ORVIS ROS' REPORT.

33.05. Other months were as to 60 points up on the close, July closed at the top and the new crops were very near the highest. Widest gains on the new crops were 58 to 68 points. October teading up to 33.31. Covering of the abort interest furnished a good part of the demand.

July still stood far under spots, even though spots were unchanged today at 39.75 for middling while contracts were at the advance. The discount on July as compared with roots was actually the secret of the strength of the contract market.

Weather conditions were considered favorable except for the showers in Tessa and the outlook was for continued favorable weather, but this was offset by renewed boll weevil complaints from several States. In the early trading a private condition report of 71.1 per cent of oursal caused some selling but it was not kept up after another report of 70.7 made its appearance.

Opening bids: July, 38.19 bid: October, 25.55: December, 31.85: January, 31.22 bid: March, 30.70. Market steady.

The cotton market closed steady at net advances of 58 to 99.

Money Eases Off

Events over the week-end were mostly

of a character to chill bullish sentiment, July even if the technical position of the market had warranted constructive cffort. Returns of the Federal Reserve Banks plainly indicated that the process price of the maturing month and misl-dling quotations in the South, but the of deflation had made little headway and strength of July made itself felt in the industrial developments were far from

> Regardless of general expectation, however, monetary conditions inclined to improve. Call money eased from its opening rate of 9 per cent to 7 per cent before the close, and a fair amount of time funds were offered at 8% per cent, but there was little demand for merchants paper.

Steel, equipment, oils and chemicals led today's irregular reaction, motors, metals, tobaccos and shippings being less severely affected. Intermittent selling of rails added to the general re-DAILY COTTON TABLE.
