Talbott's Patent Spark Arrester, The Invention of the Age.

The Invention of the Age.

It does not destroy the draft, it does
not interfere with cleaning the takes. It
will not clocke up, and requires no cleaning.
It requires no direct ('ampers to be opened
when rising steam (dampers being objectiomable, as they may be left open and allow sparts to escape.) It requires no water to extinguish spacks, which, by condensation, destroys the draft. Besides, when
water is used, if neglected, the efficiency is
destroyed by evaporation of the water, and
the boiler is kept in a fillip condition. It
is simple and datable and can be relied
upon. It can be attached to any boiler.

No planter should be without one of
them, insurance companies will insure
gins and barns where the 'Inbut Engines
and Spark Averters are used at same rate.

and Spark Arresters are used at same rate as charged for water or horse power. \$\overline{\pi}\$ Send for illustrated circulars and price list. Bynum Manufacturing Company, L. B. BYNUM, Agent. Puttsedro, n. c.
