

POETRY.

What is Love?

R. J. B.

Love is a fragrant little flower. That blossoms in the human breast; The mightiest monarch feels its power, And in its presence finds sweet rest.

HUMOROUS SELECTIONS.

A young man on the street, being charged with being lazy, was asked if he took it from his father.

When a pickpocket pulls at your watch tell him plainly that you have no time to spare.

"God is love," sweet thought, bright hope, to weary pilgrims, Poor human nature, how full of weaknesses it is—yet its God "is love!"

An unusual number of men are carrying their hands in their pockets, there being nothing in their pockets to interfere with the indulgence.

An old negro woman was heard to exclaim: "Thomas Jefferson, you and James Madison come into the house and bring Abe Lincoln, along with you, or I'll reach for you, shuah!"

Fourteen fathers in Quincy, Ill., have signed a pledge not to allow their daughters to take music lessons until they know how to make good bread.

A Connecticut husband lately sought for a divorce on the ground that his wife "did throw cucumbers in his face, because he helped himself too plentifully."

Little Cracked Voice—"Joe! come on! Joe! Joe!—are ya as blind ya canna hear?"

Slightly Husky Voice—"Naa! but oo's shootin' sa lood—mak's me sa stone deaf a' canna see clear what oo says?"

"O mamma! do make Miss Linnet leave off. She sings so very nicely!—nicer than you do, even! Nicer than any one I know!"

"Oh, sir, please protect me round the corner! I think I see a policeman!"

A lady desiring to purchase a pair of boots, objected to the thickness of the soles. "Is that the only objection?" inquired the salesman.

A naughty little boy, blubbering because his mother wouldn't let him go down to the river on the Sabbath, upon being admonished, said: "I didn't want to go down a swimmin' with 'em, mamma, I only wanted to go down and see the bad little boys drown for goin' a swimmin' on a Sunday."

One Mrs. Law, of Vermont, called her husband a "pig" eight years ago, and he has not spoken to her since, though he has remained in the house. In this he has done right. The practice of married women calling their husbands pigs ought to be discouraged.

Among the gifts of a bride was a broom with the following: "This trifling gift accords me, its use I will commend; In sunshine use the brushy part, In storms the other end."

"What is heaven's best gift to man?" asked a young lady on Essex street, Sunday night, smiling sweetly on a pleasant looking clerk. "A hog," replied the young man.

Dennis O'Shannassy advertises as follows in the Columbus Republican: "I hereby give notice that my wife Bridget has left my bed and board, and that I will not pay her debts, as we were not married."

An editor, who speaks with the air of a man who has discovered a new fact by experience, says that the new way to travel is leading at the nose is to keep your nose out of other people's business.

In a late severe gale a lady asked a neighbor if he was not afraid his house would blow away. "Oh no," was the reply; "the mortgage on it is so heavy as to make it impossible."

"What do you sell those fowls for?" inquired a person of a man attempting to offer some chickens of questionable appearance. "I sell them for profit," was the answer. "Thank you for the information that they are prophets," responded the querist; "I took them to be patriachs."

"If you don't see what you want, ask for it," is posted up in a conspicuous place at Logansport grocery. A native stepped into the establishment last week. He saw the card and remarked: "I want a ten-dollar bill, and I don't see it." "Neither do I," was the laconic reply.

When old King Lear complained of the shabby treatment he received from his daughters after he had divided up between them and took his place as a boarder in their respective houses, they consoled him by saying: "You may go, father, and fare worse."

LAVISH—Absent Man o' Business.

"O, Mr.—(forgets his name), will you excuse me one minute?—Take a seat—Pray take a chair—Take a Meek Client—Thank you, I have one—Man o' Business—That's all right—take another!"

A teacher, questioning little boys about the graduation of the scale of being, asked, "What comes next to man?" whereupon a little shaver, who was evidently smarting under a sense of previous defeat, immediately distanced all competitors by promptly shouting, "His undershirt, ma'ma!"

A Dutchman and an Irishman met on a lonely highway. As they met, each smiled, thinking he knew the other. Pat, on seeing his mistake, remarked: "Faith, an' I thought it was you, an' you thought it was me, an' it's nat'ur of us." The Dutchman replied: "Faith, dat ish d'ru; I was an' d'ru and you ish not yourself; we both be some von else."

