

FOR FARM AND GARDEN.

How to Hatch Ducks' Eggs.

Ducks are poor sitters and poorer mothers—in fact the Pekins are almost non-sitters. S. t your ducks' eggs under hens, or in an incubator. Make the bottom of the nest of earth, and cover with hay or cut straw. After the first few days sprinkle the eggs daily with tepid water when the hen is off for food. Take the same precautions against lice as you would when sitting hens on hen's eggs. Ducks' eggs are generally fertile and hatch well. If the sitting hens or the incubators, attend strictly to business, you may count on from 90 to 100 ducklings for every 100 eggs set and they will "hold out," when you count them after they are hatched. Ducks' eggs in an incubator require the same degree of heat as hen's eggs.—[Prairie Farmer.

Potatoes Affected with Rot.

A few years ago the rot struck potatoes here: the first week in September, and nearly all the farmers dug their crops at once. The result was they had to keep picking over all winter, for many were so slightly speckled with rot when dug that they were overlooked. I did not dig my potatoes until some time during the first half of October. When I did dig them nearly half were so rotten as to be seen at a glance. I put the sound ones in the cellar and did not have to pick them over. I have practiced this plan successfully for years. Potatoes intended to winter should remain in the ground as long as possible without danger of freezing. Heat, I think, is what rots potatoes, and they will keep cooler in the ground than in the cellar.

When rot strikes potatoes, if they are dug at once many of the affected ones will be overlooked and put in the cellar with the good ones, causing them to rot also, but leave them in the ground until cooler weather comes and all the rotten ones can be seen and avoided.—[New England Farmer.

Night Transplanting.

It is claimed by some that trees, if transplanted at night, will do better than if reset in the daytime. We know that the sun has an influence upon certain plants and flowers, but to what extent it affects trees is not definitely known.

A party who desired to ascertain whether or not there is any difference between day and night planting, transferred ten cherry trees while the same were in bloom, commencing at 4 o'clock in the afternoon, and planting a tree every hour until 1 o'clock in the morning, and the result would indicate that the dark hours are better for the work than the light. Those transplanted during the day shed their blossoms, producing little or no fruit, while those planted in the dark maintained their condition fully.

He did the same with ten dwarf trees after the fruit was one-third grown. Those transplanted during the day shed their fruit; those transplanted during the night perfected their crop, and showed no injury from having been removed. With each of these trees he removed some earth with the roots.—[American Farmer.

Vertigo in Horses.

Horse vertigo or staggers is sometimes due to brain disorders, congestion, or the checking of circulation from compression of the jugular vein by a badly fitting collar. But the most common cause of vertigo is plethoria. The favored or petted horse is overfed, and then a little violent exercise on a warm day and in the strong glare of sunshine produces vertigo, the animal throws up his head, shakes it rapidly, or rears and falls backward, as you have described. If the horse is fat his diet should be restricted, and a rather laxative food should be given for a time. Avoid tight collars, and shelter the top of the head from the direct rays of the sun by a sunshade. When taken out for a drive in hot weather place a wet sponge between the ears and make fast to the head-stall or place under the lead on the top of his head. Should the horse be attacked while driving, stop at the first sign of dizziness and throw a handkerchief or blanket over his eyes to shut out the light. Then if cold water is obtainable, apply it freely to the head and neck. A few minutes' rest will bring the animal around all right. But the sunshade and wet sponge should not be dispensed with during hot weather if the animal is subject to vertigo.—[New York Sun.

Some Handy Cures.

The Secretary of the Connecticut Farmers' Association gives the following for publication, saying it comes from one of the best farmers in the state: I have seen once in a while in the papers how to kill ticks on sheep, to kill lice on cattle, to cure the gapes in chickens, etc. To kill ticks on sheep I buy a ball of snuff, three or four pounds, or enough to go over all the sheep at once; I cut the snuff and pulverize it on the table on a newspaper, put the snuff in a glass jar; I take the jar, a large pepper box and a tablespoon, and dip the snuff from the jar into the pepper box half or two-thirds full, then I take the sheep gently, lay her on her side, open the wool and shake the snuff on the skin in places three or four inches apart and close the wool. I put more of the snuff around the neck, and in about three days, if it is done well, there won't be ticks nor dirt to send a telegraph despatch. The snuff is a sure cure. To cure the colic in sheep, I dissolve two table-spoonfuls of epsom salts in

about a half pint of warm water and add one teaspoonful of essence of peppermint. I take hold of the sheep and back her to some corner in the barn, then open the sheep's mouth with my left hand, press the left thumb against her jaw, then put a small funnel in her mouth; the boy pours the salts while I hold the sheep. In about two hours the sheep will be all right; if she don't get well in two hours I repeat the dose. To kill lice on cattle I take about a pint of kerosene and rub it all over the cow with a woolen cloth then card against the grain and with the grain. Sure cure.

