

THE SENTINEL.

NEWBERN: FRIDAY, JUNE 7, 1833.

The packet ship Poland, at New York from Havre, brings Paris papers to the 17th of April. The annexed summary, and the extractson our second page, embrace the principal items of intelligence by this

In Germany, it is stated under date of Frankfort, April 9, that a great numer of arrests are going forward on account of the late slight commotion alluded to in our last foreign news. The local pris ns are said to be full, and the persons seized are now transported to different provinces of the empire, though the authorities of Frankfort, where the offence against the laws was committee, claim the right of trying the culprits. There was a rumor at Paris that a general insurrection had broken out in the middle of Germany, but particular letters state that no new occurrence had happened since the affair of the 3d.

It is stated from Rouen, that the number of German emigrants who had lately passed through that city, for the purpose of embarking at Havre for the United States, is much more considerable than they have been during former years: they are said to be about a thou-

It is also remarked that there is a striking difference in the apparent character and condition of the ening ants; those that are now about to leave for the United States are of the better class, and some of them are of the liberal profession. They are generally from Bavaria, and political considerations have nduced their removal.

It was reported at Paris on the 14th of April, that serious troubles had broken out in the electorate of Hesee Cassel, and that the French minister had determined to quit that capital. It was further said, but with less confidence, that an insurrection had likewise broken out in the Grand Duchy of Beden, and that a portion of the troops employed against the insurgents had

At the close of the session of the Chamber of Depules on the 14th of April, General Lafayette, accompanied by many of the members, waited on M. de Broglie, to intercede for 423 Poles who had left the place assigned them, and who by their departure adbrought themselves under the rigor of the ordinnace of the government. The General spoke with great nergy in their justification, and explained their motives. M. De Broglie is said to have promised to Paris. use his influence to mitigate the penalties they had incurred.

The following are the members of a commission to examine the project of a law relative to the treaty with the U. States:--Messrs. Durergier de Haurance, Bessieres, Bengamin Delessert, Tulchiron, Estancelin, Rihouet, Duchatel, Martel, George Lafayette. From the latter name we are led to infer that our interests will at least be supported by one friendly advocate.

It would seem that there is again a good deal of agitation prevailing among the people of Paris, and that the government has adopted extraordinary measures to guard against an expected insurrec-

All the Poles who had fled to France in the time of the Polish insurrection and who were very numerous, had on receiving intelligence of the troubles at Frankfort, secretly quitted the different towns assigned to them as places of residence and marched to the frontiers of Germany. Their object does not appear to be fully known; it is supposed, however, they expected the movement in Frankfort would have been attended with more serious consequences and thus have afforded them an opportunity to take a part

In the Levant, matters are assuming a serious character. Our extracts will show the position taken by the Pacha of Egypt, which assuredly does not indicate a pacific disposition on his part.

The London Globe announces that it is the intention of the Irish Government to enforce the provisions of the suppression bill, as well against the conserva-

tive party as against the agitators. Letters from Lisbon of the 3d April received in London, announce the arrival of a Spanish frigate, to conduct the Infant of Spain to Italy; but that is would probably be detained until an interview could be had between those two representatives of absolu-

tism, Don Carlos and Don Miguel. It was reported at Janina that the European fleets in the Archipelago had received instructions to sail for the Dardanelles.

Tunis is said to have assumed a warlike appearance,

The long-boat had made but little progress on the 10th of February, by which time all in her were so debilitated from fatigue and thirst, that they lost all Missouri, and Nashville, new cases were occurring hope. The boat too, was leaky, and required eight men to be constantly bailing her. A highly respectable gentleman, Mr. Ridley, died of exhaustion and

Not many years ago, it happened that a young ing connected with several of the magnates of the The Western Mail has brought the news of the duced into the fashionable circles of the metropolis, British Aristocracy, the young American was introwhere in consequence of his very fine personal appearance, or that his father was reported to be very rich, or that he was a new figure on the state, he attracted much attention, and became quite the favorite of the ladies. This was not at all relished by the rebuff, they were compelled to treat him civilly. Thus matters stood when the Hon. M. P. and his lady made a party to accompany them to their country seat in Cambridgeshire, and the American was among the invited guests. Numerous were the devices to which those devotees of pleasure resorted to kill the old fellow who will measure his hours, when he ought to know they are not wanted, and the ingenuity of every one was taxed to remember or invent something practice of Treating at Elections, and to suggest

The yankees are proverbially ready of invention, and the American did honor to his character as a man accustomed to freedom of thought. He was frank the community. Our enlightened fellow-citizens, with that unaffected enjoyment which communicated be aware of the bad consequences flowing from this a part of his fresh feelings to the most worn out fashonists in the party. His good nature, would have been sneered at by some of the proud cavaliers, had they may do more injury to the County by Treating, he not been such a capital shot, and he might have than they will be able to repair by legislating for been quizzed had not the ladies, won by his respectful and pleasant civilities and constant attention in the drawing room and saloon, always showed themselves his friends. But a combination was at last formed among a trio of dandies, staunch patrons of rection of this evil, and we hope we shall not look in the Quarterly, to annihilate the American. They proposed to vary the eternal evening waltzing and piping, by charades and playing various games, and having interested one of those indefatigable ladies, say whether it shall be continued by their influence: who always carry their point in the scheme, it was voted to be the thing.

After some few charades had been disposed of, one boats being crowded with people, shoved off from the called 'Crowning the Wisest.' This is played by seship's side. There was a murmur among the audience, but wheth'r, applause or censure of the American could not determine, as he did not choose to betray any anxiety for the result by a scrutiny of the faces which he knew were bent on him.

The second now proposed his question. He affected to be a great politician, was mustachoed and whiskered like a diplomatist, which station he had been coveting. His voice was bland, but his emphasis was very
