TOPICS OF THE DAY.

Mr. J. K. Parkinson, of Cincinnati who was recently admitted to practice In the supreme court of the United States, is probably the only deat and dumb lawyer over admitted to that court. He has had an extensive practice as a patent lawyer, and is said to be both accurate and ready.

A few years ago a chiluncy made of paper would have seemed a prepostercus absurdity. Yet a chimney of paper pulp, nifty feet high, has lately been put up at Breslau, in Germany. Comcossed paper pulp is one of the least instanomable of substances, and is now generally recognized as superior to iron as a material for irre-proof doors.

The combined efforts of four policemen were recently required to carry into the House of Commons a petition in faver of closing public houses on sunday -one of the largest documents of the kind ever presented to Parliament. It contained 590,332 signatures upon a continuous roll of paper, which was 4832 yards long and weighed 350 pontials.

One Robert Griffin, of London, iafraid that the earth will not be large enough to hold the inhabitants it will have some year (hence. The New Orleans Phonymue suggests that Robert iliving in a very errowded part of the world Set here down on an American grainie and he will not tool so bunched up in his mind as he does at the presint moment.

theomarganine, it seems, is not the only or the most disagreeable instation: of butter which finds a place in the market. There is an abouination called "sucine," made from the fat of hors. which was the cause; not long succd prostrating an entire family at Cleveland with trichinesis. The proper pont-himent for the vender of such an article would be to compel him to cat

THE LOST CHILD.

The inordal and legal response billing of parents, in the care of their child en is, for-tunately, attracting the serious attention of the botter portion of the entire county. The many instances of child bearing, oppression and other forms of emaily which have come to light demand that something be dom-and other forms of emaily which have come in the granifying to know that the people are becoming theorem of physical sco-lence or physical neglect matters not—the principle in both cases is the same. The man or worms who neglects in the transmission of works who have the same the principle provide the permits the introduct of grantian who permits the introduct of grantian who permits the introduct of distribution of the same results and for protection, is ermitably liable in the eyes of men. There are, however, parents who through carele sines or the ursancy of other duties, permit them to become the in-nocent victures of intentional vising, but the disatrons results spon their childran have been are truths which must be mainfest verific worthy parent and easy cetally in a vising as great. There are truths which must be mainfest verific where the uninnove effects of the at-terning where the uninnove effects of the at-mough function in mourn untimely leaves, even when the grantes in the locality in a vising as great. In Gotham, it is not easy to get at the actual figures. Those in Chinatown could probably be counted, or a fair guess made, anyway: but they don't all live in Chinatown, by any means. That place is merely their head-quarters. The number scattered through other parts of the city, chiefly with a view to laundry profits is larger I think, than could be counted in Chinatown itself. All the way from the Battery to Harlem, the whole eight and a half miles of Gotham's length. these unassimilating Mongolians are to be found. A few years ago, when there was an outery about a Chinese myasion, it was said the number in New York was not less than 3000. there has been a consilerable increase number might be put at 2000 for New There are no loafers among them, and no dead-beats, so far as heard from. The Chinaman's cardinal principle is to carn his living, which shows a vast abass of difference between him and some proud Caucasians. But then, if the can live on fifteen cents a day, the starts it into activity. It is much are very few, however, who don't pick up at least two dollars a day one way or another, and some contrive to make from three to five dollars. There is a notion I believe, that a great many regetative powers will be aroused (1) Chinese in Now York are employed as at in large heaps onlons will be some servants. There real picturesque acspoil, but if spread in this layers, counts of Fifth are ane ladies invading Chinamen for the domestic staff. But the number of Chinese employed in this way is really quite small not slide. If they were to provide proper | more, I am pretty sure, than a couple cont: Where such servants are sucployed, the pay is about the same that could white servants receive. The that $a^{(n)} = Ob_n y a^{(n)} = Spell it then." A breeder and feeder well-known to store about Chinese getting twice the subscripts are subscripts those interested in cattle matter wages of white servants are all neuroperative structures and the servants are all neuroperative servants are structure to the servants are structure to t$ sense. As a rule, where males are employed for household work, colored non are preferred. These are paid

from \$18 to \$25 a month, with board. i do not think that any Chinamon get more, and I hear that a good many female servants in private families get as much. It certainly is not as sercants that the Chinese interfere with the white labor in New York, and for that matter their interference, with it, is very little, any way -corr, Detroit Fre Pres.

The Wonderful Yosemite Falls,

No wonder the Indians, reverence

white settlers in the valley cannot resist their influence, but speak of them with an admiration that amounts to love. At the base of the great fall the fairies build a real ice palace, sometimes more than 100 feet high. It is this glittering palace of crystal, and the falling water striking upon it were in their glory. I had never seen from below, the Yesemite, though parently all on one plane. It is only when you reach some point from which you see it sidenous that you realize that the great upper fall lies fully a quarter of a toile further back than the middle and lower falls, and ing enscales till it reaches a perpendicular rock, over which it leaps about 600 feet, and then gives a third and final plunge of about 500, making up you can realize that the hight of Niagara is 162 feet, you will perceive that if some potent magician could bring it into this Yosemite valley, it would be effectually concealed by trees of fully its own hight, many far
