PHILANDER P. CLAXTON ON VOCATIONAL TRAINING

Commissioner Of Education Thoroughly In Sympathy With The Practices Of Swiss Schoolmaster Whom Napoleon Scorned

B. Marrow in Philadelphia

The great Napoleon blundeted. Swap-ping kings as he would oxen and deal-ing in countries as if they were plan-tations, he told Pestalozzi that he had no time to trifle away over the alphabet.

Pestalozzi, thought Napoleon, was no more than a Swiss school teacher. He did not know that the friendly little man from the shore of the Lake of Neufchatel was the wisest and most brilliant drillmaster in Europe; the mar-shal, indeed, of embryonic battalions and brigades and of armies marching caward to conquest.

"What," Pestalozzi would ask, "is that boy's aptitude?" To be a tailor? Then make him one. In his philosophy it was more honorable as well as patriotic to be the father of a brave and capable soldier than of an inept laweyr, though the soldier died from a bullet his youth and the lawyer lived to be three-score and ten.

"Vocational training" is now the phrase by which Pestalozzi is interpret-It is old in Central Europe, but new in the United States. Reduced to a single word, its definition is preparpreparedness for the individual the family, the community and the na-

Why should a dull and discouraged elergyman preach to a slumbering church when he can ploy and harrow, reap and husk enthusiastically and exntly and buy shoes and clothing for his wife and children Thus Pesta-lozzi taught and his idea has been caught up by Americans of the twencentury. Pestalozzi would have halted the elergyman ere he began the study of theology and turned him faceard toward the waiting country. The United States Chamber of Com

-a host of 200 000 driving men, energizing cities and States, from coast to const and from the frontier of Canada to the edge of Mexico-seeing through the veil that separates the present from the hereafter, has accepted and proclaimed Pestalozzi's doctrine, knowing little, possibly, of Pestalozzi,

Trade War Coming.

A terrible war is coming, some prophets are saying, a war with commodities in place of cannon. Nation is a batthe with nation, weaponed not with rifles, flying machines and bombs, but with plows. reapers, lathes, retorts, crueibles and furnaces. Therefore, prepa-ration must begin with farms, mills and phops instead of at armories and gun

Men are to do the fighting, as of you and they must be trained, as in the past. Pestalozzi would take them while they were children, discover them and then develop them into a cohesive and highly expable productive heat. This did for Germany, through the instrumentality of disciples, who under stood and adopted his educational pol-ley. And France is suffering today because Napoleon turned his back and alked away.

No one, perhaps, on this side of the translates Pestalozzi with greater fidenity of purpose and feeling than does Philander Priestly Claxton, the brilliant United States Commissioner of Education.

"Do you believe that a nation's efficiency begins with its children ?" he was

PHILANDER P. CLAXTON

sked by the writer of this article. "Your question," he replied, "seems answer itself automatically. All things begin with the children of a nation-intelligence, self-control, virtue,

common sense, industry and capability, Nature teaches that lesson. 'First the blade,' we were told years ago, 'then the ear and then the full corn in the ear.' Frobel, the great teacher, said that the gardner bestows the greatest care on his young plants.

could accomplish.

HAVE DARK HAIR AND'LOOK YOUNG Nobody can Tell when you Darken Gray, Faded Hair with Sage Tea.

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur, Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, for about 50 cents. This simple mixture can be depended upon to restore natural color and beauty to

the hair. A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied-it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored

cation in Germany was compulsory to its natural color and looks glossy fore anything was known there of Pes. soft and beautiful. This preparation is talozzi and his methods. Saxony heard a delightful toilet requisite. It is not of him through his published story and intended for the cure, mitigation or present an expert to Switzerland to inves-tigate his work. Pestalozzi's novel, vention of disease.-Adv. which he called 'Lienhardt and Gertrad

