Stocks and Boads New York, May 4 .- The stock market today was a dull affair with some evidence of forces of depression in operation against which a desultory response was offered. The opening declines were generally recovered at one time, but the bank statement forced the market down again. Trading was not active of important at any time. The showing of the banks was complicated by the inclusion of the figures of a new member of the clearing house and this was held to account for a large part of the increase in loans and deposits. The decreas in cash, however, was somewhat larger than expected, owing to some outgo to Canada. The firmer tone of the market towards the end of the week confirms the poorer showing of the banks. The fact that Union Pacific continued reactionary today was against the market and the substitution of Reading for a sustaining forcproved inadequate. As poor returns of net earnings by the Harriman l'acifics, New York Central and Southern Railway received futher discussion and were not a helpful factor to the
