From the Baltimore Federal Republican. WAR WITH ENGLAND.

The democrats, both in and out of Congress, hold up the idea of an immediate wer with England. It would be the part o wise men (but our rulers unfortunately ar not wise) to look at the consequences which will necessarily result from such a measure, before they adopt it; to exanine the situation of our country, and ask whether we are fully prepared to enter into contest with the first naval, and the scand military power in the world? And What must be the inevitable consequences of engagin g in a war unprepared for the conflict? As our rulers do not choose to ask themselves these questions, let us besow a few moments in examining them. It should be recollected that this contest will not only be a war of offence, but of defence. Are we then prepared for either? "We will take Canada," exclaim the worde champions of the South; "the British provinces must surely fall before us;" the militia of New England will alone be tqual to this." Are these warriors, "so with the standard acquainted with the stuation of Canada, or the force that will e necessary for thking it?-We presume ley know less than nothing of either. hev must then be told that the capital of s country, the city of Quebec, is the frond strongest place in the British dominions, perhaps in the world; it is aptly called by military men, "the Gibraltar of America;" and that a place so fortified never was, and never will be taken by an army of militia. Though

A multitude like which the populous north, Pouthe Danaw"—

withstand. Yet this place, with compara- with her eight hundred ships of war she welv a small force, smaller by far than can afford convoy for it all.

been if we had had men of common sense of 11 years, have systematically rendered and common honesty at the head of our their country weak and defenceless. Their affairs, fully drawn forth and ably direc- eyes will be opened; and they will see ted, would not have been adequate to the with an indignation equal to their former taking of Quebec. But then in addition fondness, the folly and wickedness of those to a well appointed, well disciplined army, who have " usurped their applause and a strong naval force must have invested it. | confidence-to betray them." -who have But what will there now be to prevent G. | conducted their country from a state of un-Britain, at her pleasure, from throwing exampled prosperty and glory to disgrace in supplies sufficient to bid defiance to any and ruin. Their confidence, so long a assailing force? Will the redoubtable gun- bused, will be forever withdrawn from boats, or Fulton's torpedoes be sent to men, who are at once the shame and curse scare away the British navy !- But the of their country. The discarded friends subject is too serious for ridicule. Though and disciples of Washington, who now in reviewing the conduct of our rulers, we nurse their grief and their despair, will aexperience very much the same succession gain be called to the councils of their of sensations which Burke observes was fountry. A new era will commence, and telt in viewing the tragi-comic scene of the an age of prosperity and glory will succeed French revolution-" Alternate contempt | years of disgrace and calamity. and indignation; alternate scorn and horror alternate laughter and tears"-In animadverting upon the felly of their measures, it is hard to be serious; in reflect ing upon the direful consequences which have resulted and will result to our country from them, it is hard to repress our indignation-we will, however, strive to repress both, as far as possible, and discuss the subject before us with due gravity and temperance. We say then we shall have no haval force to invest this place by water, and prevent England from throwing in supplies of all kinds .- We shall not have a well appointed regular army; and with the present men at the head of our government, and Wilkinson at the head of our army, our resources will not be fully called and ably directed. What then are we to look for from such an attempt but disaster and disgrace? So much for the war as it will be offen-

sive. And our rulers seem to forget that it will be any thing else. They calculate that English statesmen are as weak and incapable as themselves: and that like us England will become pliant and maleable under our blows. But this will not be the case. When she sees preparations making by us to invade her territory, the spirit of the nation will be aroused. The meanest mechanic that walks the streets of London, will, to use the language of Queen Elizabeth, when her dominions were threatened with invasion by the Grand Armada, resent "the foul scorne" that the Americans should dare to invade their provinces . The Americans whom they have seen take blows and buffets, not only tamely, but thankfully, from France. The old English spirit—that spirit which our ever renowned forefathers possessed-which sometimes slumbers, will be awakened .-She will arouse herself like the Lion, when wounded by the hunter, "who grows tenfold more fierce by gazing on his wounds." She will not be passive. Her indignation will burst in thunder on our defenceless, devoted cities - And what will protect them? The navy which Washington recommended, and the federal administration began? Alas! it has given place to gun-boats. Our militia, which some wordy warriors rely upon as our defence? A militia may make a very handsome parade through our cities on a fair day, but they cannot protect these cities against English seventyfours. Our cities then from Georgia to Maine, will be given up an unresisting prey. And what will remain to keep up the spirits of our people !-- Fighting battles, and gaining victories might create a military ardor which would make us insensible to the calamities of war. But England will not land armies on our coast and fight hattles with us. She will leave us to brood over our miseries, and to fe al at our leisure the Messings of the war which our wise rulers had plunged us into, without ever thinking of the necessary preparetions. But even if in mercy she should not bombard our towns, but content herself with sweeping every American sail from the ocean, and blockading all our ports, this would bring on a scene of distress hardly to be described. The ruin of our merchants, our insurance offices, and tion. our banks; would create a general calami-A militia may fight a battle, but they ty through the country. We should reconnot carry on a seige : it requires regu | ceive no foreign supplies, not even by priar troops, engineers, and all the skill and vateers; for none would be permitted to science of war. Even all this was found in- go out of our harbors; and even if they sufficient to take Gibraltar, though attack- were to get out, they would find no prey. by the combined power of France and A twenty years war has taught the Eng-Spain; with mighty preparations by land lish merchants to carry on their commerce sea, which it was thought nothing could in strong built armed vessels; and besides

LUCIUS.

GAG LAW.

Mr. Nelson's amendment to the arbitrary and unconstitutional rule denomina ted " Previous Question" has been rejected, so that the Gag-Law is again rivetted upon the minority. Mr. Nelson, though a flaming Virginia democrat, declared the majority had as much right to turn the minority out of doors, as to deprive them of the privilege of debate. True! and any man who would submit to the one would patiently endure the other. Expulsion is infinitely preferable to a seat in a representative body where the tyrannical and over bearing many enforce dumb tegislation up on the few. How would a Chatham have acted had such a rule been enforced in the British house of Lords or Commons? He would not have contented himself with big words and harmless flashes of light from his piercing eye, he would have vacated his seat, turned out among the people and roused them in defence of the constitution and parliamentary freedom; he would have sacrificed his life rather than submit-

to an exercise of the most odious tyranny. The refusal to expunge this rule conveys to our minds proof perfectly satisfactory; that the partizans of France have no other object in view than to enforce the non importation law at the close of the session. I has rule is kept in reserve for the detestable and diabolic purposes which Galla tin has dared to recommend to congress. England, but enforce the continental sys tem by the aid of douaniers, custom house spies, and informers invested with powers to seize persone, break open houses and search for papers and property, which we do most religiously believe is their sole object, the nation is undone, unless the people rise in their majesty, and crush the authors of this infamous continental system. tion in preference to a continuance of the system of commercial restraints. But when they find out, as they will ere many months have passed, that all the bluster about war is to prepare the people for submission to the " Napoleon system," they deserve to be enslaved if they submit to such domestic tyranny. The object is to bully & frighten England if possible, into a relinquishment of her system-that failing as it will do, then a more active war is to be commenced against ourselves, and all the noise we have heard about war, will sink into a forcing act. The majority prevotes given by the federalists, who will by application to ensure the country against a revolution? Twenty five thousand regulars may be expected to keep the people quiet; but they cannot be raised, and if they could, the appearance of an armed force in the northern states would more certainly produce rebellion, and ultimately a complete revolution. The restrictive system must be got rid of, let what may be the consequence. A hundred years war would be preferable to the annihilation of commerce, which we believe to be the object of the administra-
