

Agricultural Interest.

Washington said, in his eighth message to Congress:

It is not to be doubted that with reference either to individual or national welfare, agriculture is of primary importance. In proportion as nations advance in population and other circumstances of maturity this truth becomes more apparent, and renders the cultivation of the soil more and more an object of public patronage.

This House has hearkened to the appeal of the people of the Pacific slope and passed an anti-Chinese bill to restrain and prevent the immigration of Chinese into this country. This bill obtained the respectable majority of eighty-three, a majority composed of both parties. California is sensible in having postponed the election of its Congressmen until September.

Of the \$600,000,000 dollars of exports during 1878 no less than \$300,000,000 were due to agricultural products, being only about \$100,000,000 from all the other industries of the country.

It is of vast importance throughout the country, with 31 percent of population engaged therein, what must be North Carolina, in which nearly the entire mass of her population are directly engaged in farming and allied pursuits.

Whoever will take the trouble to examine the diagrams in the United States Agriculture reports, will be astonished to see the enormous advance in the amount of farm products since 1850, reaching far beyond the increase in ratio of population.

Two THOUSAND dollars is so small matter there days in the item of country expenses. The tax payers of Wake county can thank Judge Strong, the able and industrious Judge of the Criminal Court, and its popular Solicitor Mr. Deaux, had work and close attention to duty will do in the administration of the courts elsewhere.

A bill introduced in the New York Assembly contemplates the reduction of the salary of officials in New York city to amount of \$2,000,000 for the present year, a twenty percent, from the payments of 1877.

It was a fortunate day for North Carolina when her last General Assembly moved by the memorial of the State Agricultural Society and other agricultural bodies in our bond, and by the State Grange of Patrons of Husbandry, seconded by the patriotic message of the Governor, resolved to establish the Department of Agriculture.

Nor was it less fortunate that the act directed so wise and effective a system of operations, and provided a mode of support adopted with solicitude, to remove the burden from the farmer, and to impose the tax in such manner, and with safeguards as to protect even the manufacturer who paid it, from fraudulent competition.

As our readers know, the Board of Agriculture established by the act, organized the Department, and commenced active operations by the election of officers in April 1877. We have before us the official report of the Commissioner, Col. L. L. Polk, containing matters of public interest which deserve more general attention than they have received.

He was placed in charge of his work, without books or models, and the organization from the beginning was necessarily experimental. In some regards the operations of the department as provided for in the act extend over a wider field than that of any similar branch of State Government in the Union.

A system of correspondence was required to obtain the needed statistics, and to ascertain the immediate wishes of the people; the establishment of fish hatcheries and arrangements for the successful stocking of the waters of the State, the organization of the county fairs; the preparation of a registry of lands and mines; the collection of a museum of the products of the several counties; the distribution of timely reports of growing crops, and of seeds and agricultural information to the people, and an exclusive correspondence with similar departments in other States—all these were new and unfamiliar duties, and they must be acknowledged that the measure of success with which they have been performed, is gratifying and satisfactory.

WE ARE requested by the Commissioner of Agriculture to state that the cash price per ton of "Baldwin & Co's. Ammoniated Dissolved Bone" should be \$40 instead of \$35, as appears in the published Analysis of Fertilizers for 1878, which has recently been republished. Papers throughout the State will please notice this in the interest of the farmers.

EVERYTHING seems to be going wrong in Europe just now. The plague in Russia, the small pox in Dublin, the reaper in Prussia and trouble and distress everywhere. The hard times have reached even Switzerland, which country is very seldom affected by panics and distress.

THE RALEIGH NEWS announces a change of management. The paper has been leased for a term of years by Greenboro' friends.

WE ARE requested by the Commissioner of Agriculture to state that the cash price per ton of "Baldwin & Co's. Ammoniated Dissolved Bone" should be \$40 instead of \$35, as appears in the published Analysis of Fertilizers for 1878, which has recently been republished. Papers throughout the State will please notice this in the interest of the farmers.

In his hunt after "strange gods" Kenneth Rhyner has done nothing to reflect on the home of his nativity. He now has a big fight on his hands. He has refused to approve the bills of the secret service division unless furnished with an itemized account of the expenditures of the department. The department refuses to do this. This brings things to a dead-lock. It is believed, however, that Secretary Sherman will interfere and force his solicitor to succumb, as very many dark things are covered up by the pay-rolls of the secret service bureau, one of which, it is declared, is a contribution of about \$40,000 to the Republican campaign fund. Mr. Rhyner is right, and the public, as well as Congress, will sustain him.

