## President's Message.

Fellow-citizens of the Senate

and of the House of Representatives : Under the benignant Providence of Almighty God, the representatives of the States and of the people are again brought together to deliberate for the public good. The gratitude of the nation to the soversign Arbiter of all human events, should be compensate with the boundless blessinge which we enjoy.

Peace, plenty, and contentment reign throughout our borders, and our beloved country presents a sublime moral spectacle sire to cultivate peace and commerce with to the world.

some of the principal European powers true permanent policy of our country. has had a necessary tendency to check and War, the scourge of nations, sometimes emberrass trade, and to depress prices becomes inevitable, but is always to be throughout all commercial nations; but not avoided when it can be done consistently withstanding these causes, the United with the rights and honor of the nation. States, with their abundant products, have One of the most important results of felt their effects less severely tran any the war into which we were recently forother country, and all our great interests | ced with a neighboring nation, is the deere still prosperous and successful.

While the people of other countries are country. They saw that our standing ar struggling to establish free institutions, un- my on the peace establishment did not ex are in the actual enjoyment of them-a themselves to maintain in peace large sich inheritation from our fathers. While standing armies for the protection of thrones sed and distracted by civil war or intestine against foreign enemies, they had not the majority, constitutionally expressed, as an effective force, unless it might be force and violence. Minister Plenipotentiary of the United States to Mexico has been received and from Mexico of similar rank has been received by this government. The amica which had been suspended have been happily restored, and are destined, I trust, to be long preserved. The two republies, both situated on this continent, and with coterminous territories, have every motive of sympathy and of interest to bind them together in perpetual amity.

This gratifying condition of our foreign relations renders it unnecessary for me to call your attention more specifically

It has been my constant aim and Geall nations. Tranquillary at home, and The stoubled and unsettled condition of peaceful relations abread, constitute the

When all these facts are considered, may cease to be a matter of so much amazement abroad how it happened that our neble army in Mexico, regulars and volunteers, were victorious upon every battlefield, however fearful the odds against

The war with Mexico has thus fully dereloced the capacity of republican governments to prosecute successfully a just and necessary foreign war with all the vigor usually auributed to more arbitrary forms of government. It has been usual for writers on public law to impute to republics a want of that nuity, concentration of purpose, and vigor of execution, which are generally admitted to belong to monarchical and aristoratic forms; and this feature of popular government has been supposed to display itself more particularly in the war carried or in an enemy's territory. The war with Great Britain, in 1812, was to a great extent confided within our own limits, and shed but little light on this subject. But the war which we have just closed by an honorable peace, cvinces beyond all doubt that a popular representative government is equal to any emergency which is likely to arree in the affairs of a nation.

The war with Mexico has developed most strikingly and conspicuously another feature in our institutions. It is, that without cost to the government or danger to our liberties, we have in the bosom of our society of freemen, available in a just and necessary war, virtually a standing army of two millions of armed citizen-soldiers, such as fought the battles of Mexico.

But our military strength does not consist alone in our capacity for extended and For the able and gullant services of the ol- have now three great mar time fronts-on ficers and men of the navy-acting inde- the Atlantic, the Gulf of Mexico, and the pendently as well as in co-operation with our troops-in the conquest of the Califormas, the capture of Vera Cruz, and the

mineral wealth recently developed there, holds Louisiana did, when that fine territory was acquired from France forty-five years ago. Extending nearly ten degrees of latitude atong the Pacific, and embracing the only safe and commodious harbors on that coast for many miles, or seven hundred and sixty three hundred miles, with a temperate climate, and scarcely possible to estimate its wealth until it shall be brought under the government of our laws, and its resources fully developed .-From its position, it must command the rich commerce of China, of Asia, of the Islands of the Pacific, of western Mexico, of Central America the South American States, and of the Russian possessions bordering on that ocean. A great emporium will doubtless speedily arise on the California coast, which may leans itself. The depot of the vast commerce which must exist on the Pacific will probably be at some point on the bay of San Francisco, and will occupy the same relation to the whole western coast of that ocean, as New Orleans tries. does to the valley of the Mississippi and the gull of Mexico. To this depot our numerous whale slaps will resort with their cargoes, to trade, refit, and obtain supplies. This of itself will largely contribute to build up a city, their acquisition; and, including Oregon, and rapidly increasing commerce. Situated rich and extensive commerce which is capacious for all the navies as well as the marine of the world, and convenient to excellent timber for ship building, owned by the United States, it must become our great western na-

It was known that mines of the precious metals existed to a considerable extent in Caliornia at the time of its acquisition. Recent discoveries render it probable that these mines ticipated. The accounts of the abundance of gold in that territory are of such extraordinary character as would scarcely command belief were they not corroborated by the authentic reports of officers in the public service, who have visited the mineral district and derived the facts which they detail from personal ob. servation. Reluctant to credit the reports in and of manufactures will be incre general circulation as to the quantity of gold, the new market thus opened, they the officer commanding our forces in California visited the mineral district in July last, for on the subject. His report to the War Department of the result of the examination, and the facts obtained on the spot, is herewith laid before Congress. When he visited the country there were about four thousand persons engaged in collecting gold. There is every reason to believe that the number of persons so emplorations already made warrant the belief that the supply is very large, and that gold is found at various places in an extensive district eroments. The existing condition of of country,
