Old Men.—There is a mile in this county that is 36 years old and still does as much work as ordinary miles. It was raised by the late Rev. William Snipes and belongs now to his widow.

A Novel Rat Trap.—Mr. Henry Fields, of this township, having been very much annoyed with rats in his barn, recently resorted to a very novel and successful way of killing them. He placed a large stone pot about half full of water in the barn and in the jar next morning he found 32 dead rats.

MARRIAGE LICENSES.—During the month of November 13 marriage licenses were issued in this county, of which 11 were to whites and 2 to blacks. This is a considerable falling off from the same month of last year, when 22 licenses were issued, and yet this year all the crops are so much better than last year.

TEACHERS ASSOCIATION.—The Chatham county association of white teachers, which was appointed to meet at Love's Creek church on the 11th of last month, was postponed to meet in the court-house at Pittsboro on the second Saturday in January next. The colored teachers' association will meet at Haywood on the 25th day of January.

TRANS-GARIN DAY.—Last Thursday being Thanksgiving Day was observed as a holiday at this place, all business being suspended and religious services being held at the Episcopal and Methodist churches. At the last of which was fair held by the ear of man in his body and swallowed. This is the largest of these balls that we remember to have ever seen. It is 18 inches in circumference and weighs 11 oz. The surface is very hard and the general resemblance to a rubber ball.

Mo. Gazetteer.—The 25th District, composed of the counties of Moore and Randolph, sends to the Senate the youngest member of that body Mr. J. C. Black of Moore. We understand that a colored man by the name of Josephine, professing to be a "witch doctor," met up with every bad treatment the other day, by some of his color, who beat him up body—C. E. Alfred's cotton gin and race was burned on the 25th inst. The loss was between six and seven hundred dollars. It can't be in the interest of mankind to burn down the gin.

Wassell as surety.

The Chatham Tribune, Raleigh, is now getting the full benefit of the Chatham people, and various from this county, filled with all kinds of country produce, are pouring into that city every day. For the past two or three weeks we have frequently seen a dozen or more wagons the same time passing through here. During the past few days many of these wagons are loaded with pack, which is hauled all the way to Raleigh by teamsters and a labor price that is not offered here. It is felt that our neighbors in Raleigh do us much Chatham produce to be handled there just now, so that they are bound to go on with the work of the community until after the election arrives. Testimony to certain political aspirations in the neighborhood since been taken, and a hole stays in the internal revenue system which nothing can repair.

Newbern Guard: At Bell's Ferry, a fool Brooks, a soldier, a gun, band employed at the post of C. M. Grimes while drunk and while out in packing was going on, got in the press, unknown to the packers, to sleep in his arms and was pressed into a hat of cotton, flattening his head as flat as a flounder. On taking the balance of the press, a show was observed in it, which being removed, the rest of the people of the dead negro. Some and others came to the scene of the accident, and were awaiting his arrival.

W. H. Leonard: The Society of St. Luke's Hospital, 2 P. M. W. H. Leonard.

T. W. Southern: Mr. Long will sweep our thanks for a favor of watercolor painting last Sunday morning. Though the same for me has long passed, yet this one was in a good state of preservation and was very good to the taste.

Saturday evening, at eight o'clock, the home of Capt. T. W. Rutherford, this county, was passed by Miss Caroline Grimes, of Robeson county, a lady of 85 years of age. — We noticed last week in Farmer's Hall, among the articles on exhibition, a toy steamer, about two feet in length, with side wheel. The tiny propellers gave it the motion of a real spring, and the boat was capable of sailing up and through the water just as a large boat is now.

This ingenious piece of mechanism was the work of a little boy, — We noted last week in Farmer's Hall, among the articles on exhibition, a toy steamer,
