### NEGRO SUPREMACY.

Negro supremacy-that is a big word great power, no doubt, to f. ighten the timid and ignorant; but certainly no inmillions of poor, uneducated negroes, who have always been slaves, were likely to attain power and influence enough, immediately on being made free citizens, to rule the country and become supreme over the thirty millions of white people, and the wealth too in their hands. Such great republic.

At one time it was said the negroes assigned to them the second great office of the country, and that they had the with a single lot called Potter's Field, power to enforce that demand. At the large enough to hold two or three hun, same time, the most intelligent colored dred emaciated bodies. Something has Britain for words spoken and deeds done in man in the country and the very man, got to be done. Who is a going to help whom the Democrats said was to be put forward, scouted the idea as an absurd than politics, and of more importance farce. Such is the great bugaboo of ne-

gro supremney. The United States government has made the negroes free and constituted them American citizens; and if there is any power on earth that can take that which will surpass California in the privilege from them, it is more than I variety of productions. In a very short know of; and that is one of the points time that State will be yielding in super ascertained, if not before, since the great abundance wheat, wine, raisins, silk, storm has blown out. It is but proper to say, notwithstanding all that has been written and said against them, that North Who would do the hard work in the long, hot summer days, necessary to secure a crop of corn and cotton? "Oh!" says one, "we would import Icidunea said, but not so easily done. But suppose you do, will they understand the work as well as the colored people do? and will they be willing to work for the same pay and rations? "Oh! but they will do so much more?" There is some

doubt about that; besides, it will take years for them to get acclimated and acquainted with the work, so as to be available in any sense; and in order to keep them here at all, as laborers, you will have to pay those at least twice the assount of wages you now pay the negroes. Better husband your present remources.' Treat has and tariff on copper the negroes as well, encourage them to work, at least slo not let them my "we cannot get work," and make them owtented by giving them to understand they are free as other men and entitled in common with others to education. Sell them lands, when able to buy, at all events do not threaten to run them off if they do not vote your ticket, and you have for all purposes and wants of the and all things considered better than any I think it may, after all, be said, than strained common Projection of any part of the world.
