

Bad Taste in the Mouth

Dizziness, and a general "no account" feeling is a sure sign of a torpid liver. The remedy is Simmons Red Z Liver Regulator (The Powder Form). It exercises its greatest restorative effect in the liver, yet it is effective in the stomach and bowels. Indigestion, constipation and their attendant evils disappear before its powerful, regulating influence. Try its wholesome purifying properties. It will give you a good appetite, sound digestion and make you feel well.

Sold by Dealers
Price, Large Package, \$1.00

Ask for the genuine with the Red Z on the label. If you cannot get it, remit to us, we will send it by mail, postpaid. Simmons Liver Regulator is also put up in liquid form for those who prefer it. Price \$1.00 per bottle. Look for the Red Z label.

GOOD PRICE FOR TOBACCO

The Durham Tobacco Market Opened Yesterday—County Schools Open

Durham, Sept. 4.—The local market was formally opened yesterday with good sales, and the prices were above the average. While the warehouses have been handling tobacco for more than a week, the formal opening was not until today, and this was without a blare of trumpets, the only difference being that it was the formal opening. There was quite a quantity of tobacco on the market, and the prices were such that all the farmers went away well pleased with the prices received. There has been little except the primings offered, this bringing an average of 1 1/2 cents per pound, which is considered above the average. The three warehouses are well prepared to handle this year's crop, and there are many buyers anxious to put in their bids. The crop this year promises to be very good in color, but off in weight. The local warehousemen are expecting to handle at least ten million pounds this season.

Monday, Labor Day, passed off quietly and pleasantly here. The Typographical Union gave an elaborate barbecue at Lakewood Park during the afternoon, at which quite a number of invited guests were present. There were a number of short speeches made by those in attendance, the principal one being by Mr. C. F. Koonce, of Raleigh, who was the guest of honor. The most important event of the day in the city was the golf tournament with teams representing Raleigh and Durham competing for the honors. Raleigh had won the first tournament between the two clubs which was held on the Raleigh Country Club links July 4, and that victory was so decisive that they came up here expecting to win again. The Durham players were anxious to retrieve the defeat and played the game like veterans, winning by the score of 15 to 8. The highest score made was by John Sprunt Hill of Durham, who made the eighteen holes in 89. The highest score made by Raleigh was by Mr. Primrose who went the route in 94. That night the visitors were given a banquet at the Commonwealth Club by the Durham Country Club.

Two-thirds of the county schools opened Monday, and from the reports received by the county superintendent, the attendance on the opening day this year breaks all records. Some of the schools had an increase of from fifty to one hundred per cent. By the middle of the month all the county schools will be opened except in Patterson township, which begins about the first of next month on account of the large cotton crop in that section. The city schools were to have opened Monday, but they were delayed one week on account of the incompleteness of the new buildings. These schools will open next Monday.

The board of aldermen has declined to accept the new trolley street sprinkler until the company that sold it to the city remedies certain defects in the trucks, and make it so safe a gauge that it will fit the car tracks of the city. The board has also decided to send a man to Paris, Texas, and Nashville, Tenn., to investigate the central slaughter houses of those cities with a view of getting the best points in use to be used in the establishment of a slaughter house in this city.

The matter of securing a new courthouse and prison for the county and city has practically been abandoned for the present. There is no doubt that new county and city buildings will be erected within the next year or two, but now there will be nothing done, unless possibly a new cell added to the present jail.

INCREASE IN FELDSPAR AND QUARTZ PRODUCTION

Output of Feldspar Greatest in History of Industry. Quartz Shows Greatest Gain Since 1907.
The year 1911 showed the largest production ever recorded in the feldspar industry, the output being greater by 991 tons in quantity and \$20,064 in value than that of 1907, the year of maximum production until 1911. The production in 1911 according to a report on feldspar and quartz, by Jefferson Middleton, just issued by the United States geological survey, was 92,700 short tons, valued at \$579,008, against 81,102 short tons, valued at \$502,452, in 1910. In 1911 deposits in California, Connecticut, Maine, Maryland, Minnesota, New York, North Carolina, Pennsylvania and Virginia, were worked. Maine led all the other states in quantity produced, with 25,976 short tons; New York was second, with 18,800 short tons; Connecticut third, with 16,497 short tons; Pennsylvania fourth with 13,284 short tons; and Maryland fifth, with 12,694 short tons. The principal use of feldspar is in the manufacture of pottery, enamel ware, enamel brick, and electrical ware. Of these the most important

(Miss Julia Lathrop.)

