A Wonderful Baby. The wonderful baby, I cannot deny it. The loveliest, sweetest that ever was made.

UNITED AT LAST. 'Yes, I suppose it's all very fine and grand, but I believe I'd rather Eddie had taken a fancy to some one who wouldn't have felt himself too fine and grand for her pa and ma.'

The Storey girls were his warmest admirers. Minna Storey was as bewitchingly beautiful as the typical Eastern beauty.

George, Day after day she felt that she was stifling and hardening before the icy breath of her mother-in-law's constant surveillance.

It was astonishing how easy it was to get on with Mrs. Le Roy after this. Sometimes, indeed, Eddie wondered whether her former husband had not been kinder to her than he.

The Cross-Eyed Children. Nobody can tell who has not watched it what an effect a physical deformity has upon the mind and character of a growing child.

The Production of Opium. The use of opium as a stimulant seems to be steadily growing throughout civilization, having greatly increased within a few years, even in this country.

Sarcastic Wit. At a recent dinner of the Massachusetts medical society, in Boston, President Eliot, of Harvard College, in an amusing speech, called the attention of the doctors to a peculiar disease existing among the students of Harvard.

Fish Raising for Market. At Half-Way, a station between Auburn and Syracuse, N. Y., are the Perry fish ponds, where brook trout, salmon trout and California trout are raised for market.

A Natural Soap Mine. On South's Creek, in Hancock county, Nev., there is a most remarkable stratum of stearic matter horizontally in a steep bluff of volcanic matter.

The Food Question in England. In a letter from London, Mr. Louis J. Jennings, discussing the food question in England, says: 'A large place in Oxford street has been taken for the sale of American beef, although it is my belief that every butcher sells it, charging for it the price of English beef.'

Europe's Crop Prospects. The calamities of Central and Eastern Europe seem likely to be supplemented by a season of dearth, consequent upon the unfavorable state of the crops.
