

EXECUTIVE DEPARTMENT.

RALEIGH, November 17, 1868. To the Honorable the General Assembly of North Carolina.

GENTLEMEN:—It is proper that your first regular session under the new Constitution, I should lay before you "Information of the affairs of the State," and recommend to your consideration such measures as may be deemed expedient.

The people of the State have reconstituted their government on the basis of the equal rights of all. The State is quiet and tranquil. There is no ground for apprehending that insurrection will again be attempted, or that the peace of the country will be disturbed.

The year now closing has been richly crowned with harvests. The seasons have been propitious. A plentiful supply of bread has been produced for our whole population, and that want in this respect will not be felt during the coming year for any who will labor for a living. Fruits of all kinds have been gathered in abundance. The number of cotton and tobacco are sufficient to furnish profits to our people and have advanced our commerce in former years. Our commerce is increasing. Our mineral resources are more fully known. Our agricultural resources are more fully known. Our agricultural resources are more fully known.

The State debt and finances will doubtless receive the thoughtful and careful consideration of the General Assembly. The amount of the State debt on the 1st of October, 1868, was nineteen million two hundred and nine thousand nine hundred and forty five dollars (\$19,209,945).

The balance remaining in the hands of the Public Treasurer October 1st, 1868, was one hundred and fifty thousand seven hundred and eighty seven dollars (\$150,787).

The estimated probable expenses of the State government during the present fiscal year will be three hundred and seventy five thousand two hundred and thirty seven dollars (\$375,237).

The stocks and bonds held by the State in corporations, and interest due from said corporations, is as follows: Stocks, eight hundred and thirty four thousand five hundred and thirty four dollars (\$834,500).

I recommend that some mode be provided to ensure the payment of this interest, and of such interest as may be due the State in future from corporations.

in our solemn obligation. I believe that the General Assembly will respond, and that the people of the State will cheerfully pay whatever amount may be necessary to meet the interest on the debt. I believe it will be prudent to make such provision, but whether the amount to be raised should be raised by a tax on the land, or by a tax on the poll, or by a tax on the consumption, is a matter of right.

The people of the State are to be fully committed to internal improvements that I deem it necessary to say but little on the subject. Since the close of the rebellion the State has been extended to the Washington, Charlotte and Raleigh Road—to the Fayetteville and Western Road—to the Charlotte and Asheville Road—to the Tarboro and Wilmington Road, and to the Western North Carolina Road. The work on the latter Road is being vigorously prosecuted.

The Constitution provides that "There shall be established, in the office of the Secretary of State, a Bureau of Statistics, Agriculture, and Immigration, under such regulations as the General Assembly may prescribe." The attention of the General Assembly is especially invited to that portion of the report of the Secretary of State herewith transmitted, which refers to this subject.

The attention of the General Assembly is respectfully invited to the report of the Superintendent of Public Instruction, herewith transmitted. That officer is diligently engaged in his duties. I am satisfied, from my knowledge of his character and qualifications, that he will be able to put in operation, at an early period, under the sanction of the General Assembly, a system of "schools and means of education" in all respects better and more extensive than any heretofore in existence in the State.

The University of the State is inseparably connected with the free public schools. Both should be fostered. Education in agriculture, mechanics, mining, engineering, and in all the useful arts and sciences, should be encouraged. Normal instruction should be provided for our own public schools.

Nearly all the State school fund, the proceeds for the most part of the funds deposited with this State by the general government in 1836, has been lost. It is unnecessary to show how it was lost, or to dilate upon the advantages thus snatched from us. Regrets are vain for what is past. Let us improve the present, and address ourselves to the future.

The people of the State are anxious that industries and worthy immigrants should come hither and settle among us. It is a primary question with all such immigrants whether they are invited to settle, there are facilities for educating their children. If we do not put in operation as good public schools as there are in other portions of the country, we cannot hope to attract to the State any considerable number of immigrants.

I recommend, in the most earnest terms, that the General Assembly during its present session provide for a general and uniform system of public schools, for the white and colored children, to be separate, but in other respects of the same grade, and to be under the same management.

that the General Assembly during its present session provide for a general and uniform system of public schools, for the white and colored children, to be separate, but in other respects of the same grade, and to be under the same management.

The Constitution provides that "There shall be established, in the office of the Secretary of State, a Bureau of Statistics, Agriculture, and Immigration, under such regulations as the General Assembly may prescribe."
