rounds of the press to the effect that a Georgia lawyer has a case, the head of which is carved to represent the head of a duck, holding a \$650 sapphire in its bill, and with two diamonds worth \$7,100 each for its eyes. "It may be true," the affable young man having charge of the cane department in a large jewelry house said; "but the figures are pretty steep. It is not an infrequent thing for men to come in here and order canes that cost \$500 or \$600, rold heads with jewel settings, you understand; but a \$14,750 cane is rather beyond our experience. For ordinary sale the canes we keep in stock do not run over \$120. We always have on hand a cord or so of canes that run from 860 to \$120; "Goldheaded presentation caues?" Yes, we sell a good many of them, but hardly ever to the out-of-town buyers.

Our more expensive cames are these in which artistle fancy enhances the value of the gold. Here is one, a modified shepheral's crock of hammered and chased Roman gold, the greatest peru-Barity of which is its prior \$115. This hammened crutch head of blended red and yellow gold is worth \$120. Here are a lot of new designs, Indian and Persian fauries, unique, and some of them pretty, that run from \$60 to \$115. They are made of gold. the beauty of which is that it was putthrough certain chemical treatments anything but gold. This one, for instance, that had a like steel, is gold, control, and as in that any consulting a rat. This statement holds true, more ever, and so is that one resembling a rel enamel, rome of these, light ones, were made up as cheap as \$50, but we have none so low-priced on hand now. These very dainty little square crock gold-headed cames, or switches rather, we sell as cheap as \$1- to \$10.

From these let us pass to the silverheads. Of them we have a great variety, from \$3 for a plain hangaerol silver bull up to \$25 for a large one of the new st fashion, which is a instation of an old fushioned back horn handleyer \$75 for one like this; which is, as you can so, a combination of adver, gold, and copper that loot like a soft of marble metal. There  $\mathbb{I}_{2}$ wide diversity of styles in silver heads. some of their, is you will notice, the plainest possible is "deep treah" or shaple bad-on 1 others full of taney and exquisite w charanship. There is by silver choics, that we sell for \$25. A man same manore the other day offering for sale a couple of cames that Mount Diable went down to \$2. When pieted ones, 1 don't see how they i

"The autorials e craffy It is often in the writer, difficult to one gill of milk and ball a reaspoonful Frazier say that it was a good short, some and costly canes hade in Mexico and I never slept a wink for a week. from some animal substances, clarified I grabbed the Append the first thing as the Mexican saddle wats sometimes every morning; when I saw her keel are, and inlaid with silver. General ing material may be cept on hand and supplied to the hers to method, an old chicken coop will answer for a box, cut a hole in the top, place over it a half barrel, and not this fit a common the pen for fear you might dose him twice, which would be dangerous, as the add is possenous in large doses. If they are not all well in a week re-ture assenues in the contacting supplies and the contact of the contact of the source of the mat the dose. I never had to repeat Nevada, and if the market don't take a them to order. Of course we keep no We don't have so much call for fancy carved ivory and solid imitation silver heads, monkeys' and dogs' heads, and birds and such things as we used to do. People seem to go in now for rare and fine sticks, lasting and reliable ones, and the cane dealer who wants to keep up with the times must have an almost infinite variety of sticks from all parts of the globe. Eve seen one, a plain rough stick, without a fer rule, and only a bent crook at the top, that was said to have been worth \$17, 000 when it came into the country. It was hollow, and had diamonds packed in it. That was several years ago. 1 gness the custom-house chaps have dropped on that dodge. Anyway, I never hear of its being played now. I have seen a German cane with a flute in it, and mother that would held a good drift of schuapps, and one that was a pipe when you took off the ferrule and a cap on the head; but all those things were more eccentricities. We are never called on to make such things.

HOSTETTERS Law and usage have united to give the president of the dict a position. A paragraph has been going the widely different from that of the "speaker" in England of America, 11.5 powers are in some respects more, in other less, extensive. He appoints no committees, and is therefore without that opportunity to reward friends and inducee legislation. He can with difficulty create processings by his culings, and contributes little to the body

of parliamentary low. Even his pewers of discipline and police are to a considerable extent shared by the vicepresidents and the secretaries, who are consulted in every serious crisis. Put on the other band he has no bitle influence in shaping the course of debate. through the practice, which note bebut selden is centerted, of fixing the "order of the day," or programme of business of carli settion. The ratio of ambition contors is much smeller in a German Dian in an American purlisment. Presedence is 1-s auxiously

considered; time consist for less; and there is here wanned by ever points of order and pressure: A debute is a very formal affair, the names of those who desire to splak being commently submitted to the chair in relvance, and by him arranged into a convenient sues cession of pres and contras, who follow one another with depressing regularity, notch like hoys in a village lycence to general it may be said that while in Germany, as in America, the speakership is a mark of party confidence, it is not owing to the different conditions. or political life; th collast a stop tos ward higher honors, elective er ex-
