The Best Town. My daddy's been to Galveston, An' Corpinus an' Bobstons, An' Waco an' to Dallas, An' he's been all aroun', An' always when my dad gets home An' stomps into the hall, I hear him tell my mother, "Home's the best town of all!"

And then he stands down in the hall With his back to the stair, An' he thees thinks I'm fast asleep, Or gone away somewhere; An' mother sees me and she smiles, But my dad don't suspec', Until I jump right out at him With my arms round his neck.

An' then he jumps and hollers An' gets me by the hands, An' swings me way around in front An' then he understands; An' then he swings me way up An' hollers, "Now you'll fall!" And then he hugs me tight an' says, "Home's the best town of all!" -Judd Mortimer Lewis in Houston Post

MRS. DOOLEY'S ADVICE TO WORKING GIRLS

Milwaukee, Wis.—"I wish all girls who seek aid and relief from functional disorders would profit by my advice and take Lydia E. Pinkham's Vegetable Compound. Before I was married, when I came home from work at night I would be just worn out with pains which dragged me down. I took Lydia E. Pinkham's Vegetable Compound and it made me feel like a new woman. I can work from morning until night and it does not bother me, and I wish all girls who suffer as I did would try Lydia E. Pinkham's Vegetable Compound."—Mrs. H. DOOLEY, 1135 25th Street, Milwaukee, Wis.

Working girls everywhere should profit by Mrs. Dooley's experience, and instead of dragging along from day to day with life a burden, give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound a trial. It has overcome just such conditions for thousands of others, and why not for you? For special advice, write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of their 40 years experience is at your service.

Germany Steal Invention. Paris, July 20.—The gas turbine, which a large German company is reported to be manufacturing, is, it is claimed here, a practical application by Germans of French discoveries. The principle of this turbine was worked out by French inventors but the trials and experiments were interrupted by the war. Briefly, the engine consists of a spherical combustion chamber to which vaporized gasoline and air are admitted by separate pipes and exploded, as in the ordinary gasoline motor, by an electric spark. Another pipe conveys the jet of gas against the vanes of a turbine enclosed in a metal casing to which the propeller is directly attached.
