COALITION IN THE SOUTH Experience has demonstrated the power of coalition in the south. It in this way more than any other that the issues and prejudices engendered between the sections by the war will be obliterated and put beyond the reach of possible future recall. Those who wish well for the country; those who are interested in its future prosperity, look to see the day that the memory of the war and its prejudices and bickerings will be at an end and these United

States will stand united in sentiment and feeling as they are in name, in one harmonious union. To bring about this state of things should be the aim of every well wisher of the nation. The gradual allying with the Republicar party of liberal men throughout the south will serve to weaken and eventually to break down the opposition to the Republican measures of peace and conciliation between the sections and bring about that condition of internal which is so much to be hoped only obstacle in the way or epoch in our country' is the southern Bourbons, that disturbing element wa there would be interna peace. In the north there is found peace in the east there is peace, in west there is peace. It is reserved for the south to continue to be the section of turmoil, race disturbances, bulldozed elections, intimidation and bloodshed, and all this is the work of the southern bourbon. For almost a century he has waged a continual war against liberality, toleration, freedom and free suffrage. Continually apeing the manners of his ancestral party in France, claiming without any color of title either by descent or purchase superiority over his surrounding fellow-citizens. Waging the war of obstruction to every thought, idea and movement of a liberal or humane character, and keeping the southern section deprived of the capital, labor and enterprise so essential to its development. This is the result of the acts and prejudices of the southern bourbon. But the southern bourbon knows howlto flee from the force of numbers: he likes his ease too much and his training has been such as to dcprive him of any desire for considerable effort to obtain any particular end. Hence it is he will flee before either strong enemies of work, and he can therefore best be silenced by the force of enemies and the gradual steady work of energetic opponents. There are thousands of men in the south who vote with him that do not believe in him, that have no heart or sympathy in his principles. Thousands that believe in a Der cracy that has its fundamental starting point in the established principle of an indissoluble union of states, but that have no stomach for the destructive freezing out policy of the southern bourbons. These belong in a coalition, and it is by coalition that their votes and sympathy can be secured for the national policy of the Republican party. The want of coalition leaves them with nowhere to go, and deprives them of concert and union, which weakens them and in many instances makes them half-hearted supporters of bourbon methods, simply for peace and security. These men should by coalition, and some concessions to their views, so far as the state is concerned, be secured for the general principles advocated and maintained by the Republican party. The result would be a weakening of the opposition to the Republican party in the south; would be a weakening of the bourbon strength; would cause a gradual wiping out of ideas, prejudices and feelings that deprive the south of a national character, and give it the sameness of the little manor or province of a Spanish grandee. would be a breaking down of the barriers of intolerance and proscription that shut the south out from compe-

This is always the policy of those lea who try to palm off the spurious and seeking base upon the credulous.

The scheme of the sharper, the swindler and the counterfeiter is always to make his victim believe that the sham or the counterfeit offered him is essentially the same as the genuine article he desires. Satan is forever trying to delude his dupes into the belief that there is no real substantial difference between virtue and vice-between honor and dishonor.

But there is all the difference in the world between Republicanism and De mocracy. The lines of demarcation between them are deep and broad as a chasm. There is no excuse for any man putting them on the same level.

This need not refer to the principles advocated by either party. Professions of morality, decency, and elevated sentiments are just as cheap and easy for a party as for an individual, and count for as little when not accompanied by corresponding acts.

The Democratic party has rarely lacked a sufficiency of fine phrases and patriotic sentiments. Especially is this true when seeking votes. When confideut of its hold on power, however, it drops the tiresome mask of hypocrisy, and reveals its sinister nature with brutal frankness.

Nor can the occasional nomination of a good man change the nature of the party. The best man in the Nation at the head of its ticket-tickets in every state and county in the country composed of exemplary men. -can no more altar its nature than the Ethiopian can change his skin or the leopard his spots.

The reason lies much deeper than a mere difference between two classes of men who look at questions from different points of view.

The two parties represent the workings of long years of the principle of natural selection in politics.

Ever since its formation the Democratic party has drummed up its recruits among those who prefer hate and injustice to reason and humanity-who incline to dark ways and sinister meth ods rather than to open and honorable dealing; who resort to prejudice instead of thought; and who love trickery and cheating better than fairness and frank-

Sixty years of industrious gathering of these into its ranks-60 years of premium-offering for every species of highbinding and Teremy Didlerism-60 since said, years of cultivation of political buncosteering and confidence-gaming, has made the Democratic party what it is what it has been, and what it always

BISMARK'S BLUNDERS.

The London Times has information that Prince Bismarck has returned to Washington the resolutions of condolence on Herr Lasker's death which recently passed the House of Representatives. We canno: conceive that this report is true. The German premier must have known that they were introduced by the Hon. Thomas P. It would be well for our people to post themselves as to what that was and what that means, before they allow themselves to be excited and deceived by the office hunters. There was, perhaps, never a more reckless, bitter and unscrupulous campaign of bulldozing and bribery carried on in any state than that by the bourbons in Virginia las. year, and its fruits have been damaging to the whole south. It was the spirit of revolution, of rule or ruinthe same spirit that characterized the secession leaders just before the late war—and the result to day is that the whole north and the right-thinking people of all sections are aroused and indignant at the violence and bloodshed which grew out of the campaign and disgraced Virginia. The blighting and evil fruits of this bitter campaign are to be seen in the fact that more than one-tenth of the great state of Virginia is not now represented in her state senate. Now in all seriousness, what is to be the outcome of such intolerance and bitterness?
