

Message of the Governor.

EXECUTIVE DEPARTMENT,

BALTIMORE, November 11, 1868.

To the Honorable, the General Assembly of
North Carolina:

GENTLEMEN:—It is proper that at your first regular session with the new Constitution, I should lay before you "Information of Affairs of the State," and recommend to your consideration such measures as may be deemed expedient.

The people of the State have reconstructed their government on the basis of the equal rights of all. The State is quiet and tranquil. There is no ground for apprehension that secession will again be attempted, or that the peace of the country will be disturbed.

The year now closing has been richly rewarded with harvests. The season has been propitious. A plentiful supply of bread has been produced for our whole population, so that want in this respect will not be felt during the coming year by any who will labor for a living. Fruits of all kinds have been gathered in abundance. The staples of cotton and tobacco are affording fair profits to those who have produced them, while from timber and naval stores a considerable portion of our people are reaping good returns, as in former years. Our commerce is increasing, our mineral resources are more in process of development. Our railroads are recovering from the impression under which they formerly labored, and promising better returns than heretofore to the State and to the stockholders, while new lines of communication are being laid out, destined to penetrate and develop the great natural resources of portions of the State heretofore untouched by the hand of improvement. The State credit has been re-established on a solid basis, thus giving promise that at no distant day the bonds of the State will command as much in the market as those of the most favored and prosperous States.

We have great cause to be thankful to Almighty God for the manifold blessings which He is bestowing upon us, and we can confidently look forward, under His protection and guidance, for a condition of prosperity and happiness which we have not heretofore enjoyed.

STATE DEBT AND FINANCES.—The State debt and finances will doubtless receive the thoughtful and careful consideration of the General Assembly.

The amount of the State debt on the 1st of October, 1868, was nineteen million two hundred and nine thousand nine hundred and forty-five dollars (\$19,209,455). This includes estimated amount of post due interest to be funded under act of August 29, 1868, of two millions of dollars (\$2,000,000). The above amount (\$19,209,455) is inclusive of bonds issued for internal improvement purposes since May 29, 1861, and prior to the year 1866. The amount of these bonds is one million one hundred and twenty-eight thousand dollars, (\$1,128,000), and the estimated interest thereon due and unpaid is one hundred and eighty thousand five hundred and ten dollars (\$180,510).

The amount of interest which has matured October 1st, 1868, and been paid in cash, is one hundred and twelve thousand one hundred and one dollars, (\$112,101). The interest maturing at subsequent dates during the present fiscal year was follows: January 1st, 1869, three hundred and eight thousand one hundred and ninety-seven dollars, (\$308,197); April 1st, 1869, three hundred and four thousand one hundred and one dollars, (\$304,101); July 1st, 1869, three hundred and eight thousand one hundred and ninety-seven dollars, (\$303,197). Total for fiscal year ending September 30, 1869, one million thirty-two thousand five hundred and ninety-six dollars, (\$1,032,596). The amount of interest above stated as falling due April 1st, 1869, includes interest on bonds four millions five hundred thousand dollars, (\$4,500,000) yet to be issued, bearing date October 1st, 1868.

The balance remaining in the hands of the Public Treasurer October 1st, 1868, was one hundred and fifty thousand thirty-four dollars eighty-four cents, (\$150,034.84). The amount from taxes, including payments in October, is two hundred and twenty-six thousand seven hundred and six dollars forty-two cents, (\$296,700.12). The taxes from several counties remain unpaid, but we cannot expect more than seventy five thousand dollars (\$75,000) from this source.

The estimated probable expenses of the State government during the present fiscal year will be three hundred and seven thousand two hundred and thirty dollars (\$475,330). Add interest falling due during fiscal year, of one million two thousand five hundred and ninety-six dollars, (\$1,032,596), will leave the amount to be provided for one million four hundred and seven thousand eight hundred and twenty-six dollars, (\$1,403,826). To meet this the Treasurer will have fifty thousand thirty-four dollars and eighty-four cents, (\$50,034.81) after paring one hundred thousand dollars (\$100,000) temporary loan, taxes received since October 1st, 1868, ninety-six thousand one hundred and ninety-six dollars and thirty seven cents, (\$95,196.37) estimated taxes due, seventy-five thousand dollars, (\$75,000) proceeds of sale of North Carolina railroad bonds, one hundred and seventeen thousand six hundred dollars, (\$117,600) making a total of three hundred and thirty seven thousand eight hundred and thirty one dollars and twenty one cents, (\$347,811.41). Leaving the amount of one million and sixty-nine thousand nine hundred and ninety four dollars and seventy-one cents, (\$1,069,994.79) to be provided for by taxation during the present fiscal year.

I recommend that some mode be provided to ensure the payment of this interest, and of such interest as may be due the State in future from corporations.

The report of the Public Treasurer will contain full details of the public debt, with recommendations as to the best means for providing for interest. I have full confidence in that officer, and respectfully commend his statements and views to the consideration of the General Assembly.

