The Coming Comet.

A comet is approaching the earth, and can be seen with a telescope. It moves in an illiptical orbit, within a period of five and a half years, and its appearance was noted only thirty three years ago, and its present appearance is the seventh time that it has been recorded. It was nearest the earth the 10th of

April, at a computed distance of about 75,000,000 of miles, so that there is not the slightest prospect of collision. It has never receded from the earth much further than the planet Jupiter. In 1851 it escaped observation, but in 1857 it was seen rising inthe extreme southern horizon, reaching a brightness en priests who have passed the 106th year bringing it within easy observation with the opera glass, and finally disappeared in the southern sky.

Value of Confederate Money. We copy the following extract from an exchange, as of interest to those holding these notes: 'Confederate money issued in 1861 is eagerly sought after by 'curiosity' hunters; notes issued at Montgomery, Ala., of the denominations of \$50, \$100, \$500 and \$1,000, being the rarest. A set of these notes will readily sell for \$100 in gold. Next in value are the notes engraved by the "Southern Bank Note Company' in their permanent home in Madison ave-1861.
