the languid, half-rested condition on self often dissinates these sensations. It is, therfore, desirable, if not essential, when nutriment is to be crowded, that the last thing before going to bed should be the taking of food. Sleeplessness is often caused by starvation. and a tombler of milk, if drunk in the middle of the night, will often put people to sleep when hypnotics would fail of their purpose. Food before rising is equally important and expedient. It supplies strength for bathing and dressing, laborious and wearisome tasks for the underfed, and is a better morning pick-me-up' than any