To cure warts on cows I wash the teats before milking and rub on castor oil. I rub it on before milking. It won't drop into the milk like water. It limbers the teat. I had a bull calf this summer, the cow's teats were covered with large warts so that they bled. I bought a gallon of castor oil, used the most of it on her all summer. The warts are all gone; the castor oil did it. The cure gaps in chickens' prevention is better than cure. The first year we came to this place, ten years ago, we brought out seventy-five chickens; they ran out doors and at the sink spout a good part of the time. That year the chickens had any quantity of gapes. Next year when we set the hens we put air stacked lime and sulphur in the nests, took the sink spout away, carried the slops and poured them under the apple tree and kept clean water before the chickens. From that year to this we haven't had a gap or a gape; as soon as the chickens came out we give them cornmeal mixed with water. Our neighbors have lots of gapes. I think dirty water is at the bottom of the trouble.

When to Cut Grass. The practice of most good farmers is to cut grass early, as soon as it is in bloom. The quality of the hay is not only better, but by starting early there is more time for cutting, curing and securing. In summing up the results of analyses of nearly all the cultivated grasses, the analytical chemist of the Agricultural Bureau says it is apparent that in most cases the time of bloom or thereabouts is the fittest for cutting in order to obtain the most nutritious and largest relatively profitable crop, and for the following reasons: The amount of water has diminished and the shrinkage will, therefore, be less. The weight of the crop will be larger in proportion to the nutritive value of its constituents. The amount of nitrogen not present as albuminoids, will be at its lowest point; fibre will not be excessive as to prevent digestion, and the nutritive ratio will be more advantageous. If cut earlier the shrinkage is larger, altho' the fibre is less and the albumen a little larger. The palatability may be increased, but the total nutrients to the acre will not be so large and the nutritive ratio will be more abnormal. The disadvantages of late cutting are evident in the increase of fibre, destroying the digestibility of the nutrients and the falling off of the albumen by conversion into amides. This is not made up by the largest crop cut.

To our hay-making readers, says the New York Independent, we would also commend this bit of timely and sensible advice from the New England Homestead: Cut the hay early when the crop is very light, plow, harrow well, broadcast on what manure you can scrape up (or any good fertilizer will pay) and plant to fodder corn or millet. Both crops will be off in season for fall seeding, when the manure made through the summer will come into good use. This is the best way to treat fields that are nearly ruined by the drouth of former seasons, unless you have manure and time enough to grow a hoed crop.

Routing Great Speakers. Some of the most experienced orators have been disconcerted by very trivial circumstances. Daniel Webster, rising to speak at a poultry show, was unable to continue in rivalry with a giant Shanghai which began to air its lungs at the same moment, and had to resume his seat in confusion. Erskine was always extremely sensitive to a lack of interest by his audience. "Who can get on with that wet blanket of a face of yours before him?" he said once to Garrison, who was engaged with him in a cause. His first speech in the House of Lords was a humiliating failure, owing to the action of Chatham, who, as a speaker began, took up a pen and made a few notes as if with the intention of replying; but after listening a few moments, he dashed pen and paper upon the floor with a contemptuous smile. This indifference, real or pretended, completely upset Erskine, whose "voice faltered; he struggled through the remainder of his speech, and sank into his seat dispirited, and a shorn of his fame." Burke was also extremely sensitive. Solwyn relates that he rose on one occasion, to speak, holding a bundle of papers in his hand, when a rough-hewn country member started up and said: "Mr. Speaker, I hope the honorable gentleman does not mean to read that large bundle of papers, and to bore us with a long speech into the bargain." Burke was so suffocated with rage as to be incapable of speech, and rushed out of the house. "Never before," says Selwyn, "did I see the fable realized of a lion put to flight by the baying of an ass."—[Gentleman's Magazine.

