If Movement Started Yesterday at Convention National Asso. Baseball Leagues Succeeds

(By the Associated Press.) San Antonio, Tex., Nov. 16 .- The salary limits of every baseball league, except the majors, will be cut to the quick next season, if a movement started today at the convention of the National Association of Professional Basebail Leagues by Wilbur P. Allen, president of the Texas League, bears fruit. The Texan's pian is for a cen-tral board to fix a salary limit for every league of a certain classification and fix penalties for the violation of such limit, taking the power of fixing salaries away from the individual

It was further argued that unless the salary limit of each league is the same the classification is in fact made void, as some leagues of a lower classi-fication have a higher salary limit than those of the higher.

Practically the entire business ses-sion today of minor league leaders was devoted to the salary limit prob-lem, and in the end it was referred to a committee. It was the consensu of opinion among those who partici-rated in the debate, however, that the nxing of salary limits either by classi-fication or population of the different cities under the direction of the National Association is imperative.

The suggestion of Secretary Quinn, of the Columbus. Ohio, club, that the

sularies of players who go to a higher league should be on a fixed scale was generally approved. The advancement of the American Association and the Eastern League to a higher classification, to be known as AA, was recommended by a subcommittee which met today. It is proposed that leagues in this class be permitted to draft from all other

minor leagues. SOMETHING ELSE TO THINK ABOUT.
