INSANIFY.

The Great Interovements that Have Taken Place in its Treatment.

It is very satisfactory to note, if one disordered brains, between the practice and suitable visitors.

of this generation and of those preced-

ing it. Our exciting life is one that produces proves the trath of the conception that great mental activity, frequently resulting in mental disorder, and our exciting of the physical brain, and not an unalenough to disturb the organization of totally sound brains that would keep achievements of the age have been many up with their discoveries and advance ments. Thus the increase of insanity has been so large as to cause it to be pover of an esthetics, in all the marvels seen that the cases are by no means that make us tremble at thought of confined to hereditary ones, but that what the future may accomplish, the the sad trouble is one to which, if all past having done so much-but in are not liable, none are, at any rate, to nothing has it done a greater or more the, in which put a gill or so of milk consider themselves strictly exempt. In beneficent work than in making life this view, the subject of the treatment cease to be so heavy and so black a burof those of disordered nervous centres den on those whose mental force is like and unsettled intellects comes home to a monarch born in the purple, but overus all, and as a matter of vital import- come by disaster, and left naked to his ance, since if we have not charity enough to make it important for the sake of others whom we do not know or inmajority among the insane, and among load of life at last too heavy to bear,

and have broken down beneath it. already so starved as to produce the by all his post horses." disorder, and the sufferer, in conjunccrease the quantity of blood in the Onoroto, the Capachin, which we have system, and fill the delicate and minure come across in a curious old Dalian In old times, too, the patient, if refrace the addressed as follows : "Speak," he tory or violent, was subjected to corporal said, "speak and tell me whether you vas whipped. But the one who now a judge's cap, exclaiming at the same the oldest of all, but the crib, the to which he exclaimed, "Were you not padded cell, the strait jacket, were the head of one of these light minded thought in their day to be merciful include sels whose every thought is given provements. Where they are still used to their competities?' Then tuking a it is as the properties of those serry end from his sleeve, he placed it upon times, and not altogether with approval. the hideous roles of humanity, crying Possibly there are violent cases in which "Miserable head, where are now the some of these restraints cannot be enclosoft, languid glances that used to captirely dispensed with, but they are tiva's the unwary? Where is that found to be of rare occurrence compara- beautiful mouth which formed such tively, and, after a little, faithful and fascinating snalles? Where are now patient attendants are found to have the pearly teeth-where the rangemost requisite restraints in their own where the cosmetics with which the firm and gentle and re-assuring tones take was so effect painted?" And so and gestures. The attendants are paid on in this strain, the Capachin continfor patience-for patience, not for ned, describing all the various condiknowledge or skill, since the physicians mous of tife, and altering the position have all that, it is to be supposed. They of the skull, which he held in his hand, find by exercising this patience that a cording to the subject with which he rationality.