A Defender of the Peoples Rights. Tarboro' Southerner. This thoroughbred and excellent Daily has been leased for a long term of years by John B. Hussey and Geo. C. Jordan. John B. Hussey is editor, a gentleman known to the profession of journalism in the State. The News has a good staff, and out of season, for the interest of the people, and to save the people from oppressive taxation, it has been steadily, long and arduous, and it is a valuable defender of the people's rights should be the dust of adversity. We trust its career upward and onward may be to the heights of glorious prosperity.

The North Carolina System. Correspondence of the News. WINSTON, N. C., Jan. 31. "And you to Brutus."

We'll toast to "South Carolina and Virginia" with a strip of land and a piece of the States such, but North Carolina more. Much has been said and written in regard to internal improvements, but it does seem that it is all in vain. Our State has been spending money for years and years building rail roads for the development of other States and the support of cities outside of our State.

North Carolina, by her system of Railroads is made tributary to New York, Western Virginia, and the same manner tributary to Charleston and now while we have bright hopes of connecting Southern North Carolina with North Western N. C. already by water, and perhaps by rail, from Wilmington on to Fayetteville, the Ore Hill and the head of the city of Greensboro' to the most fertile town in the State. Winston-Salem, from which it is proposed to run three lines of narrow gauge, and in the West to run from Winston-Salem, South West by Mocksville, through a rich and prosperous country to Mooresville, another from Winston-Salem to the Valley of the Yadkin, not extending to the head of the State, connecting with the proposed road across the State, and the other line from Winston, North West, topping the Valley of the Dan, through a rich agricultural country, as well as a great number of settlements, and through the State to the Paradise of North Carolina—Mt. Airy. An arbitrary and unparliamentary act, and one that is a disgrace to the State.

The Democratic Statesman Coming South. Philadelphia Times. Samuel Tilden evidently does not mean to let Senator Thurman get ahead of him in the affections of the solid South. Some time ago the library society at Chapel Hill University, North Carolina, engaged Mr. Thurman as their orator for the year. Now the boys at Trinity college, also in the land of tar-heels, have prevailed upon Mr. Tilden to ornament their commencement. Senator B. yard, who has a son at the university of Virginia, will hold forth there, doubtless, and the country boys will witness the sublime spectacle of a whole army of Democratic Statesmen flocking toward the cotton fields at the close of the present academic year.

The North Carolina Legislature Charlotte Democrat. The members of the present Legislature, if not having an brilliant reputation for statesmanship as some former bodies of the sort, have about as much good common sense, and a disposition to work and do right in the discharge of their public duties. They have a great deal of important and useful work under consideration—so much so that it is difficult to do more. No final action has yet been had on propositions to amend the Divorce Law, enact a Stock Law for certain counties, reamend the Whipping Post, and adopt a law taxing useless State property.

Our Commercial Fellers. Wilmington Star. There is really no such thing as State pride in North Carolina. We have not a single man who is proud of his own State, and will continue to do so, we fear, as long as the present generation lasts. When papers in North Carolina use their influence to build up Charleston, Norfolk and Baltimore at the expense of the State, it is the State, what else can be expected, that that railroad schemes will be adopted, the only purpose of which is to break down those already constructed, and to make us for all time a mere strip of land lying between States over which conducts the rail built for the enriching of other sections.

The State Debt. Goldsboro' Mail, 31st. If the Legislature now in session will provide for the accumulation in the State Treasury of a sinking fund annually of three hundred thousand dollars, and authorize the Treasurer to invest the same in the purchase, or cancellation, of such outstanding bonds of the State as might be voluntarily offered him at their market value on the day of the passage of the act authorizing such purchase, we believe that the State will be enabled to pay the whole debt of the State fairly, honestly and to the satisfaction of all honest people, both of tax payers and bond holders.

The Proper Frontispiece. Wilmington Star. With the lesson before us we are tempted to say that we hope never again to read in a North Carolina paper anything about State pride, or North Carolina policy, or building up our great material interests. It is the veriest humbuggery and claptrap it seems. It is all sound and fury, signifying nothing. It is a wind, and it is to join the popular chorus in singing the praises of foreign towns, foreign corporations, foreign enterprises, foreign manipulators. Let us all bow down and worship the Green Golden calf now set up upon whose ample forehead is written in letters of brass—Down with State Enterprise—Up with foreign schemes and enterprises.

