Catarrh Germs Die In Medicated Smoke

Dr. Blesser, of Atlanta, Ga., who has devoted over forty years to the study and treatment of estarrhal diseases of and treatment of estarrhal diseases of the nose, threat, ear and lungs, is the originator of the only thoroughly ef-fective method of eradicating estarrh. His method consists of a combination of germicidal, healing and soothing medicines prepared in a form to be smoked just as you would a pipe or signrette, but, of course, containing so tobacco. Dr. Blosser's method thus 'smokes out" the catarrh germs in very much the same way you would amoke out bees from a hollow tree. It is the

only possible way to get at them.

Dr. Blosser explains that a salve, spray or vapor prepared from identically the same medicines which he need would reach only a small part at best of the long winding and complicated air passages, and hence would be ineffective, whereas, his medicated smoke is as light as the air, goes wherever the air and germs can go, reaches every nock and corner of the respiratory tract, enters every cavity and sinus, fills every tube and chamber of the nose, head, inner ear chambers, threat larynx, bronchial tubes and lungs. Even the gavities or sinuses of the cheek bones and frontal sinuses above the ayes, and the Eustachian tubes and the inner ear chambers, all of which communicate with the nose and throat, are thoroughly reached by the medicated smoke, the germs of catarrh are eradicated and the delicate membranes are soothed and healed.

If you know anyone who is afflicted with extarrh, chronic cough, hay fover, asthma or catarrhal deafness, or is subject to frequent colds, you will de them a priceless favor by alipping and malling this announcement to them.

Any well-stocked drug store can supply Dr. Blosser's Remedy in pipe or eignrette form, or will order it for you. Satisfactory results are absolutely guaranteed by a genuine, money-back offer, you being the sole judge, A trial package will be mailed postpaid to any sufferer for ten cents (coin or stamps) to prove its delightful and remarkable affectiveness.