An Agreeable Climate. Montreal Lady (to American financier)—Do you not find our Canadian climate rather cold, Mr. Boodle? American Financier—Oh, not at all; it agrees with me. I left New York because it was too warm for me there.—[Texas Sittings.

QUAINT AND CURIOUS.

A North Carolina colored man has a head which measures 32 inches in circumference. An Englishman has written a pamphlet to prove the pedigree of the devil. He dates the old chap back 11,000 years.

Among the list of delegates to the Pennsylvania State Prohibition Convention appear the names of the Revs. Lusher and Booz. The skeletons of six men who must have been giants were unearthed the other day, along with much pottery in a big mound near Kanakake, Ill.

Immense numbers of stouts and wensels are being imported into New Zealand, in order that they may destroy the rabbits which are a pest in that country.

The appearance of women upon the stage appears to have been unknown to the ancients, and Charles II. is said to have first encouraged such a thing in England, in 1662.

Joe McKim, of Watkinsonville, Ga., has a rather peculiar form of neuralgia. He can walk, talk, ride, read or stand in comfort, but the minute he attempts to swallow anything, even water, he suffers most violent pain.

General Soubein Starke of J. Herson, Ga., born in 1801, and just now a shoemaker, has beaten the snare drum in four wars, beginning under Jackson at New Orleans, and going through the Seminole war, the Mexican and the war between the states.

James Goudie who is living in Evanston, Ill., claims the honor of having built the first ocean steamer, the Royal William, a vessel of 1600 tons burden, which was constructed at Quebec in 1832 and made a trip from Pictou to London the next year.

One of the largest plantations in the South is that of Major B. W. Blumny, in Jefferson County, Fla. It comprises 8000 acres and nearly all of it is in cultivation. More than 1500 colored people are employed on the plantation and the Major knows them all by name.

Mack Hamilton has recently performed some wonderful feats of eating and drinking at Helena, Ark. Besides chewing and swallowing large quantities of porcelain and glass without harmful effects, he drank a gallon of boiling water at a time as if he enjoyed it.

Eddie Williams of Franklin, Me., went hunting and the gun he carried "kicked" very hard when he fired it. A few days afterward he was taken ill and died. The recoil of the gun had caused a concussion of the base of the brain, producing partial paralysis of the spine and digestive organs.

The smallest baby in Chicago, was born a few days ago to Mrs. Danske, the wife of a teamster. The diminutive infant weighs sixteen ounces—one pound avoirdupois—and Mrs. Danske rocks it to sleep in the palm of her hand. The baby is perfectly formed and has a healthy pair of lungs.

During the time of the Emperor Nerva of Rome there were nine aqueducts which emptied themselves through 13,194 pipes of an inch diameter. That constructed by Louis XIV. of France for carrying the Brue to Versailles is 7000 fathom long with 256 fathoms of elevation, and contains 242 acares.

The violet was the chosen flower of the Napoleons, and the scarlet carnation of the English House of Stuarts. To this day mysterious hands yearly deposit at Frascati, and in St. Peter's in Rome, where lie the remains of the Cardinal of York and other members of the House of Stuart, wreaths of scarlet carnations.

A Twenty Years' Experience. 770 Broadway, New York, March 17, 1888. I have been using ALCOCK'S PLEASANT CURE for 20 years, and found them one of the best of family medicines. Briefly summed up my experience, I say that when placed on the all of the back ALCOCK'S PLEASANT CURE the body will be nervous energy, and thus cure fatigue, brain exhaustion, debility and kidney ailments. For women and children I have found them invaluable. They relieve irritations of the skin or cause the slightest pain, but cure sore throat, crampy coughs, colds, pains in side, back or chest, indigestion and bowel complaints. C. D. FREDERICKS.