U. S. CHILD BUREAU OPENS.
The Children's bureau of the department of commerce and labor, the newest branch of the government work to be opened, was started on its career this morning. Miss Julia Lathrop, who was recently appointed as its head, took charge of the office in Louisiana avenue. The children's bureau will look after the many phases of child life in the United States, and will follow the American child through school and will find out what it needs and what it gets.

is its use in the body and glaze of pottery and vitrified sanitary ware, in which it constitutes from 10 to 35 per cent. Its value in pottery lies in the fact that it melts at a lower point than the other ingredients and serves as a flux, binding the clay and quartz particles together. In glazes the percentage of feldspar used is higher than in the body and runs from 30 to 50 per cent. Other uses of feldspar, which do not require the high grade demanded by the pottery trade, are in the manufacture of emery and corundum wheels, where it serves as a flux; in the manufacture of opalescent glass; as a poultry grit; as a constituent of roofing material; and as ballast. Small quantities of the purest grades of potash feldspar are used in the manufacture of artificial teeth. For this purpose it brings the highest prices—from \$6 to \$8 a barrel of 350 pounds. It is also used in the manufacture of scouring soap and window wash. The use of feldspar of the lower grades for poultry grit, roofing, etc., seems to be on the increase, and in 1911 a small quantity was used as railroad ballast.

Quartz Production Increases.
In 1911 the production of quartz was 86,823 short tons, valued at \$151,122, an increase in quantity of 23,246 tons and in value of \$42,635 over 1910. The increase in quantity with massive crystalline quartz, the ground material decreasing in both quantity and value. The production of quartz in 1911 was the largest during the last five years except that of 1905, when the output was 121,459 short tons, valued at \$133,374.

Quartz occurs in many different forms, such as sand, tripoli sandstone, and quartzite. In some forms, such as rose and smoky quartz and amethystine quartz, it has a gem value. The figures on quartz production issued by the United States geological survey deal only with massive crystalline quartz, with flint, and with quartzite that is used for other than building or paving purposes. These grades of quartz are used in the manufacture of pottery, paints, and scouring soap and as wood filler. Considerable quantities of ground quartz are used in the manufacture of paint, in some cases as much as one-third of the total pigment consisting of this material. Quartz crushed and graded to various sizes is used in the manufacture of sandpaper, sand belts, as a scouring agent with sandblast apparatus, etc. Blocks of massive quartz and quartzite are used in the chemical industry and as a flux in copper smelting. Ground quartz is also used in filters and in tooth powders and by dentists as a detergent.

A copy of Mr. Middleton's report may be obtained free on application to the director of the United States Geological Survey at Washington, D. C.

To Mothers—And Others.
You can use Bucklen's Arnica Salve to cure children of eczema, rash, nettle, chafings, scaly and crusted humors, as well as their accidental injuries, —cuts, burns, bruises, etc., with perfect safety. Nothing else heals so quickly. For boils, ulcers, running or fever sores or piles it has no equal. 25cts at King-Crowell Drug Co.

Repels Attack of Death.

"Five years ago two doctors told me I had only two years to live." This startling statement was made by Stillman Green, Malachite, Col. "They told me I would die of consumption. It was up to me then to try the best lung remedy and I began to use Dr. King's New Discovery. It was well I did, for today I am working and believe I owe my life to this great throat and lung cure that has cheated the grave of another victim." Its folly to suffer with coughs, colds or other throat and lung troubles now. Take the cure that's safest. Price 50 cents and \$1.00. Trial bottle free at King-Crowell Drug Company.

ABOUT BEEF CATTLE

Southern Railway Issues Booklet for Southwestern Farmer.
Atlanta, Ga., Sept. 4.—With the view of encouraging the southeastern farmer to put the whole farm to work by introducing beef cattle in the system of farming and to give practical aid in this work, the Southern Railway Company has just issued an attractive booklet giving valuable instruction on the feeding and management of beef cattle. The booklet calls attention to the fact that only about forty per cent of arable land of the southeastern states is being used, and declares that by the introduction of stock raising the remaining sixty per cent could be made to return handsome profit and the land greatly enriched. Prof. R. S. Curtis, of the North Carolina experiment station, and Prof. Dan T. Gray of the Alabama experiment station, both eminent au-

thorities on animal industry, contribute articles to the booklet which set out in detail the methods to be pursued in feeding and handling cattle to secure the most profitable results. The Southern Railway desires to give this booklet wide distribution throughout the south, and copies will be gladly mailed to those interested on application to F. L. Word, live stock agent, Atlanta, Ga.

President Gives \$200 to Unitarian Church.

Milbury, Mass., Sept. 4.—The pastor and trustees of the Unitarian Church here are rejoicing over the receipt of a check for two hundred dollars from President Taft. The letter accompanying the gift says the money is given because of the president's mother's interest in the church during her life. Miss Della Torrey, the president's aunt, is a member of the church.
