LIGHT OF MYSTERY STILL IS UNSOLVED

Another Party Fails To Explain Brown Mountain Phenomenon

Dr. C. L. Wilson, of Lenoir, is the latest to lead an exploring party to investigate the mysterious light on Brown Mountain to which Mr. W. W. Scott, of Washington, D. C., directed attention in an article published some time ago. This party, like all its predecessors, failed to solve the mystery.

The Lenoir News says that next spring when the weather gets warm the Doctor and his party will be joined by other brave men and a determined effort will be made to arrive at a solution of the puzzle. Dr. Wilson's report as given by the News is as follows:

Why "Anemic" is an INSURANCE Against Sudden Death.

Before an Insurance Company will take a risk on your life the examining physician will test the urine and report whether you are a good risk. When your kidneys get sluggish and clog, you suffer from backache, sick-heads, dizzy spells, or the twinges and pains of lumbago, rheumatism and gout. The urine is often cloudy, full of sediment; channels often get sore and sleep is disturbed two or three times a night. This is the time you should consult some physician of wide experience—such as Dr. Pierce of the "Lancet," "Medical and Surgical Institute, Buffalo, N. Y." Send him 10 cents for sample package of his new discovery, "Anemic." Write him your symptoms, and send a sample of urine for test. Experience has taught Dr. Pierce that "Anemic" is the most powerful agent in dissolving uric acid, and hot water means sugar; besides being absolutely harmless it is endowed with other properties, for it preserves the kidneys in a healthy condition by thoroughly cleansing them. Being so many times more potent than pills, it clears the best veins of any sandy substance which may clog them, and checks the degeneration of the blood vessels, as well as regulating blood pressure. "Anemic" is a regular insurance and lifesaver for all big men and those who do all their work in their joints. Ask the druggist for "Anemic" put up by Dr. Pierce, in 50-cent packages.

STRENGTH AND BEAUTY with Dr. Pierce's Golden Medical Discovery. This is a blood cleanser and purifier that starts the liver and stimulates the vigorous action. It thus cures the skin eruptions, the red and blotchy face, the heart, nerves, brain and all of the body. The organs work properly the machinery running in all the arteries and veins. It cleanses the blood, and makes it rich.

light mystery, I have been anxious to know more about it.

On December 8th I started in search of more information. I reached Loven's Hotel on Jones' Ridge about sunset and commenced my observation about 6:30 p. m., for the light can be seen now at twilight. It was a real cold night and the wind was blowing a gale, but I had gone too far, made to great a sacrifice of time to lose my opportunity.

Brown Mountain in its general course, points northeast and southwest. The west end is about seven miles east of Loven's Hotel. The south end is about twelve miles from Loven's Hotel. A line drawn from point of observation near Rev. Dr. Gregory cottage by Joy post office and on to Morganton, limits the south end of the mountain, this line is twenty-five miles long; the north end is found by a line drawn from same point of observation to Lenoir, a distance of about thirty-five miles (a dim reflection from the electric lights of both towns can be seen at night) in looking for the light from this point, you are on the west side of Brown Mountain looking east. Those who have observed this spectacular phenomenon most; are a unit in the belief that it rises on the east side of Brown Mountain, and therefore has to rise above the top of the mountain before it can be seen. I will say frankly that this is not in accord with my belief, to me the light appears visible on the west side of the mountain when first seen. There are more points than one from which this light can be viewed. John Barrier who lives three-quarters of a mile south-west of Loven's Hotel can see the light from his window or door, it can also be seen from Tip Top U. G. Mr. Loven and Pat Tuttle (son of Esquire C. A. Tuttle, of Lenoir), saw the light from the top of Rip Shain about three weeks ago, between 1 and 4 o'clock a. m., while coast hunting. Rip Shain is half way between Loven's Hotel and Brown Mountain. This placed them within three miles of the supposed location of the light. They said "this was" the best view of the light they have ever had, all of which goes to show we will "catch it" when we go after it on Brown Mountain.

The first time this mystery was seen, and discussed, so far as is known, was by a party from Morganton stopping at Loven's Hotel, about ten years ago, then there was a lull in the discussion of the affair for five years, until Rev. Dr. Gregory occupied his summer cottage, he saw the light every night, when the weather conditions were favorable, and again called Mr. Loven's attention to it, since that time it has been seen by hundreds of people. A more satisfactory observation can be had on a moonlight than on a dark night, from the fact that you can get an outline of the mountain and surroundings. So far as I can ascertain, there has never been an investigation made from the top of Brown Mountain, this, in my opinion, would help to solve the mystery.

Saw The Light. Near 6:45 o'clock p. m., three of us were crowded behind a knoll to which we had climbed from Mr. Loven said, "There is that light." I said, "That is a sky rocket." This appearance was on the south end of the mountain, accordingly near Joy post office. From that time until 8 o'clock p. m. (one hour and fifteen minutes) we had seen the light at different points as regards north and south. Between times, it was only in view

from one half minute to minute each time.

What It Looks Like. The light has no resemblance to the reflection from a headlight but has characteristics all its own, it resembles the morning star or a discharge from a sky-rocket, it also reminds one of a person, at some distance, carrying a lighted lantern and moves around with about the speed of a balloon. I do not regard this as a weird light, yet I noticed I did not sleep quite so well after viewing it as I do at home.

So far as the landscape is concerned it is possible to see a light from Connelly Springs to Brown Mountain and Loven's Hotel, for Connelly Springs and Rutherford College can be seen from these points, yet I did not see the light Mr. H. C. Martin lighted for me at Connelly Springs on the night of the eighth (this was Mr. Martin's plan to either confirm or eliminate the headlight theory) to show how much I disbelieve the headlight theory, will say in Hillsboro Mountain, near Connelly Springs, were a volcano emitting flames a mile high and illuminating the entire surroundings south of Brown Mountain, yet our modest little light would go on playing its pranks as it does now. My investigation thus far leads me to the belief that we are now dealing with a single light, but lights say a bumper crop of jack-o'-lanterns. I will see these lights or light no more till the roses bloom again, but when summer comes I will pick my tent on top of Brown Mountain about four miles north of Joy post office. Who will go with me, for I should not like to go alone, for there is a knob in that vicinity called "Rattlesnake Knob;" Listen! Bears! Mysterious light! Rattlesnakes! How does this trio sound? But we must go in the interest of science, you know.

Nothing makes an angry wife so frantic as the refusal of her husband to hand her a line of back talk.

SEABOARD Air Line Railway

THE PROGRESSIVE RAILWAY OF THE SOUTH. Trains leave Raleigh as follows: No. 2, 11:45 p. m.—Through Pullmans for Richmond, Washington and New York.