Big Eaters. "The eaters of my time," wrote Careme, in 1837, "were the Prince de Talleyrand, Murat, Junot, Fontanes, the Emperor Alexander, George IV., and the Marquis de Cussy. Men who know how to eat are as rare as good cooks. Look at the great musicians and physicians," he goes on, "with enthusiasm; they are all gastronomers; witness Rossini and Boieldieu, Broussais and Joseph Hoque." The last-named backed this up with his treatise on "Edible Mushrooms," maintaining that doctors who make a name—Corvisart, Broussais, and half-a-dozen others—are epures for their patients' sake as well as their own. They can get a convalescent to eat when nobody else can—a fact which explains their success. Modern London, too, we are proud to say, can boast its successful medical gourmands. Do Cussy? It is vain to expect an authority from him—said that Leonardo da Vinci, Tintoretto, Paolo Veronese, Baccio Bandinelli, Guido and Raphael, were all noted gourmands—a fact which has not yet, perhaps, had its weight in estimating the naive abstinence of the pre-lapsarian, who might even have been a vegetarian almost to a man, to judge from the type of their landscape gardening. None of the foregoing great men had the beatitude of dying at table like some of the smaller fry. Dr. Gasfaldy, a man with a wit and a palate so often met with in the *Almanach des Gourmands*, died with a champagne-glass in his hand and a joke in his mouth. Grimod de la Reyniere's great-grandfather's death was exactly like a fit of laughter; his lips split wide with a yawn. Here is a fact for Mr. Galton: financial instincts, too, were hereditary in this family of farmers-general of the revenue.

Napoleon, as all the world knows, ate very plain food, and little of it, though always with hunger and rapidity. A little claret was all he drank; a single glass of Madeira would flush his whole countenance. He was neither an eater nor a judge of eating, wrote Careme, but he was grateful (was he?) to M. de Talleyrand for the style in which he lived. He differed widely from that poor Stanislas of Poland, who fondly studied onion soup in the inn kitchen at Chalon. Napoleon had a strange theory about his bile. There is no person who is not a man, can not get himself to be vain of, for one reason or another.

"Don't you know," said he to the Comte de Segur, "that every man that's worth anything is bilious? 'Tis the hidden fire. By the help of its excitement I see clear in difficult junctures. It wins me my battle!" Careme himself ate sparingly and drank nothing—a sort of Moses of the promised land by choice.

The skeleton Paganini was an appalling glutton, being only beaten in that by Cambaceres. Such men should be objects of pity alone, like the great Athenian chef, Archestratus, who ate enormously and digested with extraordinary rapidity. It could not have been assimilation, for according to Potho he looked as if the wind would blow him away, and one could almost see daylight through him. There is one dear old story that always comes up in talk about great eaters; it has been told of all sorts of guzzlers, from a city alderman to the judge of appeal at Avignon, under the ancient regime. "And then, sir, we topped up with a gorgeous turkey, a rich chop, bird-in-the-hand, a juicier—melt in the mouth—crammed with truffles to the eyes—bouquet is so word for it—left nothing but the bones." "How many were you?" "Two!" "What! only two?" "Yes, two. Why not? The turkey and myself!"—London Saturday Review.

Worthy of a Laugh. Eldest daughter—Mamma, who is this bright that the English papers notice so much? Literary mother (reclining on a sofa reading Joseph Cook's last lecture)—John Bright? Why, he's—he's—Let me see! Isn't he the man who invented Bragg's disease?

"I haven't had no lesson since yesterday," pouted Johnny. "That means you have had a lesson," said the mother. "What remembers what I said this morning about two negatives in a sentence?" "I do, I do," yelled the smart boy on the front seat. "You said two negatives made one infirmity."—Texas Sittings

GENERAL PREJEVSKY, the Russian filibuster, has set out with a band of Jossecker for Thibet, in the aim of reaching a pretext for Russia to reassert her boundaries in that part of the world.

A Horse Who Can Talk! Everybody has heard of a "horse laugh," but who has ever seen an equine gifted with the power of speech? Such an animal would be pronounced a miracle, but so would the telephone and the telephone have been a hundred years ago. Why, even very recently a cure for consumption would have been looked upon as miraculous, but now people are beginning to realize that the disease is not incurable. Dr. Pierce's Golden Medical Discovery will cure it, if taken in time. This world-renowned remedy will not make new lungs, but it will restore diseased ones to a healthy state when all other means have failed. Thousands can gratefully testify to this. All druggists.

