WARRENTON. Warrenton, Oct. 23.—The meeting held by the Betterment Association on last Thursday afternoon was one of the most successful in the history of the association. Encouraging reports came in from all standing committees and there was much new business of general interest discussed.

The committee on health had a particularly interesting report in which was presented a vigorous plea for a whole time health officer for Moore county. Carriage is the first town in the county to give her school medical inspection. In the recent inspection, conducted by Dr. Gibson, of Raleigh, and the local physicians, under the direction of the association, so many children were found defective and in urgent need of skilled attention that the people of the town here became thoroughly aroused on the subject and are demanding a whole time health officer. They are not of the old school who if he had two good things always ate one and kept the other for himself. They believe that if town children are retarded in their development by defective teeth, and the like, it is reasonably probable that the children in the country schools suffer from the same causes. Therefore, they want some provision that will look after all of Moore county's children. The members of the Betterment Association feel that the idea of a whole time health officer cannot fail to receive the very earnest support of every child of the county who considers the relation of the county to the child from an intelligent viewpoint.

The gift of a photograph to the school from Judge and Mrs. F. P. McConnell was reported. It is believed by the teachers that the addition of good music during chapel exercises will do much to perfect the already excellent attendance record of the school.

London has a school in which bachelors are taught to make beds, cook, sew and look after the home needs generally.

Therefore, they want some provision that will look after all of Moore county's children. The members of the Betterment Association feel that the idea of a whole time health officer cannot fail to receive the very earnest support of every child of the county who considers the relation of the county to the child from an intelligent viewpoint.

The gift of a photograph to the school from Judge and Mrs. F. P. McConnell was reported. It is believed by the teachers that the addition of good music during chapel exercises will do much to perfect the already excellent attendance record of the school.

WARRENTON. Warrenton, Oct. 23.—The meeting held by the Betterment Association on last Thursday afternoon was one of the most successful in the history of the association. Encouraging reports came in from all standing committees and there was much new business of general interest discussed.

The committee on health had a particularly interesting report in which was presented a vigorous plea for a whole time health officer for Moore county. Carriage is the first town in the county to give her school medical inspection. In the recent inspection, conducted by Dr. Gibson, of Raleigh, and the local physicians, under the direction of the association, so many children were found defective and in urgent need of skilled attention that the people of the town here became thoroughly aroused on the subject and are demanding a whole time health officer. They are not of the old school who if he had two good things always ate one and kept the other for himself. They believe that if town children are retarded in their development by defective teeth, and the like, it is reasonably probable that the children in the country schools suffer from the same causes. Therefore, they want some provision that will look after all of Moore county's children. The members of the Betterment Association feel that the idea of a whole time health officer cannot fail to receive the very earnest support of every child of the county who considers the relation of the county to the child from an intelligent viewpoint.
