"Let us not be content with merely electing the Nominee let his majority be such, that it will vin-dicate before the whole people the Convention and the usages of the party, and at the same time give a lasting rebuke to those who are attempting, for selfish purposes, to distract and divide us."

Such was the language of exhortation used by the "Standard" to the Loco Focos of the Wake District, and such its ungenerous abuse of Messrs. Ar-RINGTON and TOOLE, this political brethren,) but a brief period before the Election. And, yet, DANIEL, "the nominee," escaped with the skin of his teeth. Had not Tools been a candidate, ARRINGTON would have been elected. We do not know so much about other Counties, but many Whigs, who were absent from the Polls, and many others who voted for DANIEL, assigned to us as a reason for so doing, that with TOOLE in the field, ABRINGTON stobd no chance, and they should therefore vote for DANIEL from considerations of a personal nature, which it is useless

and unnecessary to allude to here. In a singlehanded contest, to-merrow, ARRINGTON could beat DANIEL in the District, easily. We voted, ourself, for Tools, because we like him personally, and because he is in favor of Gen. TAYLOR for the Presidency, and is sound on one principle, at least, of Whig faith, though we knew, at the time, it was a vote thrown away. We do not regret it, and would do so again, in this triangular contest.

The most amusing episode, however, to this exhortation of the "Standard," is, that, even in Edgecomb, the "land of the faithful," the independent candidates beat "the nominee" more than 200 votes! When will the "Standard" preach again ?

STATE ELECTIONS.

KENTUCKY. The last mail brings returns sufficient to indicate the result of the Congressional election in nine out of the ten Districts. In the last Congress the Kentucky delegation, stood 7 Whigs to 3 Democrats .-The following summary indicates the result : 1. Linn Boyd, D. | 7. Duncan, W. servant,

MORE LETTERS. Gen. Tarton has addressed a letter to Gen. Peter

Skan Smith, of Philadelphia, in relation to his being a candidate of the Native American party. The letter is dated July 6th. He says :

"Upon the points alluded to in those remarks, and to which members of the Native American pary require assent from those whom they favor for the Presidency, I can only say with all candor, that if elected to that office, it must be by the spontaneous will of the people at large, and without ageney or pledge on my part in any particular. If I ever fill that high office; it must be untrammelled with party obligations or interests of any kind, and under none but those which the Constitution bid the high interests of the notion at large most seriously and solemnly demand.

"I do not desire the Presidency, and only yield thus far my assent, to be considered a candidate in the same proportion in which it is desired by the people, irrespective of party."

In relation to a set of Resolutions adopted in May last, by a meeting of the Whigs in Nottingham district, Prince George's county, Md., approving of his course in conducting the War with Mexico, and at the same time nominating him for the Presidency in 1848, Gen. Taylor sends the following letter:

UPS AND DOWNS.

At the period when Lopofocoism was glorifying the Tariff of '46 for its astonishing results, its blessing and benefits to the farmers, as exemplified in the high price of flour; when Editors of that persussion thought not of foreign famine, short crop &c., but attributed to the Tariff concocted by Walker and approved by the ministers of Victoria, the tremendous rise in breadstuffs, the following from the Boston Transcript had exceedingly marvelous favor in the eyes of Locofocuism :

RISING

A "learned pundit" of our acquaintance, assures that the only way of rising in the world at the present time is to get astride of a barrel of flour, and

go up with it. N. B. No yeast is required. Sir Isaac Newton was led to the contemplation of gravity by the fall of an apple-and there has doubt. less as much gravity been suggested by the fall of flour. We hope, therefore, the Loco sophists will tell how and why it is under the Tariff of '46, that something more than yeast is required to prevent flour from falling heavily .- Philudelphin American:

THE NEXT PRESIDENTIAL CONTEST. It is not generally remembered, that the next Presidential contest comes off throughout the Union on the same day. Consequently the wire-pullers, and National Conventionists, will have no opportunity to trade votes, hedge on bets and the like transactions as has been the case heretofore. New York will have to go into the contest without knowing how Pennsylvania has voted. It will therefore be seen that the people of the United States will all be busy at once like so many bees in a bee hive, voting for Gen. Taylor, and the telegraphic reports of his victories will be made along the wires in perfect thunder-claps. All the lines will be engaged to carry off the enthusiasm. "