Tattered and Torn. Charlotte Observer. Each Legislature that sits in Raleigh tears the statute laws of the State to pieces. Hatto's Review is a by-word among the members of the first General Assembly that met after it was issued knocked the bottom out of it and nobody now thinks of depending upon it. What is the use of going to the expense of publishing another book of similar kind, when the very thing served by the next Legislature? unless, indeed, it be republished once in every two years.

A WILKES COUNTY TRAGEDY.

One Man Killed and Two Wounded—A Fight Among Fugitives. Charlotte Observer, 30th. Alf. Edmondson, Lige Church and Wiley Tedder are three famous characters in Wilkes county, noted for their daring and reckless naves. All of them have been accused of crimes of different kind, two of them have been convicted in the courts and all are fugitives from justice.

He Paid the Thieves. A correspondent urges that the Post is "rather hard on Mr. Hayes, for he had nothing to do with stealing the Presidency." That may be the fact, but he took and still holds the stolen office, and he paid the thieves.

In Earnest About It. Charlotte Democrat. We are all in earnest about reducing expenses, and do not intend that the attempted ridicule of certain members of the Legislature shall stop the movement in favor of economy and curtailment of salaries.

Its Mangled Remains. Atlanta Constitution. The Republicans will die hard. A party that has been stealing for twenty years almost without interruption is not going to give up until its mangled remains are carried off to a soap factory.

A Man Without Scruple. Courier Journal. Why do the stalwarts waste their wind and money on Grant? There is Edmunds, of Vermont, who is telling them as loudly as he knows how, that he himself is the man for them. He will scruple at nothing, and Grant could take charge of the army.

Grant and Hayes. St. Paul Pioneer-Press. Grant vetoed the bank bounty steal. President Hayes signs the bankruptcy bill. Grant is abused for intruding for a reelection. Hayes is praised for distinctly repudiating any such unbecoming Curious.

No Use for a Straddler. St. Louis Times. It is now said that Mr. Hendricks is virtually out of the presidential race. This is the usual fate of men who halt between two opinions. It is better to think and be wrong than never to think at all. This is the year for the election of ultra men, and the popular demand for straight, pure partisan fervor may extend to 1880.

The Democratic Statesman Coming South. Philadelphia Times. Samuel Tilden evidently does not mean to let Senator Thurman get ahead of him in the affections of the solid South. Some time ago the library society at Chapel Hill University, North Carolina, engaged Mr. Thurman as their orator for the year. Now the boys at Trinity college, also in the land of tar-heels, have prevailed upon Mr. Tilden to ornament their commencement. Senator B. yard, who has a son at the university of Virginia, will hold forth there, doubtless, and the country boys will witness the sublime spectacle of a whole army of Democratic Statesmen flocking toward the cotton fields at the close of the present academic year.

The North Carolina Legislature Charlotte Democrat. The members of the present Legislature, if not having an brilliant reputation for statesmanship as some former bodies of the sort, have about as much good common sense, and a disposition to work and do right in the discharge of their public duties. They have a great deal of important and useful work under consideration—so much so that it is difficult to do more. What is the use of going to the expense of publishing another book of similar kind, when the very thing served by the next Legislature? unless, indeed, it be republished once in every two years.

Fables for Good Little Boys.

THE LEGISLATOR'S ANSWER. Some Legislators were asked one day, To stop their gab and reduce their pay, The Legislators replied, "My dear, It's gab and plunder for which we're here."

MORAL. A pig may get to be a blo, because the bent I may grow; But how a hog becomes a pig is what I do not know.

He Paid the Thieves. A correspondent urges that the Post is "rather hard on Mr. Hayes, for he had nothing to do with stealing the Presidency." That may be the fact, but he took and still holds the stolen office, and he paid the thieves.

In Earnest About It. Charlotte Democrat. We are all in earnest about reducing expenses, and do not intend that the attempted ridicule of certain members of the Legislature shall stop the movement in favor of economy and curtailment of salaries.

Vegetine. FOR CHILLS, SHAKES, FEVER AND AGUE. TARIHOBO, N. C., 1878. DR. H. R. STEVENS—

Der Sir—I feel very grateful for your valuable medicine, Vegetine, which I have used for my family. I wish to express my thanks by informing you of the wonderful cure of my little boy, who was suffering from the best medicine I ever saw for Chills, Shakes, fever and Ague. My son had the best medicine I ever saw for Chills, Shakes, fever and Ague. My son had the best medicine I ever saw for Chills, Shakes, fever and Ague.
