

COTTON MARKET HAS SLIGHT LOSS Closed With Net Loss of 2 to 3 Points CONDITIONS A STANDOFF

Bullish Week End Figures Were Offset by Favorable Weather and Improved Crop Accounts—No News to Stimulate Fresh Operations on Either Side of the Account.

(By the Associated Press.) New York, June 19.—The cotton market opened steady at a decline of one point to an advance of two points and ruled very quiet during the early trading with prices easing off to a net decline of about 3 to 4 points under scattering liquidation for over the week end. The Liverpool market was about a stand off, while bullish week end figures were offset by favorable weather and improved crop accounts, and there seemed to be nothing in the morning's news to stimulate fresh operations on either side of the account. The market closed barely steady, with prices net 2 to 3 points lower. Receipts at the ports today were: 4,000 bales, against 5,332 last week, and 5,703 last year. For the week 35,000 bales, against 33,549 last week, and 43,423 last year. Today's receipts at New Orleans, 1,779 bales, against 1,604 last year, and at Houston, 668 bales, against 1,523 last week. Spot closed quiet; middling uplands 11.40; middling full, 11.45. No sales. Future opened steady and closed barely steady.

Talk of short time in Manchester was renewed and under it prices fell off to a level 4 to 5 points below yesterday's final quotations. Stocks and Bonds. New York, June 19.—Bullish vitality was shown by the stock market today, dealings being small and the action of prices sluggish and hesitating. The week's unsettlement and the possible sequence are too doubtful to encourage confident operations in stocks. A factor in the hesitation was the circulation of reports that private banking houses from Paris asserted that the French government has irrevocably decided not to sanction the listing of United States steel on the Paris Bourse. The principal banking house associated in the project expressed its disbelief in this report and maintained its tone of hopefulness over the ultimate outcome of the project. Reports of expanding railroad traffic continue to be received. The bank statement shows extraordinary discrepancy between the loan changes in the average and the actual comparison, the average loans increasing \$10,377,000, while in the actual comparison there was a violent contraction of \$25,277,500, the
