## Escaped Convicts.

A gang of thirty convicts have been employed at W. E. Pierce's farm, eight miles north of Raleigh, to chop out his cotton. They were quietly at work on Thursday, when a mulatto convict by the name of Jeff. Williams complained of being too sick to work any more. He was taken to a log house, chained and the door locked. In the course of an hour or so, George Faircloth, also a mulatto convict, was similarly affected and subjected to the same treatment. After awhile Mr. J. H. Bell, who was one of the overseers, went to see how his patients were getting on. He "cautiously on tiptoe stealing" approached the door and seizing the knob as if to make a sudden noise, he shook it vigorously; the door advanced rapidly on him and knocked him down. He got up su identy and asked it "what it meant," and the r he felstupid and looked in the log house to see about the sick convices, and then he felt stupiter. There whien't any convicts there. They h d received a hammer from some hidden land and made good their escape th ough the door the lock of which they had broken open. Mr. Bell sounded the a s m and search was immediately instituted, Williams was caught Friday, but Faircloth is still at large. He is a bright mulatto aged 25 years, and was sentenced from Clinton, N. One Week in Wall Street. October 7th, 1878, Western Union Telegraph stock sold at the New York Stock Exchange for 96.1-8 per share; October 14th, 1878, it sold at 86.3-4, a fluctuation of 9.3-8 per cent, in seven days, 12,500 shares sold on a margin of one per cent, required an actual capital of \$12,500. The same stock delivered at 83,3-4 gave a profit of 9,3-8 per cent. on the stock or \$937.50 per 100 shares. On the whole 12,500 the actual profit was \$117,187.50 or 9.3 8 times the capital used, in one week. This is a single case taken from the official record of the Stock Exchange, and shows how money is made so rapidly in stocks. Few people, however, have the necessary cash to put up in order to realize such immense profits as these, but capital in any amount from \$10 to \$50,000 can be used with equal success by the new combination system of operating the stocks which Messrs. Lawrence & Co., Bankers, New York, have established. By this method of pooling thousands of orders in various sums and operating them as one immense capital, shareholders realize large profits which are divided pro rata monthly. At the last June Distribution of the Louisiana State Lottery Company a worthy but impecunious coal merchant of New Orleans drew, for ten dollars invested, one hundred thousand dollars. There are just as good opportunities for some one offered under the management of Generals Beauregard Lee & Co., and F. H. Heartt, Raleigh, and Early, at New Orleans, on June 17th next. I believe it to be the greatest discovery of the present century.
