THE WILMINGTON POST

WILMINGTON, N. C., NOVEMBER 28, 1869.

The Republican Party in this State. Organized under peculiar difficulties, the Bepublican party in North Carolina has made a record of which we may well be proud. From such elements as they had at hand, our leaders have built up an organization perfect in its unity, and strong in it cohesive power-not of the public spoilsbut of patriotic love of liberty and the government once more established over revolted and revolutionized communities. Much was done hastily, and some improvements, and amendments may yet be added to the fabric of reconstruction, but none will deny who may have examined the work of the leading minds of our State Convention; probity; devotion to principle, and a worthy ambition to build high the laws so as to deserve well of posterity.

To tew is it given to engraph upon a State Constitution, the ideas that may have been the cherished views-perhaps "visions"-of a life time. The revolution through which we have passed has brought to the surface—as indeed do all revolutions-powerful intellects that might otherwise have never been noticed amid "the press of men." The present Senators, and State executive are among these men, and so all the way down from our State representatives, whether in the National or State Legislature, to the veriest justice of the peace; the candid observer will observe ABILITY, brought to the surface by revolution, and of such material was our first government composed when the Federal constitution was first adopted. More finely educated gentlemen possibly exist than some elevated to office by Republican suffrages, yet if the intelligent American will but turn back to the first State and Federal officers elected, he will see that a great advance has been made. Many illiterate patriots carned a name for ability and devotion to the Republic in 1776 and 1789, and many others did in 1866, and are doing the same in 1869. We fear not the future. Our party record will shine with the centuries. Brighter by contrast with our enemies, the State will be purified of small imperfec tions-but too visible to us-and only the magnificent work they have erected as a monument remain for the admiration of

Republican we fully comprehend, and we this State, that not surer than the life of of the Republican party. Some small year ending June, 1867, was as follows: souls have obtained an entrance into our party fold. Some ignorant asses still bray their discordant notes of "a new party," but the majority are determined to hang together, and come weal or woe will fight the Great Leader calls on us to store

arms in the camping ground of eternity. The late rumors of a "divided house" are like the manufacturers of the same, "falser than hell," and we to-day can assure our readers that all the material worth keeping has been re-cemented by late proceedings in Raleigh. We speak by the card.. We were there! However copperhead cotemporaries may whine, we know that entire accord exists among our party leaders, and no feelings of personal aggrandizement or of ambition will be permitted to divide the party or give strength to our enemies. We have reason to thank the violence of the party of treason for much of our strength. We will always remember with feelings of gratitude the good God who made "the violence" of democratic-"man" to serve our purpose so well. We were fearful of a too tender conscience on the part of some of our weaker brethren causing the said "weaker" to resolve not to continue the session of the legislature, notwithstanding the design of the framers of the constitution provided for just such a contingency as we have noticed. It was expected that would demand a long session of the legislature; the violence and bloodshed of Ku Klux demon-crats proves the wisdom of the framers of our law. All know a part of this State has been placed under martial law. and the madness of our insane opponents continues to excite apprehension of all good citizens that military rule must be continued Let us suppose a new election ordered, and the bad passions of bad men stimulated by ambition and bad whiskey! God alone knows how much of human life and property would be sacrificed before the military power could be sent by the general government to assist the Governor in restoring peace. To those demoniac wretches who have been praying for some convulsion by which themselves and friends may obtain position we can give but this cold comfort You are marked, and your first attempt at disturbance will lead to a speedy elevation through the efforts of the hangman and a just judiciary. It is much better that the Sate should live though her traitor sons should die. Let demon-crats remember the six months ending October 31, 1869, as that Governor Holden is no "Audy Johnson," and is neither to be wheedled or ing the same months of the preceeding scared. He intends to see this State firmly year, viz : In the Fourth district the amount established in prosperity before he permits collected in 1868 was \$18,274.16; in 1869, another election, and all the people say \$143,870. In the Fifth district for 1868.

One of the great achievements of the age, and second, probably, in cost and commercial importance, only to our trans-continental railway, is the Suez Canal, which connects the Red Sca with the Mediterraneau, the ceremony of opening which is just now exciting enthusiasm with all the crowned heads of Europe. This canal is one hundred miles long, without locks or other artificial appliances, and is open to all the world on uniform terms. Its surface width is three hundred and twenty-eight fect, its God. bottom width two hundred and forty-six, and its depth twenty-six feet. Few vessels now draw more than twenty-two feet. The canal had cost up to June last \$55,000,000. The rates that have been fixed upon the managers of the canal for all vessels, equally, passing through its waters, amount to \$2,300 in gold for an ordinary Indianman.

To a French civil engineer and to France belong the credit of its execution. It has already given a wonderful interest to trade questions, and an impetus to population on the Isthmus, almost unknown in the old world. Within the last twenty years it has increased from one hundred and fifty souls to fifty thousand. THE Journal Clerk of the House of Representatives has just prepared a roll of all the members of the Forty-First Congress who have taken the oath of office. This list embraces exactly 200 names, and does not include the name of Covode nor of the contestant, Foster, and all cases of like nature held for determination are not embraced in the list. The eight members clected from Virginia will not be sworn in, if at all, until the State is admitted. Alabama furnishes six members, but they have not yet taken the oath. Sheldon, of Louisiana, is the only member yet entitled to his seat from that State out of the five districts. Texas, if sels which shall bring from Europe to our admitted, will furnish four members, and shores any persons desiring to make their Mississippi five, and when the case of Georgia is finally decided seven Representatives will be furnished by that State, so that the roll will show a list of about 236 members when all the States are admitted, which it is believed will be done before the adjournment of the coming session. Five members named Smith have already taken the oath, and it is uncertain how many more may be added when the absent members are admitthe peace and good order of the State ted. > THE "brotherly love" cherished by democratic senators had a fine illustration in the punching administered by Senator Love to his lovely brother from Orange. It seems the puffy reprentations of the rights and dignities of the Grahams determined to form as may be. Next, the proportionate speak in proportion to his own estimate of his own transcendent merits; so overlooking even the wants or ideas of his fellow democrats he "poached on the preserves" of Dr. Love; whereas the irate Doctor, according to the Standard not caring a continental-that Mr. G. is the son of his father pitched into Mr. G. with a speech which made that infant orator squirm lib. 4

