SAVE YOUR CORN COBS AND SHUCKS. TO THE PLANTERS AND MILLERS OF N CAROLINA

2 HE undersigned has obtained Letters Patent to enable common Mill stones (or rocks) now in use, to grind CORN, COB and SHUCK, into meal, for Horses, Mules, Cattle Hogs, &c. thereby saving more than one third of a crop, which is an important item with planters. The machinery us d for the above purpose is simple and durable, and cannot, with fair means, get out of order. It will last as long as the Stones last, with an expense of 50 cents every five years. To enable the common Mill Stones to grind ear corn into meal, requires no new buildings or extra power It can also be applied to Horse Mills, Treshing Machines, Gins or any given power known. The same Mill will grind one third more of Corn meal by the introduction of this Machinery, and can be changed from grinding Corn and Cob, to grinding Corn Mesl in the space of thirty seconds -Corn alone, when fed to stock, is said to be by the most practical and scientific Planters, constipating in its effects, producing founders, chotics and various other maladies which are incident to stock. Grinding cols with the Corn, makes a food congenial with their nature, and cannot produce any of the serious results above mentioned. Stock, when fed on Corn exclusively, are deprived of the benefits of distension (so necessary to the proper health of animals,) by their being unable to eat a sufficient bulk to produce distension before the animal becomes gorged. Cobs ground with the corn, produce this necessary distension, without any danger of diseases arising from overeating. Corn and cob meal is improved by Brushes; Whips, Fishing Utensils. Night Tapers, scalding, and still more by boiling, and yet more by a Smoking Pipes, Slates, Shoe-thread, Awls, Sifters, partial fermentation. All the preparations facilitate Cotton and Wool cards, Coffee-mills, plain and digestion for Hogs. But Horses and Mules will not painted Mugs, Lamps and Lamp wicks, Waiters, eat fermented food consequently they will require it dry or partially wet with cold water Horses, Mules Bridle-bits, Tacks. and Oxen, when fed with unground food, void much | FRESH CONFECTIONARY & GROCERIES in an undigerted state, which is of course lost for all beneficia purposes .-- T Kead the subjoined cer-

tificate. The undersigned can be addressed at Raleigh. and all calls will be attended to punctually and with despatch by himself or Agent WM. F. COLLINS.

Raleigh, Feb. 20, 1845.

CERTIFICATES. Mill adjusted to grind Corn in the Ear and Shuck, I small Wax for lanterns. consented that he should do so as an experiment; and CHEESE, Pine Apple and common. I am able to say that it grinds Corn in the Shuck at the rate of 30 bushels per hour; and the dressing of the stones is so improved, that it grinds shelled Corn more than twice as fast as before, and by my watch, at the rate of 15 bushels per nour, and the meal finer than usual. I deem it a valuable improvement, and shall purchase the right to use it, as it will afford me a sperdy way of feeding my horses and cattle, and Boots. save much thereby.

WM. BOYLAN. R. GALES: SIR-In order to remove PORTER.
Public prejudice (which appears to prevail in this section of the country against all Patent Rights) so far as my statement will go in giving the advantage which I have derived in having Major COLLINS' l'aient Right for grinding Corn, Cob and Shuck, attached or applied to my Grist Mill, I state, that my Mill, since this improvement was attached, grinds not only as good Meal as before, but FIVE TIMES FASTER, and grinds up the Corn, Cob and Shuck, into Meal sufficiently fine to mix with other rough food for Stock. My Mill ground very slow before this improvement was made, but now grinds fine Meal at

the rate of six bushels per hour. I make this statement, as well for the benefit of the Public, as to do justice to Knowlton's Patent (now wned by Major Collins.)