The estimated value of all¹ property in the State, lands and their improvements included, is two hundred and fifty millions of dollars, (\$250,000,000). I do not regard this as an extravagant estimate, but assuming that it is, and putting it at two hundred millions, (\$200,000,000), it is clear that the people of the State are fully able to carry on their government and at the same time provide for the payment of the interest on their debt. An *ad valorem* tax of one per cent on two hundred millions would raise two millions. At half per cent, it would be one million. A debt worth five thousand dollars clear of debt, would pay twenty-five dollars to the State, in order to raise the million that will be necessary—and so on in proportion. The interest on the State debt should be met promptly and in good faith, and the taxes necessary to meet it should be levied. The Constitution which we have all sworn to support, provides that the public debt "shall never be questioned." If we hesitate to meet the interest of the debt, or if we fall from any cause to make due provision to meet it, we thereby "question" the debt, and do violence

to our solemn obligation. I believe that the General Assembly will impose, and that the people of the State will cheerfully pay whatever amount may be necessary to meet the interest on the debt. I believe it will be popular to make such provision, but whether popular or not, it should be done. The great question for a statesman is, what is right?

What does duty require under the various views? If the answer to be a certain thing, do it, and leave it to time, events, and a just public judgment to vindicate and sustain the debt.

EDUCATIONAL INSTITUTIONS.

The people of the State are so fully committed to internal improvement that it devolves on me to say but little on the subject. Since the rise of the rebellion state and has been extended to the Wilmington, Charlotte and Hatteras Roads—in the Fayetteville and Western Roads, to the Tarborough and Winston Roads, and to the Western North Carolina Road. The work on the latter Road is being vigorously prosecuted between Montague and Asheville. A company has been organized, under an act of the General Assembly of 1864, to extend the Wadesboro Division of this Road, and it is expected that during the coming year the route will be surveyed, and made of such proper length to prevent injury from encroaching on the rights of the owner. Contracts in writing should be encouraged, and should be strictly enforced. A certificate of location should be required to perform his contract with scrupulous fidelity; and on the other hand, no opportunity should be afforded in the contract of the employer to evade payment when the services have been performed. The rate of labor is already adequately compensating wages, with the certainty of payment. The life of capital is steady enterprise and investment, unimpaired by idleness, inattention, non-performance of slack performances of contracts by their employers. I will perceive no difference, in a legal or moral point of view, between a contract broken by a mechanic or laborer and an obligation unbroken by a capitalist or employer. The mechanic and the laborer should be protected, but not to the detriment of the employer when the latter has fully complied with his obligation. The former should be assured, while laboring, that the reward of his labor will be realized; and, to effect this, there should be a lien in every case until it is paid. The remedy should be plain, speedy and cheap. As a general rule the mechanic and laborer cannot afford to engage in suits at law and pay fees.

This is a subject which requires no small interest among us people. Those especially like us here—where will continue to press the attention upon the attention of the General Assembly, and to immigrate. I find the General Assembly concurs with me as to the importance of encouraging immigration; and I trust that last will at once adopt such measures on the subject as it may deem proper and effective in their operation. We have a continental climate—a varied and fertile soil, an abundance of the most valuable minerals, mill-culture, water power, fine grazing lands, vast forests of timber of all kinds, a long sweep of sea coast, and, in fine, everything, material and physical, which in a country in some respects almost new, can attract immigrants and induce the measure of their expectations. Our government is now settled on a solid basis. The laws are over all alike, and are faithfully and honestly administered. Society is peaceful and tranquil. Immigrants, therefore, will not only be welcomed by our people, but will be protected and respected, and a fair field will be opened to them, in common with those who are here, to improve their condition.

EDUCATION.—The attention of the General Assembly is respectfully invited to the report of the Superintendent of Public Instruction, herewith transmitted. That officer is diligently engaged in his duties. I am satisfied, from my knowledge of his character and qualifications, that he will be able to put in operation, at an early period, under the sanction of the General Assembly, a system of "schools and means of education." In all respects better and more extensive than any heretofore in existence in the State.

The University of the State is inseparably connected with the free public schools—Both should be fostered. Education in agriculture, mechanics, mining, engineering, and in all the useful arts and sciences, should be encouraged. Normal instruction should be provided for at once, that we may have well educated teachers of our own for our public schools.

