New York Cotton. York, Nov. 8 .- The cotton New market was active and excited with prices undergoing a sensational break after the publication of the census report, showing 6.483,646 bales ginned to November 1. The close was 7 to 10 points up from the lowest, but barely steady at a net decline of 25 to 29 points. Sales were estimated at 1.200,000 bales.

1.200,000 bales. The Tpening was steady at a de-cline of one point to an advance of 5 points and shortly afterward all the active months showed a gain of 3 to 4 points on covering and bull support demand in the English market and re-ports of very firm interior holders. But fresh demand was restricted to some extent by uncertainty as to the showing of the census report in the afternoon, and local professionals evishowing of the census report in the afternoon, and local professionals evi-dently believing the market over long

raided it during the middle of the morning, and with considerable realiz-ing in progress prices cased off to a net loss of about 14 to 16 points. Fol-lowing this there was a second up-turn on covering of recent sellers and the market just before the report was issued was firm and nearly the high point or around 11.40 for January and 11.60 for March. COTTON. New York, Nov. 8.—The Census re-port of the cotton ginning to Novem-ber 1st, issued today, effectively nega-ives the claims of the short crop exremists. It shows that 6,484,000 bales have been ginned up to the 1st of No-rember, as against 8,029,000 last year. "which was 60.1 per cent. of the en-ire crop," and 5,207,000 in 1903, "which was 52.8 per cent. of the en-ire crop." ire crop. If the proportion ginned up to 1st November is the same as last year, the ndicated growth this year is approx-mately 10,800,000. If the proportion ginned up to the 1st of November this year is the same as in 1903, "with which season it is he frequent claim of the bulls chat Boxes for rent. 905 most closely conforms both as to J. J. THOMAS, Pres. creage and condition," the indicated rop is 11,868,000. Any theory that bales involves the assumption that the resent crop has been more rapidly bicked, marketed and harvested, than any year since 1896. That this hould be the case in view of the urency with which farmers have been idvised by the Southern Cotton Asso-iation to hold their cotton is, in my opinion, absurd, and I therefore now egard it as certain as any statistical roposition can be that the cotton proluction of the present season is 11, 000,000 bales or over to which must be added in order to arrive at the comthat line. nercial crop approximately 500,000 cales carried over from last year. The details of the quantity ginned in each State up to the 1st of November, this year, last year and in 1903, are as follows: deeds, and wills should have one. Ginned to November 1st. State. 1903 1904 - 1905 North Carolina .... 312 401 439 South Carolina .... 513 770 82. Williams. 1302 eorgia ..... 778 Florida ..... 32 49 48 Alabama ..... 565 815 791 Mississippi ..... 682  $\begin{array}{c} 510\\ 231 \end{array}$ Louisiana ..... 354 Texas .....1404 519 2395 1693

Arkansas ..... 257 396 211  $\begin{array}{r}

 1043
 Oklahoma
 73

 774
 Missouri
 14
 158 N. & W. con. 4s....10134 Virginia ..... It is interesting to note that the otal quantity ginned in the States of Vlabama, Georgia, Florida, North Carlina, South Carolina, Tennessee, Oklahoma, Kentucky, Missouri, and Vir-ginia is 3,703,177, as against 3,685,000 last year, or an increase of one-half of one per cent., while the entire defi-ciency as compared with last year is in Arkansas, Indian Territory, iana, Mississippi and Texas, a Louisnow 36 per cent. as compared with 41 per cent. on the 18th of October. It is a fair deduction from today's report, in my opinion, that the crop n Georgia, South Carolina, and North

Carolina is at least as large, if not larger, than last year; and that the production in the Atlantic States will fully equal that of last year.

to North Texas, and the contiguous In-dian Territory, Mississippi, Louisiana, and Arkansas. In South Texas, the crop is undoubtedly in excess of last year. North Texas and the other states named perduced last year should States named produced last year about a shortage of even 33 per cent. in their yield, which I think unduly

## DEPARTMENT OF INSURANCE.

IN THE WORLD. I might add that I carry a \$10,000 policy with the company.