Having seen their wild oats prematurely some rapid youths essay to reap the same with a bicycle. "As glasses were on his nose, flung in by hunters, spears and bows, and ere he was upon the rig, selects the object of his spring. Suddenness, in myriad forms fastens its fangs upon the human race. Ladies who suffer from distressing ailments peculiar to their sex, should use Dr. Pierce's Favorite Prescription. It is a positive cure for the most complicated and obstinate cases of leucorrhoea, an excessive flow of mucus from the uterine and vaginal openings, bearing-down sensations, chronic congestion, inflammation and ulceration of the womb, and all the various diseases of the ovaries, accompanied with "internal heat."

When a lady is sewing, she is in reality not what she seems. Don't disgust everybody by hawking, blowing and spitting, but use Dr. Sage's Catarrh Remedy and be cured.

It doesn't take a kitten long to win his purrs. WARNER'S SAFE CURE

1 has been before the public now about ten years, and in that time has proved itself to be all that it has been represented.

2 It is purely vegetable, contains nothing harmful, and DOES purify the blood and CURE disease as it puts the Kidneys, the only blood purifying organs, in complete health.

3 It Cures Permanently. We have tens of thousands of testimonials to this effect from people who were cured years ago and who are well to-day.

4 It is a Scientific Specific, was not put upon the market until thoroughly tested, and has the endorsement of Prof. S. A. Lattimore, M. A., Ph. D., Official Analyst of foods and medicines, N. Y. State Board of Health, and scores of eminent chemists, physicians and professional experts.

5 H. H. Warner & Co., do not cure everything from one bottle, they having a specific for each important disease. Fight shy of any preparation which claims infallibility.

6 The testimonials printed by H. H. Warner & Co. are, so far as they know, positively genuine. For the past five years they have had a standing offer of \$5,000 for proof to the contrary. If you are sick and want to get well, use WARNER'S SAFE CURE. GOLD IN WORDS 600 per doz. Pettit's Eye Salve in worth \$1.00, but is sold at 25c a box by dealers.

NERVES! NERVES!! What terrible violence this little word brings before the eyes of the nervous. Headache, Neuralgia, Nervous Prostration, Indigestion, Sleeplessness, etc. All stare them in the face. Yet all these nervous troubles can be cured by using

Paine's Celery Compound

For the Nervous The Debilitated The Aged. THIS GREAT NERVE TONIC. Contains the best medicinal ingredients of the Kidneys, Liver, and Blood, which always accompany nerve troubles. It is a Nerve Tonic, an Anesthetic, a Laxative, and a Diuretic. That is why it CURES WHEN OTHERS FAIL. Beware of cheap imitations for full particulars, WELLS, RICHARDSON & CO., Proprietors, BURLINGTON, VT.

Dutcher's Lightning FLY KILLER. In quick death; easily prepared and used; no stinger; flies don't live long enough to sting you. Use it early. Freshly rid the house of them and be free from all annoyance. "Just as good." There is nothing like the genuine Dutch. "FIRE!" "FIRE!" "FIRE!"

"OHIO" WELL DRILL. All cuttings of the drill in clay, and ground rock are discharged at surface without removing tools. Noted for surfs where others fail. Drill 100 to 500 feet, as desired. Price \$100. Catalogue Free. LOOMIS & NYMAN, TIFFIN, OHIO.

Improved Circular SAW MILLS EQUAL BEST AND CHEAPEST TO ANY. EXCELLED BY NONE. Manufactured by the S. A. M. IRON WORKS, SALISBURY, N. C.

Shot Guns. Revolvers, Rifles, Etc. JONES PAYS THE FREIGHT. Address: J. H. BINGHAMTON, N. Y.

ASTHMA CURED. The testimonials printed by H. H. Warner & Co. are, so far as they know, positively genuine. For the past five years they have had a standing offer of \$5,000 for proof to the contrary. If you are sick and want to get well, use WARNER'S SAFE CURE.

FRAZER AXLE GREASE. BEST IN THE WORLD. Sold Everywhere.

BLOOD POISONING. CANCER and TUMORS positively CURED. Address: THE HART MEDICAL CO., 111 N. 3rd St., Philadelphia, Pa.

TEXAS LAND & PORTER, Dallas, Tex.

