Governor Craig referred briefly to the present cotton situation. He as-signed as a feason the closing up of the European markets and prophesied that as soon as the arrangements are made for the reception of American cotton products in Europe where they are needed the crisis will be over. He apparently discouraged the hope which has been bobbing up repeatedly that the government ought to extend special aid to the farmer.

"We ourselves" said he. must

Exhibits.

One noticeable feature characterized the exhibits in the floral hall and in the agricultural buildings yesterday. That was the conspicious absence of coston. Of course, cotton was there. Seed was advertised and there were a few lonesome stalks of bursting bolls, scattered about in way of decoration. But all during the present fair, the chief seat of prominence in the display and in the talk of the farmers who have arranged exhibits will be food products. More than ever before, it has been realized that the farmer must raise what he than ever before, it has been realized that the farmer must raise what he eats, and the trend of the exhibits yesterday went to show that the farmers agree with this and are going to abide by it. So now, in the agricultural exhibits there is less of cotton and mure of potatoes, of corp, of grain of all kinds, of peas, of pumpkins of every fruit and of every vegetable.
