Together with a complete assortment of Tailors' Trimmings, embracing a few yards of Red Padding, Cassias Gotten-Wadding and Spool Cotton, (and by way of making up the assortment, a few papers of Needles) which we can sell at Wholesale and Retail.

The above Goods were not bought altogether for cash, therefore we want to sell them as quick as possible, and to make it an inducement for customers to purchase, will do now what we have done for two years—sell cheap, and that without compulsion. We spent quite as much time in New York as any body in our line—we think we bought our Goods as cheap, at all events, we hazard nothing in saying we will sell as cheap, and that is all the customer cares for at all times. Recollect that Oliver & Procter reduced the price to what they now are. If you get your clothing cheaper, you are indebted to them for it. Without disparaging others, we think we can supply a suit equal in all respects to any House in the United States, and at as cheap a rate—quality of the goods considered. We avail ourselves of the present opportunity to return our sincere acknowledgments to our numerous friends and customers, for the patronage uniformly received by us since our commencement in business. Their kindness has greatly exceeded our merit, but we trust, by strictly attending to our business, and endeavoring promptly to fulfill our engagements, to have its continuance.

We receive every two weeks, through our New York correspondents, the latest Paris, London, and New York Fashions. Persons furnishing their own goods, will have them made up with the same neatness and despatch as though we supplied the article entire. Orders from a distance thankfully received and promptly attended to.

SAVE YOUR CORN COBS AND SHUCKS.

TO THE PLANTERS AND MILLERS OF N. CAROLINA
THE undersigned has obtained Letters Patent for enabling common Mill Stones (or rocks) now in use, to grind CORN, COB and SHUCK, into meal for Horses, Mules, Cattle Hogs, &c. thereby saving more than one third of a crop, which is an important item with planters. This machinery used for the above purpose is simple and durable, and cannot, with fair means, get out of order. It will last as long as the Stones last, with an expense of 50 cents every five years. To enable the common Mill Stones to grind ear corn into meal, requires no new buildings or extra power. It can also be applied to Horse Mills, Treshing Machines, Gins or any given power known. The same Mill will grind one third more of Corn meal by the introduction of this Machinery, and can be changed from grinding Corn and Cob, to grinding Corn Meal in the space of thirty seconds. Corn alone, when fed to stock, is said to be by the most practical and scientific Planters, constituting in its effects, producing founders, cholics and various other maladies which are incident to stock. Grinding cobs with the Corn, makes a food congenial with their nature, and cannot produce any of the serious results above mentioned. Stock, when fed on Corn exclusively, are deprived of the benefits of distension (so necessary to the proper health of animals,) by their being unable to eat a sufficient bulk to produce distension before the animal becomes gorged. Cobs ground with the corn, produce this necessary distension, without any danger of disease arising from overeating. Corn and cob meal is improved by scalding, and still more by boiling, and yet more by a partial fermentation. All the preparations facilitate digestion for Hogs. But Horses and Mules will eat fermented food, consequently they will require it dry or partially wet with cold water. Horses, Mules and Oxen, when fed with unground food, void much in an undigested state, which is of course lost for all beneficial purposes.—*Read the subjoined certificate.*
The undersigned can be addressed at Raleigh, and all calls will be attended to punctually and with despatch by himself or Agent
WM. F. COLLINS.
Raleigh, Feb. 20, 1845. 16-1/2

CERTIFICATES.

Having been solicited by Maj Collins to have my Mill adjusted to grind Corn in the Ear and Shuck, I consented that he should do so as an experiment; and I am able to say that it grinds Corn in the Shuck at the rate of 30 bushels per hour; and the dressing of the stones is so improved, that it grinds shelled Corn twice as fast as before, and by my watch, at the rate of 15 bushels per hour, and the meal finer than usual. I deem it a valuable improvement, and shall purchase the right to use it, as it will afford a speedy way of feeding my horses and cattle, and save much thereby.

MR. GALES: SIR—

In order to remove Public prejudice (which appears to prevail in this section of the country against all Patent Rights) so far as my statement will go in giving the advantage which I have derived in having Major Collins' Patent Right for grinding Corn-Cob and Shuck, attached or applied to my First Mill, I state, that my Mill since this improvement was attached, grinds not only as good Meal as before, but gives the meal finer, and grinds up the Corn, Cob and Shuck, into Meal sufficiently fine to mix with other rough food for Stock. My Mill ground very slow before this improvement was made, but now grinds fine Meal at the rate of six bushels per hour.

I make this statement, as well for the benefit of the Public, as to do justice to Knowlton's Patent (now owned by Major Collins).