Durham is to have a cotton factory soon. The Plant says: A man of unlimited means proposes at an early day to establish a cotton factory in Durham. He has \$10,000 he expects to invest outside of the machinery and fixtures which he has already on hand. This establishment will give employment to not less than 100 hands and will be of vast importance to the mercantile trade.

The late Dr. Macadam used to tell of a tipsy Scotchman making his way home on a bright Sunday morning, when the good folk were wending their way to the kirk. A little dog pulled the ribbon from the lady who was leading it, and as it ran away from her, she appealed to the first passer-by, asking him to whistle for her poodle. "Woman," he retorted with that solemnity of visage which only a drunken Scotchman can assume, "Woman, this is not a day for whistlin'."

The professor of natural philosophy in a certain college recently during the night, and answer the next day. The question was this: "If a hole were bored through the center of the earth, from side to side, and a ball dropped into it, what motion would the ball pass through, and where would it come to a state of rest?" The next morning a student was called up to solve the problem. "What answer have you to give the question?" asked the professor. "Well, really," replied the student, "I have not thought of the main question, but of a preliminary one. How are you going to get that hole bored through?"

AGRICULTURAL.

Prepare the Land Well and Plant More Corn.

The most important point in the cultivation of this crop is the preparation of the land by deep and thorough plowing. Corn roots run deep enough to avail themselves of the benefits of all the soil the plow can break. The earing season of corn is very often a period of frequent drought, and deep and thorough preparation of the land is the best remedy for droughts. If the subsoil plow is used to increase the depth of the preparation, the roots of plants will run far down in search of food and moisture.

The time of plowing should be determined by the condition of the land, and no land should be plowed, especially in the spring-time, when too wet. All lands with an abundance of vegetable matter growing upon them, should be plowed, in the fall or early winter, so as to allow the vegetable matter to fully decay, that it may become available as food for plants. Bottom lands and all loose soils, already containing much vegetable matter, need to be plowed until near the time for planting—this will enable the corn to come up and get ahead of the grass and weeds.

The distance apart corn should be planted varies with the fertility and physical properties of the soil. A rich soil can of course sustain a greater number of stalks than a poor one; but one of two soils equally fertile, one of stiff clay and the other of dark loam, the latter will bear closer planting than the former, because it absorbs more freely the light and heat of the sun. Young farmers are more apt to err in having their corn too thick than too thin upon the land. This crop demands more than simply an abundance of food, it requires a full supply of light and heat, with a free circulation of air.

The corn plant requires manures containing potash 27 per cent, phosphoric acid 47 per cent, and some manure containing ammonia to make the plant start off and grow rapidly. Cotton seed contain all these ingredients and is one of the very best manures for corn. If before applying our cotton seed to the corn as a manure we would wet them and roll them in ashes, it would supply the potash, while the fermentation and decay the seed would yield up the phosphoric acid and ammonia, giving all the ingredients necessary for the rapid growth and quick maturity of the crop. Prepare the land thoroughly, manure liberally, cultivate well, and don't be satisfied with less than 30 bushels to the acre.

Asbes, plaster, cotton seed, and woods mold composted in the following manner, will make an excellent fertilizer for corn: 4 bushels of asbes, 1 bushel of land plaster, 20 bushels of cotton seed, 10 bushels of woods mold. A pint of the above mixture to a hill of corn would have a wonderful effect. Try it this year and report.

CULTIVATORS OF SMALL FRUITS.

In small fruits, the failure to cultivate, and to cultivate thoroughly, is to fail of getting any return for the planting. All growers and planters of strawberries and raspberries understand this, but all do not act upon it, but those who do astonish us with their results, and we are apt to conclude that if their plants are not a shade different, their soil at least, is, and to this the success is at once attributed. We, of course, admit a difference in soil, but not to such an extent as many suppose there exists. The result can be wonderfully varied by good or indifferent culture. We know of a plantation of Doolittle raspberries that were set out three years ago, and when, two years old, a portion of the ground was sold, and a dividing line was drawn across the raspberry rows; the parts of rows remaining to the original planter received their usual thorough and timely culture, while those parts of the same rows falling to the new purchaser were almost entirely neglected, and the difference in appearance of the plants is so great that no one would suppose that they were planted at the same time, and of the same variety. But still a greater difference was visible the next season in the crop of the two patches, the cultivated end of the patch having ten times as much fruit as the other end that was but poorly cultivated.

