The following testimonials from the President of Wake Forest College and the Pastor of the Raleigh Baptist Church, and from W. G. Simmons, Professor of Natural Science of Wake Forest College, will show the estimation in which the School is held:

[From Dr. W. M. Wingate.]

In the most beautiful part of this city, in the choice spot of this most charming portion, is our Baptist Female Seminary. I am glad to see that some of our brethren, in their recent visit to Raleigh, are telling some of the good things that occur to their minds about it. The wonder is that more has not been said. It is on high ground, with good water, good air, and delightful surroundings. It has good buildings, with airy and spacious rooms for dormitories and recitations, and with large, tastefully arranged front grounds for walks and amusements. It has a cabinet of minerals, an excellent apparatus new and large pianos, and the beginnings of a gymnasium for health-giving exercises. And Bro. Hobgood, the Principal, is hale, vigorous and energetic, with an able body of teachers and professors. With its general management, its table fare, and the attention given to the comfort of the pupils I can see nothing to hinder the largest success, and a constantly widening influence upon the daughters of our State.

[From T. H. Pritchard, D. D.]

I am intimately acquainted with the Faculty of the Raleigh Female Seminary, and take pleasure in expressing my high appreciation of the excellence of the instruction they are accustomed to impart. Indeed I am persuaded that in accuracy and careful painstaking faithfulness their work possesses unusual merit, and do most heartily commend this Institution to the patronage of all who wish their daughters thoroughly educated.

T. H. PRITCHARD.

[From Prof. W. G. Simmons, of Wake Forest College.]

I have been patronizing the Raleigh Baptist Female Seminary during the present scholastic year, and take pleasure in recommending it to all who are interested in female education.

My daughter has been giving special attention to Vocal and Instrumental Music and Drawing and Painting; and her progress has been very gratifying. In these Departments the Seminary offers superior advantages. The pianos used for teaching and practice are new and first-class instruments.

I have examined very thoroughly the Philosophical and Chemical Apparatus, and the Geological and Mineralogical specimens; and find them extensive and amply sufficient for teaching and illustrating the Scientific Course.

My experience in regard to dressing my daughter has been that under the uniform system the expense in Raleigh has been much less than it would have been at home.

With a sufficient corps of experienced and successful teachers in all the branches of study, with excellent table fare, just suited to the wants of students, with comfortable dormitories, well warmed and ventilated, and with a system of light gymnastic exercises, designed to secure invigorating and healthful exercise, this school merits a liberal patronage from those who desire to afford the best educational advantages for their daughters.

Read the following Testimonials:

THOMASVILLE FEMALE COLLEGE,  
February 20th, 1875.

They magnify sufficiently to make the finest type easy reading by lamp light, and the tint gives such softness to the light that I am tempted to use them more than probably is best for me. I shall certainly recommend them.

H. W. REINHART.

RALEIGH, N. C., Jan. 6th, 1875.

Mr. Edw. Fasnach, Raleigh, N. C.:

DEAR SIR:—I have given the Pantoscopic Spectacles a faithful trial, and am much pleased with them. They do not fatigue my eyes, and with No. 16 glasses I can read the smallest type with unusual perspicuity, and most cheerfully recommend them.

Very respectfully, your obt. serv't,  
P. F. PESCUDE.

It gives me pleasure to state that I have used for a short time, the new Pantoscopic Star Spectacle, sold by Mr. Edward Fasnach, of Raleigh. The tint of the glass is exceedingly grateful to weak eyes, and when known, I am persuaded, his glass will become a general favorite.

T. H. PRITCHARD.

Dec. 22d, 1874.

Ed. Fasnach, Esq.:

DEAR SIR:—The Pantoscopic Spectacles purchased from you I find to be more beneficial to my eyes than any I have heretofore used, the light from them being clear, and without any strain or pain to the eye. I cheerfully recommend them to any being compelled to use spectacles.

Very respectfully,  
S. L. RIDDLE,  
Clerk Reg. Deeds.  
Raleigh, Jan. 7, 1875.

HOUSE OF REPRESENTATIVES,  
Raleigh, Dec. 9th, 1874.

E. Fasnach, Esq.:

DEAR SIR:—I am using the Pantoscopic Star Spectacle. The improvement is marked and beautiful. I am delighted with the clearness and softness of the light reflected from the lenses of this new and useful invention.

Very truly yours,  
JAS. H. FOOTE.

The PANTASCOPIC Star Spectacles are made of white, and blue, and purple-tinted lenses.

Persons ordering from a distance can be supplied with the proper glasses by giving age and occupation.
