

70,000 Satisfied Users Endorse DELCO-LIGHT

DELCO-LIGHT

Air Cooled. No water used.
One place to oil. No carburetor.
Suction fuel feed.
Runs on KEROSENE,
Gasoline or Gas.

Over 70,000 Satisfied Users—that's a big point in favor of DELCO-LIGHT—the complete electric light and power plant.

Delco-Light users are enthusiastic because this is the plant that gives them maximum service with little attention and minimum cost.

A gallon of kerosene will give four times as much light, (electric light), when used for fuel in a Delco-Light plant, as it gave with the inefficient coal oil lamp.

More than 4,000 Delco-Light plants were delivered to the U. S. Government for war work. Delco-Light was specified for this service because of its kerosene burning engine and because it is successfully air cooled.

There are thousands of Delco-Light installations in towns and villages. Delco-Light in the store, garage or small town hotel means bright, clean, safe electric lights to attract more and better trade.
