NEW YORK COTTON. New York, Jan. 29.-The cotton mark et opened with prices 1 point lower and 4 points higher, and following the call showed a little further improvement, January selling at 9c. under covering. The English cables, however, after opening about as expected proved disappointing, and in addition to this the advance had naturally afforded a very considerable profit to the long. As the best level of this morning these profits proved attractive and an earlier tendency be came apparent, under which values sagged down some 2 to 6 points on the list generally, while January sold off 14 points under fear of "notices" closing at 8.80. The market at the finish was with total sales estimated at 250,000 bales. Throughout the session there were occasional shows of strength based upon the continued light receipts which, for the day were 27,796 bales, as compared with 43,000 last year, and there was some buying on the showing made by the various spot markets of the country, which were unchanged to 1-16c. higher. But while the news from the South was strongly bullish the public declined to continue buying at the higher ir'ces on the ground that after so prolonged an advance a reaction was natural, and in the afternoon the market was quiet with trading very largely professional. The decline in January was the feature, and was thought to indicate the final short interest in that option. New York. Jan. 29.-Cotton futures open-

NEW ORLEANS COTTON.

New Orleans, Jan. 29 .- In the local spot cotton market only a moderate business was transacted. Quotations un-

Today there was less animation dis played in futures than during the last half of yesterday. There was a slight advance on the first call followed by an upward movement of 1 to 3 points but despite free buying at the outset prices did not hold. General liquidation for small profit-taking combined with some selling for a reaction forced the market off 3 to 6 points, after which, under the influence of mixed trading, prices fluctuated over a moderate range, the board at the close showed net losses of 2 to 5 points. ## Barbee & Co.'s Cotton Letter.

(Special to News and Observer.) New York, Jan. 29.-The marke has worked into new ground but was a very disappointing affair this morning. After night's buying and the upturn of four or five points in Liverpool, we should have had an advance of six or eight points this morning. But instead of this the market opened tame and hardly moved all the morning. After three hours' hard work May was selling at 8.90 and 8.91, veral times during the day. New Orns did not enthuse very much, and ofit-taking continued on so large a le that the market could hardly absorb the stuff. The tone was strong ough as far as that was concerned, but outside buying continued to disapnt everyone. All the market needed s buying and there would have been quick advance over nine cents this rning. But actually brokers stood und the pit after the opening without order to buy a bale of cotton. With situation so strong we confess our bility to account for this absence of culation and speculative buying. Those rking for an advance -ad to buy all while, and yet the market does not spond as it should. Next week's repts run very light and this can easily ise a setback. As long as there is no ieral speculation, we would continue take profits on every advance for the ne being. Nine cents is a good price

68 Broad Street.

(Special to News and Observer.) (Special to News and Observer.) " 2nd's..... 84% New Orleans, La., Jan. 29 .- Liverpool advices were not encouraging, therefore our market opened 1 to 2 points lower but advanced 3 shortly after on fresh buying. Later in the session longs realizing, estimated absence of a speculative short interest caused a decline of 5 to 6 making the net loss 4 to 5 points on the day. While there was good demand for spots today to fill up January shipments the trading was done on an easier basis than for several days past. The amount to be brought into sight for the week is estimated at about 235,000, against 270,000 last year. The visible supply for the week is expected to show a large elative loss as compared to last year. Outside speculations is lacking. Thus little or no disposition is shown by this element to enter the market above 9 cents. The trade as a whole, however, centinued very bullish and believes in higher prices ultimately. Mr. Ellison, of Liverpool, issued a circular today estimating the consumption of American from 10,900,000 to 11,000,000 bales based on a crop of 11,250,000 provided prices do not advance from the present level. This was not as bullish as anticipated. The future course of the market will contric were freely absorbed with a net gain C HENEY'S EXPECTORANT tinue to be regulated by the movement.