GRAPE CUTTINGS.—The length of grape cuttings, says the New York Tribune, is not a matter of much moment, but in a general way, it may be said, it is best to cut them with two or three buds. If the internodes, that is the space between the buds, are about nine or ten inches, use but the two, cutting below the bottom eye and a short distance above the upper one. When the buds are close together, use three or even four on the cuttings. In the Spring, set out in rows, tramp the soil at the bottom very hard, and allow the top to be but on a level with the surrounding surface. It is a great mistake to have one's cuttings sticking up in the air at least half their length. Make the soil rich before planting, and a good strong growth will be the result of the first year. One year old vines are the best for planting out, the chances of success diminishing with each succeeding year's growth. A strong, thrifty one year old vine is, in our opinion, worth twice as much as the older and stronger specimens.

WASH FOR FRUIT TREES.—The following is a wash used by William Saunders of the government gardens at Washington. Put half a bushel of lime and four pounds of powdered sulphur in a tight barrel, shaking the lime with hot water, the mouth of the barrel being covered with a cloth; this is reduced to the consistency of ordinary whitewash, and at the time of application, half an ounce of carbolic acid is added to each gallon of liquid. Mr. Saunders says:—"I generally apply it in the spring, before the leaves make their appearance, but I am convinced that it would be more effective if applied later; but then it is difficult to do so when there is foliage." Mr. Saunders applies the wash, not only to the stem of the tree, but to some extent, to the main branches.

JURUBEBA.

It arrests decay of vital forces, exhausts the nervous system, restores vigor to the debilitated, cleanses vitiated blood, removes vesical obstructions & acts directly on the urinary system. Price \$1 a bottle. JOHN Q. KELLOGG, 18 Platt St., N. Y.

ECONOMY OF FARMERS.—A farmer should never go to town without carrying something to sell—butter, eggs, potatoes, poultry, or even a load of wood. By so doing, his income is quite sure to exceed his outgoes. There is no more miserable and poverty-stricken way than to keep sending to stores and shops and having things charged, with the expectation of paying for them when the special crops come off, for these crops seldom or never turn out as well as was expected. Study economy, which will enable you to make "both ends meet." It is as necessary for the farmer to be a business like man as the merchant. To succeed in any capacity, requires a little prudence and forethought.

A SINGULAR FERTILIZER.—A correspondent of the Scientific American, who had a great many flowers in pots, which presented a languid and dying appearance, removed the earth from the roots of a favorite plant, and poured molasses around them, after which, on covering up the roots and molasses, the flowers soon began to present a surprising improvement. Several others were thus treated, and with the same result. He states that hydrochloric acid, diluted with three or four times its bulk of water, answers equally as well. We cannot, however, discover a very intimate relation between that acid and molasses, as we think the latter is not readily converted into the form of charcoal for hogs, is frequently prescribed in agricultural papers, without any directions as to quantity. It should not be given carelessly and at random. Good fresh charcoal, properly pulverized, may be given at the rate of one teaspoonful for every hundred pounds of animal, whatever its size may be, and at this rate will do no harm nor scour the animals, and may often be very useful.

AGENT NELLIE'S PUDDING.—Half a pound of the best beef suet, half a pound of grated bread crumbs, half a pound of beaten white sugar, three eggs well beaten and strained, the grated rind and juice of a large lemon; stick a mold with raisins, pour in the mixture, boil two hours.

POUND CAKE.—One pound of flour, one pound of sugar, one pound of butter, eight eggs. Beat well and bake till done.

GINGERBREAD NUTS.—Rub one

quarter of a pound of butter in one pound of flour, half a pound of sugar, one ounce of ginger, peel of one lemon and three eggs. Work it well and bake in small cakes.

A single drop of the sesquipedal chloride of iron put on a corn between the toes, once a day, with a camel hair brush, will effect a marvellous cure.

EYE PUDDING.—Six ounces of finely grated bread, six ounces of currants, six ounces of sugar, six eggs, six apples, some lemon peel and nutmeg; let it boil three hours.

NEW ADVERTISEMENTS.