THE cloquent reply of President Grant to sermon of the late George Peabody on the the new Minister from the Republic of Havti, General Tate, on Monday last, was a fitments for the obsequies are being made in ting response to the glowing words with which the latter presented his credentials.

We print the vote for Door Keeper of the | ab House giving names of the Republicans voting to sustain a caucus nomination, and those voting against the same. The time guard has gone by, when any mis-representative of a Republican constituency can bolt from his party nominations with impunity. The intelligence of the masses of our party never forgive traitors and bolters. And dodgers of caucus nominations are in fact exactly what we call them, "TRAITORS!" Treasson to constituents is as base as treason to

ONE of our first merchants assures us that the city of Wilmington obtained in direct trade during the Fair week fully ONE HUNDRED THOUSAND DOLLARS! Now who should say after this that enterprise and activity does not pay even in this slow, old the 17th day of December, 1869, at 12 o'clock, fashioned. "Cape Fear" region? Raleigh is M., in front of the City Hall, the following detivity does not pay even in this slow, old seeking to attract custom by building large scribed property situated in this city unless the tax and expenses due on said property are paid: stores and lowering prices so that farmers are tempted to town to purchase. They ADVERTISE freely! Merchants are known by their advertisements.

TEE President will soon appoint a Justice to the Supreme Court in the place of Justice Wayne, of Georgia, recently deceasin the trade of the world are expected as ed. > WE have received the report of the State Superintendent of Insane Asylum at Raleigh. We are pleased to see that the patients are usefully employed, and that much clothing and seems chousand dollars worth of products were raised at the institutions. Dr. Grissom seems to clearly under stand his duties toward his unfortunate wards, and treats them with rare kindness and attention.

EDWARD T. PETERS, Esq., of Washing ton, writes a most encouraging letter from Chattanooga, giving an account of the suc cess of free labor in the South. Mr. Peter replies to the slanders of the unreconstruct ed by giving statements of prominent Rai Road builders in Alabama and Georgia, to Betts, Isaac...... 309 " 3 Cox, Screna, heirs,... 58 " 1 the effect that no more willing or efficient laborers exist than the freed people when fairly paid and well treated.

THAT cleverest among our living American female writers: Mary Clemmer Ames, commendes a new story in Putnam's Monthly for January. We bespeak for "Woman's Shepard, A J, Guard 186" 1 Right" numerous readers, for the title of Mrs. Ames' new story is no less "distinguished" than the ability of the author to write on all matters pertaining to her sex; pleasantly; powerfully and well. Exports. Imports.

> Executive of our sister State of Carolina, we must give the "South" State credit for surpassing us in financial management. It is to be hoped that Governor Holden's views of finance will be endorsed by the Legislature, and they will observe "rigid economy in the public expenditures.

THE Mackey family in Charleston seem to get that which they desire-a cheap notoricty by constantly publishing "cards" and attacks upon other Republicans who may be in or out of office. The said Mackey family believe should be under the control of the aforementioned M. F.

A CALIFORNIAN calls on Congress to appropriate \$20,000,000 a year for five years for the employment of suitable steam veshomes in the United States.

Ir is suggested that in a State Labor Convention the following wants be attend-

for ten dollars; a month may be sure of getting that ten dollars; a system under which the laborer who works land one-third, or any greater share the crop, may be sure of getting that full share in a fair division; a sysland will pay a fair price and be sure of having the crop when he has raised it. To devise such a system, for farm labor, is the most vitally and peculiarly important duty WISE'S NEW RIVER OYSTERS.

The first step in this matter is to discuss and agree upon a rate of wages, and make the rates for full hands as nearly uniform as possible, for each neighborhood. The form of centracts also should be as nearly unishare of the crop to be asked for labor should be considered carefully-and the circumstances made as nearly uniform as possible. Then the fair price per acre for the rent of land, should be fixed according to the grade of lands. Perhaps this can hardly be done but it is worth a rates, the Having fixed upon should ask the Gen-State Laboraty to enact laws fixing these several rates as those by which cases arising under fraud or lost contract shall be settled. This will tend to give stability and uniform-

It is also suggested that a sort of intermediate or special Court be created in each county, to adjudicate just these cases, to seeure mutual justice and fair play between planter and laborer, and to protect the laborer from the downright fleecing which is, to a greater or less degree, practiced in every community.

THE editor of the Charleston Republican thus disposes of a "chivalry :"

The editor of the Republican yesterday met the editor of the News on the street in Columbia. He nodded and said "good morning." The News editor turned, and with a violent gesture, screamed out at the top of his cracked voice, "Never dars address a word to me again, you villian. look upon you, sir, as a damned Yankee scoundrel. De you hear-you dog? Never speak to me, you miserable scoundrel." To which the editor of the Republican 16plied quietly, "Very well," smiled at the
