Talliott's Patent Spark Arrester, THE INVENTION OF THE AGE.

Talbott's new Patent Spark Arrester is really the unix perfect and reliable one, and is superseting all others in use. The great efficiency of this Arrester is attracting universal attention, and is being embersed by the best mechanreal engineers and insurance companies. Its prominent features are:

It does not destroy the draft. It does not interfere with cleaning the tubes. It will not choke up, and requires no

eaning. It requires no direct dampers to be opened when raising steam dampers being objectionable, as they may be 162 open and allow sparks to escape.) It requires no water to extinguish sparks, which, by condensation, destroys the draft. Besides, when water is used, if neglected, the efficiency is destroyed by evaporation of the water, and the boiler is kept in a filthy condition. It is simple and durable, and can be

relied upon. It can be attached to any boiler. No planter should be without one of them. Insurance companies will insure gins and barns where the Talbott Engines and Spark Arresters are used at same rate as charged for water or horse-power.