"A scrub sapling will never make a nobla oak. This country was dedicated o liberty, righteousness and education. When the bell at Philadelphia rang out its definnce to England and its king, there were schools and churches every where. A nation cannot be efficient without education and education starts with the young. Afterwards, it is the

sum of one's experiences. "If I had the regulation of the peo ple I would have them go to school for 70 years; there or four hours a day for 40 years and thereafter two or three times a week until they died. Then there would be actual efficiency to the full measure of ability. An increase of knowledge means an increase of prosperity. The wealth-producing pow er of the people is in the exact propor-

tion to their education. "An educated people living on a rock in the middle of an ocean would lay their hands on the raw materials of other people and make them into the finished product and become rich

Wealth and civilization are inseparable. am almost willing to say that wealth and happiness, not for the individual, but for a nation, are also inseparable. A Same Plea for Wealth. "I shall not condemn wealth until

very frugal and industrious family in the United States has a home of its own, with a garden in which there are flowers and trees. I want to see every hovel torn down. There should be wealth enough so that no woman or

child is hungry or in rags. "Much needs to be done in this country. Roads, liberating millions of our people from the tyranny of mud and its isolation, should be built and our cities and villages should be made beau tiful. Wealth alone can do this work and wealth must come through education. The educated man puts a harness on a river and it turns wheels and

gives thousands of other men employment. "Educated men drive tunnels through mountains and gather up waste products and make the desert blossom and hear fruit. Two-thirds of the wealth cra-ated in the United States during the last 40 years can be directly traced to the work done in our public schools. I do not hesitate to say that no institution at any time in the history of the world has achieved so much for humanty as have the public schools of the United States within the same 40 years. "You asked if a nation's efficiency

RHEUMATISM AND INDIGESTION. Practically all physicians and medical iters are agreed that there is a close

he came to think that the methods of popular education were wholly and radi cally wrong. Society was not to be composed in the future of professors lawyers, doctors and preachers. No sociefy of that kind had ever existed Most men, as always, since the dawn of

civilization, were to be farmers; shephords, orchardists and mechanics. "Why not get them ready in child hood, Pestalozzi asked, for the lives they mean to follow? I told a young teacher once," Dr. Claxton continued, was well for her to remember that most of her pupils would follow in the footsteps of their fathers and mothers. "Oh, don't say that,' she exclaimed

the first principle of Pestalozzi's sys tem-training going along with infor

mation, skill and knowledge. In his youth, largely through the influence of Rousseau, the SwissFrench philosopher,

in horror. I hope many of them will go to India as missionaries.'

"The ideas of Pestalozzi were adopted slowly," Dr. Claxton went on to say, "but at last were accepted throughout Central Europe. They have crossed the Atiantic and are making headway in many parts of this country. I believe in them and in what I call a democracy of education that will prepare each boy for what he can do the best

"The time is coming, I feel certain, when nobody will look down on any body else and no one will cringe in the presence of another because of the silly selief that occupations are graded as to their respectability. Who is the most important man on a railway train, the conductor, the engineer or the fireman ? It takes all three, as I know, to carry me from Washington to New York. And unseen section men make the track are.

Attacks on the Schools.

"An eloquent minister can't fill chursh in zero weather if the sexton habitually lets the fire go out. Nor can competent sexton do much business if the man in the pulpit is dull, narrow and half asleep. I admire a first-rate carpenter, but sympathize with a second rate inwyer. The carpenter found his jub. The lawyer didn't. Vocational training will prevent the mistakes that are filling the trades and professions with workers who do not fit into the places they are vainly striving to oc-

"I don't want less education but more of it. The material progress of a nation, as I have pointed out, is in pro-portion to the education of its citizens. It has been so in all history. Switzer land, Holland and Scotland are, relatively, more prosperous thau Germany. which has been kept back because of the burden put upon it by an immense standing army. Armies and progress don't go together. The moncy spent on the military and naval establishments of the United States would feed and clothe 6,000,000 children. And send them to message that a Democratic government, school."

"You know, of course." the interviewer remarked to Dr. Claxton, "that fault has been found with the public schools?"

"And I reply," he answered, "by say-ing that within 40 years the public schools of the United States have edu-cated out of greater or less illiteracy 90,000,000 American citizens.

At the same time the public schools have reduced the illiteracy of the white people of the country from 12 per cent to 3 per cent; and within 50 years have reduced the illiteracy among the ne-groes more than 95 per cent to about
