THE PLANTERS AND MIL-LERS OF NORTH CAROLINA.

HE undersigned has obtained Letters Patent to enable common Mill stones (or rocks) now n use, to grind CORN. COB and SHUCK. into meal, for Horses, Mules, Cattle Hogs, &c. thereby saving more than one third of a crop, which is an important item with planters. The machinery used for the above purpose is simple and durable, and cannot, with fair means, get out of order. It will last as long as the Stones last, with an expense of 50 cents every five years. To enable the common Mill Stones to grind ear corn into meal, requires no new buildings or extra power. It can also be applied to Horse Mills, Treshing Machines, Gins or any given power known. The same Mill will grind one-third more of Corn meal by the introduction of this Machinery, and can be changed from grinding Corn and Cob, to grinding Corn Meal in the space of thirty seconds .-Corn alone, when fed to stock, is said to be by the most practical and scientific Planters, constipating in its offects, producing founders, cholics and various other maladies which are incident to stock. Grinding cohe with the Corn, makes a food congenial with their nature, and cannot produce any of the serious results above mentioned. Stock, when fed on Corn exclusively, are deprived of the benefits of distension (so necessary to the proper health of animals,) b heir being unable to eat a sufficient bulk to produce distension before the animal becomes gorged. Cobs ground with the corn, produce this necessary distension, without any danger of diseases arising from overeating. Corn and cob meal is improved by scalding, and still more by boiling, and yet more by a partial fermentation. All the preparations facilitate ligestion for Hogs. But Horses and Mules will not eat fermented food, consequently they will require it dry or partially wet with cold water Horses, Mules and Oxen, when fed with unground food, void much in an undigested state, which is of course lost for all beneficia purposes .-- (7) Read the subjoined cer-

WM. F. COLLINS. Raleigh, Feb. 20, 1845. CERTIFICATE.

Having been solicited by Maj. Collins to have my Mill adjusted to grind Corn in the Ear and Shuck, I consented that he should do so as an experiment ; and am able to say that it grinds Corn in the Shuck at the rate of 30 bushels per hour; and the dressing of the stones is so improved, that it grinds shelled Corn more than twice as fast as before, and by my watch, at the rate of 15 bushels per hour, and the meal finer than usual. I deem it a valuable improvement, and shall purchase the right to use it, as it will afford me a speedy way of feeding my horses and cattle, and save much thereby.
