MR. LADD'S OPINION

The Bill Which he Introduced and Will Vote For.

Washington Post. "What will be done with this 'bill to prohibit military interference at elecons as it has been christened?" said the Post to Mr. Ladd, of Maine, after

he had introduced the caucus bill, and the same had been referred to the Comnittee on Judiciary. "It will be reported by the committee and passed at once," responded Mr.

"Without debate?" "Yes, sir. "There will be no departure from the programme of the caucus permitted

"No, sir," replied Mr. Ladd with emhasis. Was there a supplementary caucus ield this morning, and changes in the language of the body or title of the bill nade, as has been rumored to-day?" "I have heard of no such rumor, aid Mr. Ladd, "but I can tell you that here is not the shadow of a basis for he report, if such a one is in circula-

"Will any Republicans do likewise? "It would not surprise me if they lid," said Mr. Ladd hopefully.

"And will Haves sign it ? "I think so. He certainly can have o objection to it as it stands. The bil ought to be satisfactory to the Republians and to Mr. Hayes, as I am sure it will be to the country. I think its passage will open the way out of all our lifficulties, and that we will finish up our business, adjourn and go home within three weeks.

MANUFACTURERS OF Portable and Stationary Engines and Boilers, Saw Mills, Corn and Wheat Mills, Shaftings, Hangers, and Pulleys, Turbine Water Wheels, Tobacco Factory Machinery, Wrought Iron Work. Brass and Iron Casting, Machinery of every description. Gining and Thresh ing Engines a specialty. Talbott's Patent Spark Arrester, the invention of the age. It is really the only perfect and reliable one, and is supercediag all others in use. The great efficiency in this Arrester is attracting universal attention, and is being endorsed by the best mechanical engineers and insurance companies. Its prominent features are: it does not destroy the draft; it does not interfere with cleaning the teethes; it will not choke up and requires no cleaning; it requires no direct dampers to be opened when raising steam, (dampers being objectionable, as they may be left open and allow sparks to escape,); it requires no water to extinguish sparks, which by condensaion, destroys the draft, besides, when water is used, if neglected, the eifciency is destroyed by evaporation of he water and the boiler is kept in a filthy condition; it is simple and durable, and can be relied upon; it can be attached to any boiler. No planter should be without one of them. Insurance companies will insure gins and barns when the Talbott Engines and Spark Arrester is used at same rate as charged for water or horse-power-
