of potatoes; in using 340 lbs., but 12.2 pounds; in case of 520 pounds, but 2.5 pounds; and in case of 695 pounds, but 1.75 pounds' increase of potatoes were obtained. Mr. Lawes' experiments with ammonia compounds, &c., gave similar results."

The Model Hog.

In a recent discussion before the Farmers' Club of St. Louis, Prof. C. W. Mertfeldt said : since the attention of farmers has been given to developing the hog, animals eleven months old that weigh 300 or 325 pounds are often seen. It used to be considered a good hog that reached 300 pounds in his eighteenth month. This is the most desirable hog for packers, and the "Berkshire" fills the bill nearer than any other breed. The "Poland China" is considered unprofitable, except for the matter of lard. In this latitude, and south of it, a black hog is peferable to a white one, because it can stand the heat better, If I wanted a pig to eat, Bathe the head and nostrils with a drink and sleep, I should choose warm, weak solution of carbolic warm, weak solution of carbolic acid, keeping it from the bird's is the "Berkshire."

To Fruit Growers.

The Oyster and Fruit Packers' Board of Trade, of Baltimore, at a meeting held 12th ult., resolved that the standard bushel for Peaches shall be a box 9 inches deep, 14 in. wide, and 224 in. long, in the clear, with 1 inch partition-that the standard half bushel for Tomatoes seed powder, t oz. gum myrrh; shall be a basket 10 inches deep, 10] inches across the bottom, and 15 inches across the top-and that the barrel for measuring Peas, shall hold not less than 21 standard seed planted in Montgomery coun-

Catarrh in Fowls.

A writer in Land and Water attributes catarrh or croup to damp consisting in part of the following guarters, or frequently to insufficient books :feeding. Breeding in-and-in also occasions it sometimes, because such

stock becomes physically weak. Most forms of the disease will yield at the outset to generous food