\$78 A WEEK TO AGENTS.—Fastest selling articles out. Three valuable samples for ten cents. J. BRIDE, 767 Broadway, New York. 36

Working Class Male or Female, \$20 a week employment at home, day or evening; no capital; instructions on the valuable package of goods sent free by mail. Address with six cent stamp, M. YOUNG & CO., 173 Greenwich st., New York. 473

Mail train leaves Raleigh, 3.35 P. M. Arrives at Sanford, 6.15 " Mail train leaves Sanford, 6.30 A. M. Arrives at Raleigh, 9.20 " Mail train makes close connection at Raleigh with the Raleigh and Gaston Railroad, to and from all points North. And at Sanford with the Western Railroad, to and from Fayetteville and points on Western Railroad.

A. B. ANDREWS, Superintendent, dec 4-1f.

STATE OF NORTH CAROLINA, COUNTY OF WAKE. In the Superior Court, Fab. H. Perry and Indiana Perry, his wife, against Wm. H. High and T. P. Lee.—Summons for Relief. State of North Carolina, To the Coroner of Wake county—Greeting: You are hereby commanded to summon Wm. H. High, the defendant above named, if he be found within your county, to be and appear before the Judge of our Superior Court, at a Court to be held for the county of Wake, at the Court House in Raleigh, on the 8th Monday after the 2nd Monday of February, 1874, and answer the complaint which will be deposited in the office of the Clerk of the Superior Court for said county, within ten days from the date of this summons, and let the said defendant take notice that if he fail to answer the said complaint within that time, the plaintiff will apply to the Court for the relief demanded in the complaint. Hereof full not, and of this summons make due return. Given under my hand and seal of said Court, this third day of March, 1874. J. N. BUNTING, Clerk Superior Court, Wake Co. March 4, 37-6w.

WARRANTED GARDEN SEEDS. Choice Flower-seeds, New Seed Corn, Seed Oats, and Seed Potatoes, Hedge Grass, and other seeds; also select GOOSEBERRIES, RASPBERRIES, CURRANTS, STRAWBERRIES, AND OTHER SMALL FRUITS, by Mail (postpaid, to any post office in the U. S.) Enclose stamps for "Illustrated Descriptive Priced Catalogues." EDWARD J. EVANS & CO., Nurserymen & Seedsmen, York, P.

Bailey & McCorkle, Attorneys and Counselors at Law, SALISBURY, N. C. 4-6m

MISCELLANEOUS.

THE CAROLINA SPRING BED. Patented January 6th, 1874.

The undersigned offers to the public the CAROLINA SPRING BED BOTTOM, which for Cheapness, Durability and Comfort, he challenges the world.

This bed is composed of the spiral spring, made of the best tempered steel, is simple in structure, and is perfectly noiseless, being an improvement upon all other similar patents.

I will sell County or State Rights at low figures. Parties wishing to negotiate should communicate with me at once.

Any one with a little energy, can make money with this patent. For particulars, address D. W. WHITAKER, an. 28-1f Raleigh, N. C.

PROPOSALS FOR WORK

National Military Cemeteries. QUARTERMASTER GEN'L'S OFFICE, WASHINGTON, D. C., February 23, 1874. Sealed proposals, in triplicate, with a copy of this advertisement attached to each, will be ready at this office until noon on THURSDAY, the 24 day of April, 1874, for work at the National Military Cemeteries, as follows:—

Inclosure walls of brick or stone, or iron railings, at the New-Berne, N. C., and Beaufort and Florence, S. C., National Cemeteries. Brick or stone lodges at the Wilmington, N. C., Lebanon and Logan's Cross Roads, Ky., and Chattanooga and Fort Donaldson, Tenn., National Cemeteries. The work will be inspected by competent engineers, and a strict compliance with the terms of the contract will be required.

Copies of plans and specifications may be seen at this office, and at the Quartermasters' offices at Nashville and Chattanooga, Tenn., Charleston, S. C., Fort Johnston and Fort Macon, N. C., and Lebanon, Ky. Copies may also be seen at the cemeteries above mentioned. Proposals should be indorsed, "Proposals for Railings, Walls or Lodges, as the case may be," for National Cemeteries, and addressed to the Quartermaster General, United States Army, Washington, D. C.

By order of the Quartermaster General. A. J. MCGONIGLE, Capt. and A. Q. M., U. S. Army. feb 23-4f

WANTED.

An occupation as teacher, bearing at least a second grade certificate. If information be required address Wilson G. Lamb, John G. Watts, D. W. Bagley and John W. White (whites) residing at Washington, Ky. Copies may also be sent to the teacher for the last 15 months. J. H. REGUSTERS, (colored), feb 23-1f Williamston, N. C.