WEBER PIANO-FORTES. ENDORSED BY THE LEADING ARTISTS, SEMI-HARLAN, AND THE PRESS, AS THE BEST PIANOS MADE.

Price as reasonable and terms as easy as consistent with thorough workmanship. CATALOGUES MAILED FREE. CORRESPONDENCE SOLICITED.

WAREROOMS, Fifth Avenue, cor. 16th St., N. Y.

Dr. SAGE'S CATARRH REMEDY. For a case of Catarrh in the Head which they cannot cure. Sold by Druggists 50 CENTS. The Only Guaranteed Cure.

CATARRH IN THE HEAD. SYMPTOMS OF THE DISEASE.—Dull, heavy headache, discharge of the nasal passages, discharge falling from the head into the throat, sometimes profuse, watery, and acid; at other times, thick, tenacious, mucous, purulent, bloody and putrid; the eyes are weak; there is ringing in the ears, deafness, or coughing to clear the throat, expectation of offensive matter, together with scales from ulcers; the voice is changed and has a nasal twang; the breath is offensive; small and taste impaired; there is a sensation of dizziness, with mental depression, a lack of energy in general, and in the grave. No disease is so common, more deceptive and dangerous, less understood, or more unsuccessfully treated by physicians.

LOCAL AGENT. A local application for healing the diseased condition in the head. Dr. Sage's Catarrh Remedy is beyond all comparison the best preparation ever invented. It is mild and pleasant to use, producing no smarting or pain, and containing no strong, irritating, or caustic ingredients. The drug, or other poison, which is a powerful antiseptic, and speedily destroys all bad smell which accompanies so many cases of catarrh, thus affording great comfort to those who suffer from this disease.

PERMANENT CURES. The Golden Medical Discovery is the natural "helpmate" of Dr. Sage's Catarrh Remedy. It not only cleanses, purifies, regulates, and builds up the system to a healthy standard, and conquers throat, bronchial, and lung complications, when any such exist, but, from its specific effects upon the lining membrane of the nasal passages, it aids materially in restoring the diseased, thickened, or ulcerated membrane to a healthy condition, and thus eradicates the disease. When a cure is effected in this manner it is permanent.

Both Dr. Pierce's Golden Medical Discovery and Dr. Sage's Catarrh Remedy are sold by druggists, or sent by mail for \$1.00, six bottles for \$5.00. Dr. Sage's Catarrh Remedy 50 cents; half-dozen bottles \$2.50. A complete Treatise on Catarrh, giving valuable hints as to clothing, diet, and other matters of importance, will be mailed, free of charge, to any address, on receipt of 25-cent postage stamp. Address, World's Dispensary Medical Association, No. 635 Main Street, BUFFALO, N. Y.

SIZE OF PELLETS. PURELY VEGETABLE! PERFECTLY HARMLESS! As a LIVER PILL, they are Unequaled! SMALLEST, CHEAPEST, EASIEST TO TAKE. Beware of Imitations, which contain Poisonous Minerals. Always ask for Dr. Pierce's Pellets, which are little Sugar-coated Pills or Anti-bilious Granules. ONE PILL A DOSE.

SICK HEADACHE, Bilious Headache, Dizziness, Constipation, Indigestion, Bilious Attacks, and all derangements of the stomach and bowels, are promptly relieved by the use of Dr. Pierce's Pellets. In explanation of their remedial power over so great a variety of diseases, it may truthfully be said that their action upon the system is glandular, not muscular. Manufactured by WORLD'S DISPENSARY MEDICAL ASSOCIATION, BUFFALO, N. Y.

Dr. Pierce's Pellets operate without disturbance to the system, and are so frequently complicated, as throat, bronchial, and lung diseases, weak stomach, constipation, bilious attacks, indigestion, inflamed impure blood, scrofulous and syphilitic taints, the wonderful powers and virtues of Dr. Pierce's Golden Medical Discovery cannot be too strongly extolled. It has a specific effect upon the lining mucous membrane of the nasal and other glands, thereby softening the diseased and thickened membrane, and restoring it to its natural, thin, delicate, moist, healthy condition. As a blood-purifier, it is unsurpassed. All those diseases which complicate catarrh are diseases of the lining mucous membrane, or of the blood, it will readily be seen why this medicine is so well calculated to cure them.
