occur again with impunity.

The mission of the Hon. Caleb Cushing still remains a perplexing mystery. The prevailing idea is, that Secretary Seward has sent him abroad to buy up some more territory for the United States, and as we now have more money in the treasury than we know what to do with, (?) this seems very probable. The Spanish Minister very bluntly asked Mr. Seward the question, a few days ago, and was as bluntly answered, the answer not tending to enlighten him materially on the subject.

That he has gone to London to assist in the settlement of the Alabama claims, seems almost certain, and what he will buy in landed estate before he returns, time only can determined.

The friends of a protective tariff will revelation:

"There will be in the future, as there have been in the past, widely different opinions upon this long vexed and very important subject; but the indications are decided that the more enlightened sentiment of the country demands that the tariff shall hereafter be a tariff for revenue and not for protection, and that the revenues to be derived from it shall be no larger than, in connection with those received from other sources, will be required for the economical administration of the Government, the maintenance of the public faith, and the gradual extinguishment of the public debt. While the country is not at present, and may not be for many years to come, prepared for the abrogation of all restrictions upon foreign commerce, it is unquestionably prepared for a revenue tariff.—Report of the Secretary of the Treasury.

WHAT THE SOUTH NEEDS.

Any right minded man will acknowl edge that something is needed all over the South to put more life and activity into business, and encourage industry, and to make this section of the country what it should and can be, the most prosperous section on the face of the earth. The question now to be solved is, how is this thing to be done? The war has left the inhabitants destitute, and the time has come to ask bow shall this state of affairs be improved? There is land enough, and it is of a quality that returns an am ple reward for the labor that is bestowed

on it. The fact is, enterprise is wanting. People are wanted here who expect to be obliged to work for a living, and work hard; such people will set an example to others, which will be beneficial, and a spirit of rivalry, and competition will spring up, which will make a marked difference in the prospects of the country in a very short time.

Now the question to be decided is, will such a class of people be welcomed here? ness.' The West is full of emigrants from the East, and instead of being looked down that is going to build up the country, buy the land, cultivate it, furnish trade to the Committee on Military Affairs.

for the merchants, and one helping another, bring the community into a state of prosperity that is flattering and encouraging. There is no remon why the same state of affairs should not prevail here, and though the old residents and land owners, will be the most benefited for a while, there is room for all and all should be heartify welcomed. -0.0

BEO. REPUBLICAN:

Look here, old friend, what's the matter? If mayor's offices are to let I want our, and I want is right away, too; I am just big enough for one, and, besides, I want one.
