RAILROAD TROUBLES.

The Governor has called the attention of requested him to examine the question of attacking the lease of the North Carolina Railroad by the Richmond and Danville. In view of the fact that the corn crop of central North Carolina is an utter failure, while that of the eastern counties is most abundant, to shut up that section from the centre will prove to be a great hardship.

The Governor has instructed the Attorney General to examine into the manage. ment of all railroads chartered before the war, in order to see if forfeitures have been incurred, with request that legal steps be at once taken to have such forfeitures declared .- News and Observer.

That's right! The Richmond and Danville Railroad Company has almost obtained a monopoly in this State, and is using its power in a most harsh and exacting manner. It is generally believed that they obtained their lease of the North Carolina Railroad by bribery and corruption, and their entire course since that course railroad companies and individuals will work for the advancement of their interests, and it is quite natural that the Richmond and Danville Company should wish to make all the money they can, but it is equally natural that North Carolinians should object to becoming the victims of their extortions and exactions.