Nearly all the State school fund, the proceeds for the most part of the funds deposited with this State by the general government in 1860, has been lost. It is unnecessary to show how it was lost, or to dilate upon the advantages thus snatched from us. It grieves me for what is past. Let us improve the present, and address ourselves to the future. We must have free public schools for all the children of the State at whatever cost. This is a duty which can neither be postponed nor evaded. So thoroughly am I impressed with this duty, and so earnestly I committed to every feasible measure to render its full performance certain, that for the assurance that it will be thus performed I would despair of free popular government in North Carolina. "Education is the cheap defence of nations," not only from without but within. It is that light which distinguishes refined and civilized from barbarous races. It forms and compacts the only society among men which is worthy of the name. It touches the earth, and it blossoms with luxuriance; its soils yield its choicest fruits, its mines open and pour out their varied treasures, and its rivers and seas are whitened with commerce, which carries with it not only exchangeable wealth, but ideas in government, literature, science, and art. It is the only sure basis of good morals, for without it the Divine Word, the fountain of all truth, would be a sealed book. It is the strongest bulwark that can be erected to protect the rights of property. Property holders, we are therefore, especially interested in promoting education—Taxes for such a purpose should be cheerfully and promptly paid. The affluent and the enlightened can afford to care in this respect for the poor and the ignorant, since it is not merely their duty, but their highest interests are thus best subserved. But little, if any, of the money expended for education is sent out of the State. It remains with us, and while our people are thus enriched with knowledge, they are not rendered poorer even in money, as the latter is collected from the citizens in one hand of the State and immediately disbursed to them by the other.

The people of the State are anxious that industrious and worthy immigrants should come hither and settle among us. It is a primary question with all such immigrants whether in the communities or States in which they are invited to settle, there are facilities for educating their children. If we do not put in operation as good public schools, as there are in other parts of the country, we cannot hope to attract to the State any considerable number of immigrants. They will continually turn their steps towards other regions, more remote than ours, if it is true, in climate, soil and material resources, but in which they can secure for their children, at the public charges, a system of schools to fit them to become intelligent and useful citizens.

The people of North Carolina have long been a unit in favor of education. From the days of Yancey, Murphy, Stanly, Cameron, Gaston, Caldwell, and others, to the present, their enlightened statesmen of all parties have enjoined this as the first duty of the State—I am persuaded that the purpose to educate the rising generation is as firmly fixed now as at any former period. This is subject on which all can agree. A rivalry can exist in this respect which will be generous in its nature, which will exalt the sacred rate of charity, and which, honoring those who may engage in it, will confer immeasurable benefits and blessings on this and future generations.

I recommend, in the most earnest terms,

that the General Assembly during its present session provide for a general and uniform system of public schools. This schools for the white and colored children should be separate, but to other respects there should be no difference in the character of the schools, or in the government mode, to appoint them.

The Board of Education and Trustees of the University will doubtless make report to the General Assembly of an early day as to the condition of the educational interests related to them. Both these boards are fully organized, and have manifested some important business.

EDUCATIONAL INSTITUTIONS.

The Constitution provides that "the General Assembly shall provide for the education of the people of the State." It will be proper to give to mechanics and laborers an adequate share in the subject matter of their institution.

In the next place, always going on between capital and labor, the latter is more likely to suffer, as the former, first, because money or capital is power, and secondly, because capital is generally controlled by a greater degree of intelligence than that which characterizes labor. Labor cannot afford to come into conflict with capital to enforce its rights, for the reason that it can not, like capital, retire within itself and await results. Both should be protected in such manner as to prevent either from encroaching on the rights of the other. Contracts in writing should be encouraged, and should be strictly enforced. A certificate of location should be required to perform his contract with scrupulous fidelity; and on the other hand, no opportunity should be afforded in the contract of the employer to evade payment when the services have been performed. The rate of labor is already adequately compensating wages, with the certainty of payment. The life of capital is steady enterprise and investment, unimpaired by idleness, inattention, non-performance of slack performances of contracts by their employers.

I will perceive no difference, in a legal or moral point of view, between a contract broken by a mechanic or laborer and an obligation unbroken by a capitalist or employer. The mechanic and the laborer should be protected, but not to the detriment of the employer when the latter has fully complied with his obligation. The former should be assured, while laboring, that the reward of his labor will be realized; and, to effect this, there should be a lien in every case until it is paid. The remedy should be plain, speedy and cheap. As a general rule the mechanic and laborer cannot afford to engage in suits at law and pay fees.

This is a subject which requires no small interest among us people. Those especially like us here—where will continue to press the attention upon the attention of the General Assembly, and to immigrate.

I find the General Assembly concurs with me as to the importance of encouraging immigration; and I trust that last will at once adopt such measures on the subject as it may deem proper and effective in their operation.

We have a continental climate—a varied and fertile soil, an abundance of the most valuable minerals, mill-culture, water power, fine grazing lands, vast forests of timber of all kinds, a long sweep of sea coast, and, in fine, everything, material and physical, which in a country in some respects almost new, can attract immigrants and induce the measure of their expectations. Our government is now settled on a solid basis.

The laws are over all alike, and are faithfully and honestly administered. Society is peaceful and tranquil. Immigrants, therefore, will not only be welcomed by our people, but will be protected and respected, and a fair field will be opened to them, in common with those who are here, to improve their condition.

EDUCATIONAL INSTITUTIONS.

The Constitution provides that "there shall be a Board of Education, and Trustees of the University." The Board of Education, Superintendent of Public Schools, and the Trustees of the University, under the direction of the Board, are to be appointed by the General Assembly.

It is recommended that the salaries of these officers be set once yearly.

It is also recommended that the expenses of the Board of Education be set once yearly.

It is also recommended that the expenses of the Board of Education be set once yearly.
