[REPORTED FOR THE JOURNAL OF COMMERCE.]

New Orders, Oct. 27.—Gen. Sheridan has addressed a letter to Col. Sedgwick, commanding at Brownville, instructing him to warn all adherents of any party, or pretending governments in Mexico, that they will not be permitted to violate the neutrality laws between the Juarez Liberal government of Mexico, and the United Service of the pageant. A correspondent mentions that when it was first proposed to appoint a deputation of the young ladies of Berlin, it found general favor at once. On former occasions of a similar nature the ladles had been elected either for their rank or else the social standing of their fathers, and had not been especially conspicuous for their beauty. It was, therefore, resolved by the committee of management to Letter from Gen. Sheridan.

These instructions will be enforced against the adherents of the Imperial Buccaneers, representing the so-called Imperial government of Mexico, and also against the Ortego, Santa Anna, and other factions.

The King of Prussia, on the occasion of his triumphal entry into Berlin, at the head of his victorious army, found in his path a galaxy of charming young ladies, the clite of the beauty of the city. One of these presented to the King a wreath of laurel, tied with a broad white satin ribbon, trimmed with gold, which His Majesty gallantly attached to his persor and wore through the succeeding part of the pageant.

ous for their beauty. It was, therefore, resolved by the committee of management to select the deputation entirely for their beauty. But now an unforeseen trouble arose, and that was to find a man bold enough to undertake to play the part of Paris, and decide the conflicting claims of each young lady. This difficulty was obviated by selecting a committee of three, it being suggested that any one member, when reproached by a rejected fair one, could maintain that he had been outvoted. It was at tirst proposed to appoint twenty-five young lafirst proposed to appoint twenty-five young la-dies, but such an outcry was raised, that the number was increased to fifty, and these had to be chosen by the unfortunate committee out of, it is said, 1,700 applicants, who sent letters and photographs in showers. DRY GOODS.—Business is active. Numerous buyers from the interior are in the market. Prices rather favor buyers as dealers are fearful of any neavy accumulation of goods. Brown shirtings and sheetings are lower, except for very fine qualities. Bleached goods are in active demand at fair prices, but the recent advance sought for is not obtained. Heavy drills are much wanted. Canton flannels are in excessive stock, and prices are lower. Stripes are active and steady. nims are in good request for heavy goods. Prints have been well sold down to a low stock, and prices are steady. The recent buoyancy is Ginghams are firm and active. Delaines are also active, with a light stock; prices are steady. Coburgs are firm and brisk. Shawls are very active, but the lower qualities are in too large stock, and have declined in price. Broadcloths are dull and lower, except of very fine qualities. Fancy cassimeres are also being pressed to sale at a decline. Low and medium satinets are weak. Tweeds are more active. Blankets inactive. This Company organized on a permanent basis, with Dr. Courtaret, the celebrated French Chemist, in charge of its Laboratory, is prepared to furnish its Dr. INFECTING FLUIDS for sick rooms, nurseries, urinals, water closets, privies, cesspools, sewers, gutters, ships, railroads, hospita s, prisons, and public frast tutions of all kinds, shanghter-houses offel and fat boiling establishments; all kinds of manures (immensely increasing the value of the latter to every farme.) and wherever poisonous and offe sive gases exist. These agents are decodorivers, antiseptics, antiputrescents, and disinfectants onous and one swe gases exist. I nese agents are decodorirers, antiseptics, antiputrescents, and disinfectants in the scientific meaning of the words. They remove noxious gases and odors by chem cal principles—leaving in their places kealthful air; they are destroyers, and not merely absorbents of possenous gases—not injurious to utensils in which they are used. The attention of medical and srientific men is directed to these disinfectants.
