New Orleans Cotton.

New Orleans, La., Oct. 17-Spots A. were again normal as a result of the local labor situation, affecting the cotton handlers and prices remained unchanged; middling 11 3-8 cents; Br sales 30 bales on the spot and 1,800 Ca to arrive. Futures opened steady un- Cer changed to 2 points below the close of yesterday and through lack of subport sold off several more points. All Ch interest centered in the strike of the river front which so seriously hampers the handling of cotton. Exporters Chi held off from buying, awaiting some change in the strike, situation and the bears, the only active persons in the Ch market of late, were also included to hold off for the same reason. Reports of heavy rains of Texas proved a bullish feature but little advance was not- Co ed in prices until reports were receiv- Co ed that there was a probability that the strikers would return to work pending arbitration. This brought about an advance of several points. At Co the close which was steady, the Oc- Co tober option was unchanged but active months ranged from 3 to 4 points De above closing of yesterday.

New York, Oct. 17 .- The halting and irregular movement of prices of stocks today offered a confusing medium through which to try to discern any defined feeling toward the market. During the early part of the day this feeling was more active while later, with the subsidence of disquiet there was still a passive apprehension that all was not yet clear in the prospect. A collapse in the United Coppect. A collapse in the United Copper stock in the curb market and the collateral consequence before the event were the central influence on stocks, as they were yesterday. With the suspension of the board member of the firm concerned with the attempted corner in the stock and with the acts connected with it, which involved yesterday's failure of Astor exchange firm, who had taken orders in
